Imagine all the People!

The description of an extraordinary boy – Kevin from Italy, and his portrait drawn by Julia from Poland.

During the quarantine, we wanted to engage junior primary school students to collaborate internationally. While working on the project, students developed their art, IT and civic skills. They felt that they are a part of the European community. They made new international friends and most importantly they practiced English. The students were taught how to use the Internet safely. Based on the submitted descriptions, students drew their new international friends. They wrote about their appearance, interests, favourite food and dreams.

We are proud to present their works.
