

Criminology Overview 5/18-5/22

Hello everyone! Here's a look at next week. See attached instructions and links. These are to be completed in the student's Google Classroom once they're posted.

This is subject to change if additional assignment/s and/or supplemental work is determined to be necessary and beneficial. Please refer to the student's Google Classroom to stay most current.

This new chapter talks about the foundations of Trait Theory and its connections to mental and/or physical abnormalities and how they may be connected to violent crime. Using the attached material (Google Slides, A Crime of Insanity-Insanity on Trial article, and Aurora Shooting Trial: James Holmes 'Not faking' Insanity Plea article) answer the questions on the Google Doc "Trait Theory Worksheet". We will discuss this further in a future Zoom meeting.
