Zidoo S928X-K All Applications Introduction

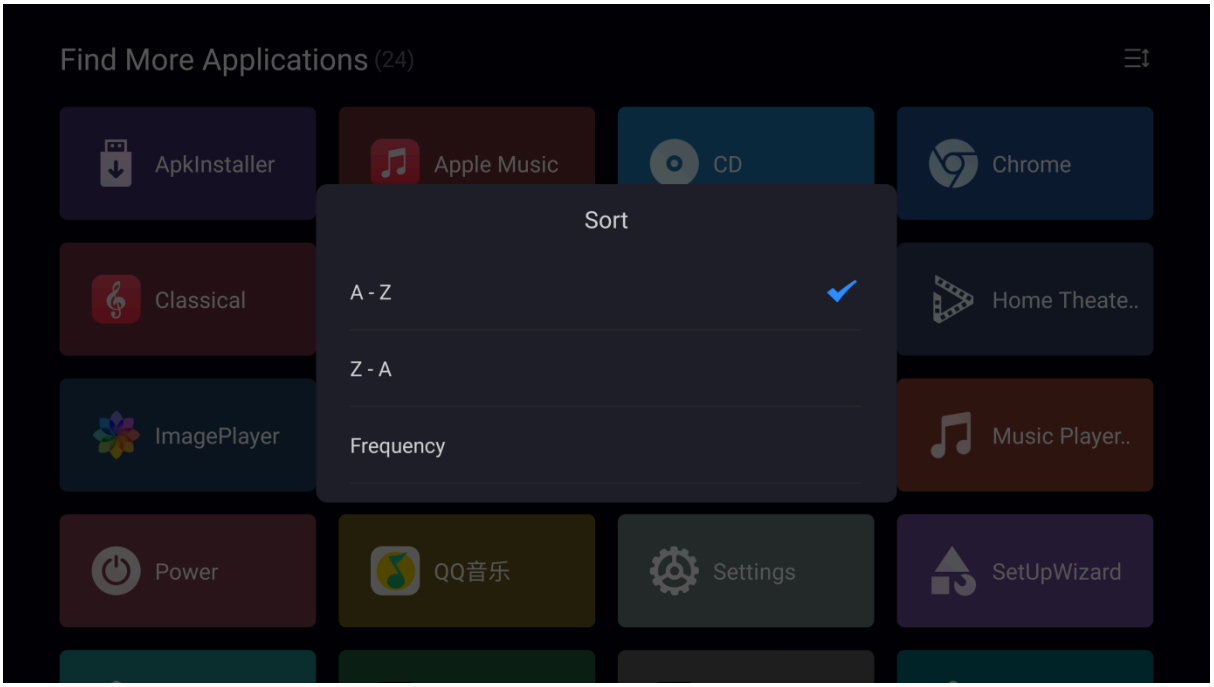

Apps menu shows all the apps installed in the player, including built-in and third-party apps. Selecting the software and pressing menu key can call out the function menu, which supports the settings of Launch On Startup, Uninstall (only support third-party), Clean Data, etc.

Entry Guideline: Click the "Apps" icon on the Home Page of Zidoo player to enter.

I. Sort function

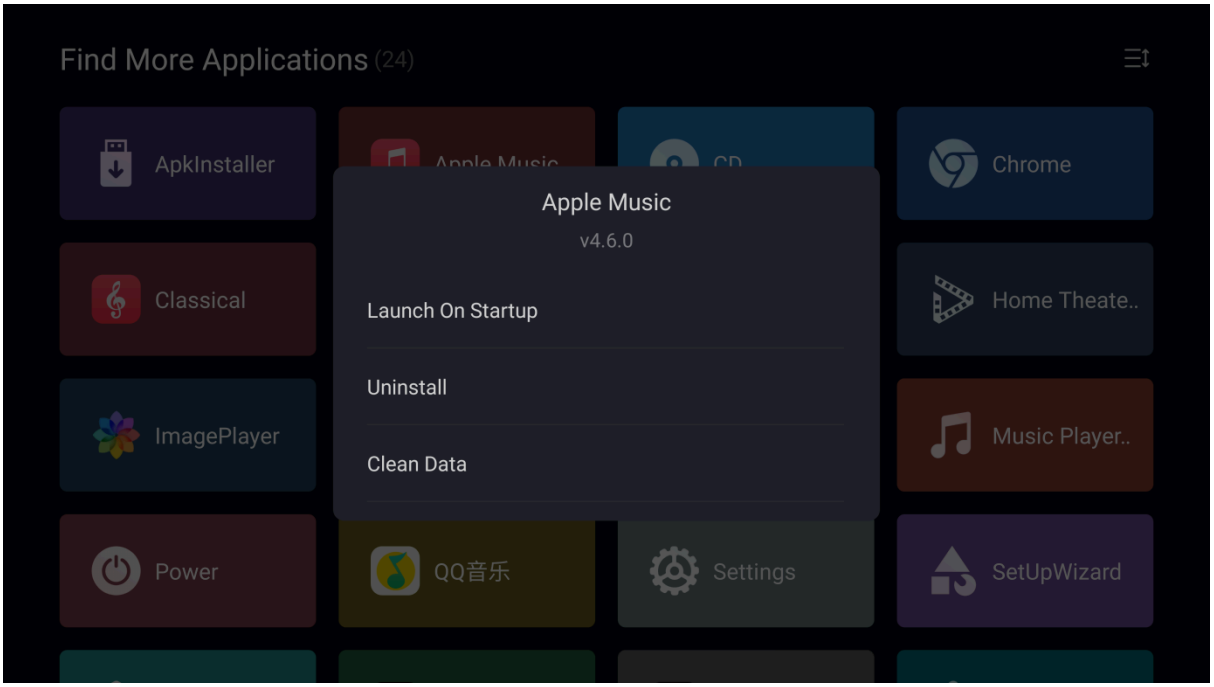

Click "Sort" icon in the upper right corner of Apps menu to customize the sorting of all apps.

Sort	Function Introduction
A-Z	Sort by software name in ascending alphabetical order
Z-A	Sort by software name in descending alphabetical order
Frequency	Sort by frequency of software use in ascending order

II. Applications customization function

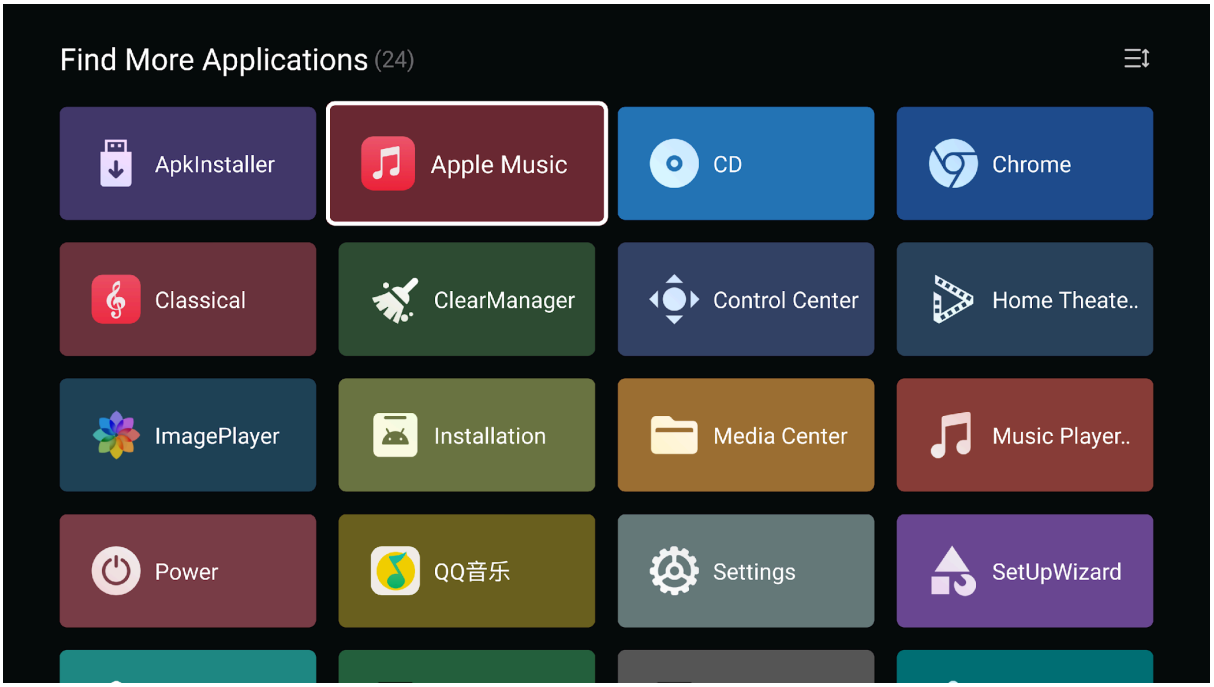

Click on any app and press the "menu key" to see the version of the software and support the functions of Launch On Startup, Uninstall (only support third-party), Clean Data, etc.

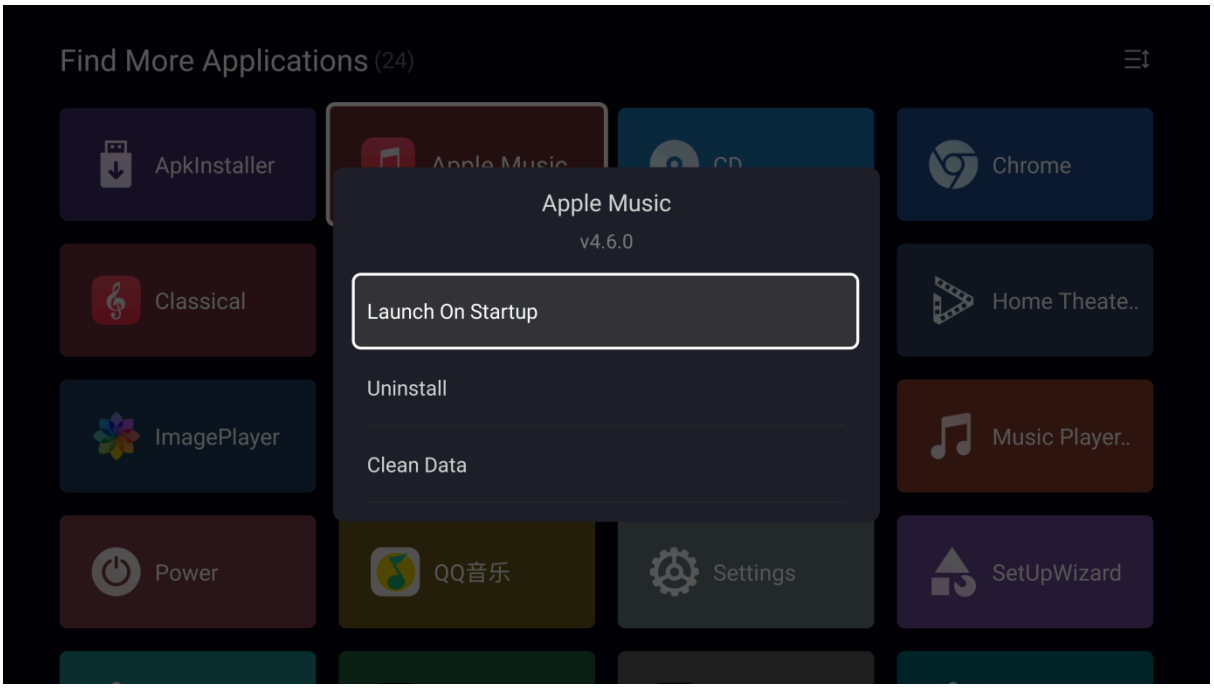

Software	Function Introduction
Launch On Startup	After setting this function, the next time the player is turned on, the software will be launched automatically.
Uninstall	Uninstall selected software, only third-party software is supported
Clean Data	Permanently delete all data from this app. The deletion includes all files, settings, accounts, databases, etc.
