

Thank you for showing interest in our Upcycle Hoodie Workshop!

What to Expect

After this workshop you will have a better idea of how to make a garment from start to finish using a sewing pattern. We will help you measure yourself, pick a size, choose fabrics, cut and construct. You'll get to go home with a hoodie you made yourself! *This isn't a sewing 101 workshop, but rather a garment construction/how to use a sewing pattern workshop. We ask that you already have basic sewing skills and are familiar with using a sewing machine.*

Form Pattern Shop on Etsy is so kind to let us use [this pattern](#) to teach our workshop. You are asked to purchase and print the pattern on your own. Once registered for our workshop, you will get a coupon code to purchase the pattern for \$5. Instructions for printing the pattern on your home printer are

included with purchase. Please print the pattern and bring it to the optional prep meeting if possible.

Class Registration

1. Please fill out [this form by](#) to register for the workshop.
 2. Once you've completed the form, please [send payment of \\$54 to Jordan via Venmo.](#)
 3. After registration and payment have been sent, we will send reminders via email the week prior to the workshop.
-

Optional Prep Meeting

This is two days before the workshop and is to get some of the prep work out of the way so we can spend the workshop time constructing our hoodies. We will have samples of hoodies we've made from this pattern in all sorts of fabrics for you to see. We will be discussing taking body

measurements, choosing fabric options, picking a size based on your measurements and fabric, how to assemble the printed pattern, cut fabric, etc.

Please bring your printed pattern and fabrics you're thinking of using so we can offer guidance, or browse Scraps shelves. Almost any fabric will work with varying results, but we encourage upcycling/secondhand. We have made this pattern using stretchy and non-stretchy fabrics, tablecloths, curtains, blankets, quilts, you name it! *You don't have to attend this meeting if you have your fabric and know how to choose size/cut out the pattern on your own.*

Workshop

The workshop will be in a large classroom with plenty of table space to spread out our machines and work alongside each other. We will have irons, ironing boards, and cutting mats, but please cut your fabric out beforehand if possible to ensure you have enough time to complete the hoodie. Also, please bring your own sewing machine, scissors, and thread. Sergers will be provided for everyone to share. *You can complete the hoodie using only a sewing machine, but sergers add a nice finished detail and we encourage you to try them out!*

We will walk through making the hoodie together from start to finish. We will discuss any suggested changes based on what fabrics you're choosing, offer guidance if you get stuck, and give tips for customizing the hoodie to suit your needs. We hope you leave feeling cozy in your new hoodie, inspired, and ready to make another garment on your own!

We are so excited and can't wait to see what you make and create together! If you're looking for hoodie inspiration, check out [Sully's instagram page](#).
