ABSTRACT**(Capital, Center position, Upright, Times New Roman 11 regular, Single Line Spacing)**

Abstract is the summary of all article content, maximum: 200 words. Use Time New Roman 10 regular, single line spacing, paragraph: justified alignment. The abstract contains: introduction (1-2 sentences), research objectives (1 sentence), materials and methods (3-5 sentences), research results (3-5 sentences), conclusion (1 sentence) made in 1 (one) paragraph.

Keyword : word 1; word 2; word 3; word 4; word 5

Minimum 3 words, maximum 5 words (capital letters only appear on the first keyword, separated by a semicolon (;) and do not end with a period on the last keyword).

INTRODUCTION**(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)**

The introduction contains the urgency and background of the research problem which is described using the inverted pyramid method starting from the global, national and local levels.

Include references (relevant literature or research results) using the source number in each sentence after a period (.) which is adjusted to the Bibliography, for example: Tri Cahyo S., et al., 2021 research on health education through mobile health can increase the knowledge of pregnant women regarding consumption of Fe tablet (1).

The introduction contains a general background review and a literature review (state of the art), try to cover a minimum of 5 pieces of literature that can justify the novelty or uniqueness of this

research compared to previous research (usually 2-3 paragraphs). The number of pages in the introduction is 1-1.5 pages written using Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm. The final part of the introduction should state the research objectives.

METHODS

(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)

This section explains the types of research, including quantitative or qualitative research. Qualitative research such as case studies, phenomenology, ethnography, etc., needs to add a description of checking the validity of research results. Quantitative research explains the location and time of research, population and sample, sampling techniques, data collection techniques, data analysis, and data presentation. Research that uses tools and materials requires writing down the specifications of the tools and materials used. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and may not use the organization of writing into "subheadings" in this section. Displayed in 1-2 paragraphs.

RESULT

(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)

The results section describes the characteristics of the research subjects, univariate analysis, bivariate analysis and multivariate analysis (if any). The results obtained from research must be supported by adequate data. The research results must be an answer related to the problem and research objectives stated previously in the introduction. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and may use organizational writing into sub-headings for each variable, as well as subheadings in Bold and at the beginning of words using capital letters, **may not use bullets or numbers**. If you choose a table as a data presentation tool, please select an open table (only use horizontal lines), table position: middle, sentence position: middle, title position: top middle.

Table 1. Distribution of malaria breeding places

Area	Frequency	Percentage
Seram Bagian Barat	101	20.20
Maluku Tengah	149	29.80
Seram bagian Timur	250	50.00
Total	500	100.00

If you choose the figure as the tool of data presentation such as chart, graphical image, photo, etc.; please choose the jpg extension, figure position: center, title position: bottom. See example below.

Figure 1. One of element of development monitoring kit

DISCUSSION

(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)

The discussion section contains reasons that explain the research results and other studies that support and are not in line with the research results obtained. **you are not allowed** to use sentences that are the same as those listed in the results section and you are **not allowed** to re-read the tables and graphs of the analysis results. However, the results can be grouped to be interpreted and discussed based on theory and previous research results. Writing uses Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and may use organizational writing into sub-headings for each variable, as well as sub-headings in Bold and at the beginning of words using capital letters. **you cannot use bullets or numbers.**

CONCLUSION

(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)

The conclusion contains a summary of the description of the results and discussion with reference to the research objectives. Suggestions are prepared based on the research findings that have been discussed. Conclusions should be answered to research questions, and expressed not in statistical sentences. The presentation is in the form of flowing paragraphs which contain the connection between one content and another. Use terms that have substantive meaning in the field of science and avoid statistical/methodological technical terms. Suggestions may refer to practical action, development of new theory, and/or further research. Write conclusions and suggestions using Times New Roman 11 point (upright) with 1.5 spacing. Each paragraph begins with an indent of 1 cm and **cannot use bullets or numbers.** Displayed in 1 paragraph.

REFERENCES

(Capital, Center position, Upright, Bold, Times New Roman 12, 1,5 Spacing)

To maintain consistency in referencing, citing and writing bibliography, you are required to use standard reference applications such as Mendeley, Zotero, Bibtex or EndNote.

The bibliography is written according to **Vancouver** writing rules. All references used in writing in the bibliography are numbered sequentially according to their appearance in the article, **not Alphabetically**. Only include used and relevant literature. Reference sources use primary sources such as research articles in scientific journals, research reports or proceedings, articles in books from research results, historical sites, artifacts, etc. that are original works. Writing the bibliography uses

Times New Roman 11 point (upright) with 1 spacing, space after paragraph 10 pt and before paragraph 0 pt. Each word in the title of a library resource begins with a capital letter.

Additional Information:

1. The manuscript must be a maximum of 13 pages with one point five spacing, except for the title and abstract using single spacing. The manuscript was written using the Microsoft Word computer program with A4 page size. Moderate size margins. The contents of the article use one column format.
2. The margin or border of the writing from the edge of the paper is 2.5 cm on all four sides.

-----GOOD LUCK-----
