D. RESULT AND DISCUSSION

This section consists of the results of research and how they are discussed. The results obtained from research must be supported by adequate data. The results of the study must be the answers to the problem and the research objectives stated earlier in the introduction.

In the discussion must contain: 1. Whether the data research results have been analyzed (not raw data). Can be presented with tables or figures other than verbal presentation to clarify. This section usually answers the question what and how?

Does the author provide a scientific interpretation for each of the results or findings the author presents (why)?

Are the results of the study consistent with what was reported by other researchers (what else)? Or is there a difference?

Results and Discussion are capitalized, spaced 1 space apart and bolded. If you use supporting tools, simplify the tables and use open tables, and map images are more focused on the object under study and not too large file size and complicated (sought in JPG format); tables and figures are numbered sequentially. Do not use location when referring to Figures or Tables, for example: "... presented in Figure 1

below." But simply "... presented in Figure 1." or "..... (Figure 1)."

The use of subtitles in the discussion in accordance with the purposes of the discussion. Example:
