

User Stories - Etch Bonus Platform

August 2018

Employee

General

As an employee, I don't want to sign in more than once a day so that I can check my bonuses more frequently.

- 'it's done when the employee can simply open the app and see personalised information without signing in every time

As an employee, I don't want to manage my private keys as that's just a massive hassle to manage.

- 'it's done when the employee can send their tokens on the ethereum network by using 2FA only

As an employee, I want to personalise my profile to make me unique within my organisation.

- 'it's done when the employee can customise the profile photo and change password etc. from the default profile given by the employer

Live Contracts

As an employee, I want to be able to see a list of all "live" bonus contracts so that I can work towards achieving those goals.

- 'it's done when the employee can click the a "live" contract card and see a list of all live bonuses

As an employee, I want to be able to click on a “live” contract link to get more information including a countdown so that I can prioritise time/effort.

- ‘it’s done when the employee can see a page with all the parameters of the “bonus” including a countdown clock

Wallet

As an employee, I want to see the balance of tokens so that it can incentivise me to achieve other bonuses.

- ‘it’s done when the employee can click a wallet card on the home screen that will take them to a page showing balance of tokens.

As an employee, I would like to be presented with options on what to do with my token balance so that achieving the goal was worthwhile

- ‘it’s done when the employee can see options for token transfer

As an employee, I would like to cash in my tokens to make them “real”

- ‘it’s done when the employee can transfer tokens to Employers wallet for redemption. Employer would then electronically pay fiat money to employees account

As an employee, I would like to exchange my tokens to other crypto like BTC or ETH so that I can start hodl my own crypto.

- ‘it’s done when the employee can transfer tokens to Etch for exchange in a shapeshift kind of transaction

As an employee, I would like to transfer tokens to other employees in my organisation to use to recognise peers.

- 'it's done when the employee can select employee from a list and send them [X] tokens

Past Contracts

As an employee, I want to see a list of past bonuses awarded so that I can use this information for tax purposes.

- 'it's done when the employee can download a bonus payslip report in PDF for month/year

Employer

General

As an employer I want a web portal that I can upload the email address of every employee so that I can email out invitations to the platform.

- 'it's done when the employer creates an account with Etch and is presented with a form to add employees

As an employer I want to use the same login credentials on an app so that I can manage the platform more in real-time than if web based only.

- 'it's done when the employer is sent a link to download the Etch bonus app employer dashboard

As an employer I want to customise the logo on both the employee app and the employer dashboard app to personalise it to our company / culture.

- 'it's done when the employer on signing up is presented with an upload logo button that can also be updated at a future date.

Employee tab

As an employer I want view existing bonuses and add new bonuses for my employees to incentivise them to achieve new goals.

- 'it's done when the employer can search all employees and see a summary page of bonuses live and past + add new bonuses

As an employer I want to add new individuals who has joined the organisation through the app so that the employee status is updated

- 'it's done when the employer can click a "+" button on the employee search page

Bonus tab

As an employer I want to see a list of all bonuses templates used - individual, team and company wide. This is to help with administering the platform.

- 'it's done when the employer is presented with a list in the "bonus tab" that will have a link to open up the bonus contract to view

As an employer I want to create a new bonus that is created dynamically so that they can be deployed without having to write any new smart contract code.

- 'it's done when the employer is presented with a form that has dropdown options to create new bonuses for individual, team or company wide

As an employer I want to share fun tokens like /// 🍩 or /// ☕ not just money based tokens that has instant gratification say at lunch that day.

- 'it's done when the employer can select a number of real life emoji tokens that are fully redeemable in the real world

Balance tab

As an employer I want to see the balance of the three tokens needed for this platform so that I can add more if the balance is running low.

- 'it's done when the employer can click on an "add" button and is given an address to send tokens to.

As an employer I want to see how much "IOU" tokens are out there in circulation so that I prepare for redemption from employees, Etch or the market if sold via external exchange

- 'it's done when the employer can see a table of all "IOU" tokens ever created, amount in employees wallet and amount in circulation
