

Fawn's Lesson on [Steepness](#) and [here](#)

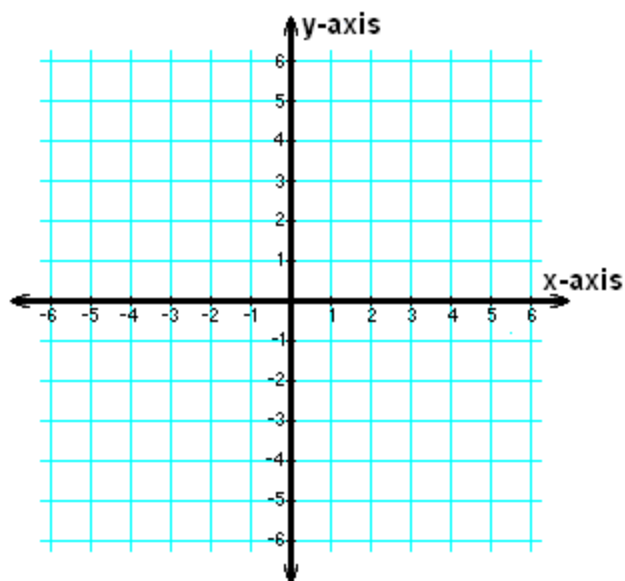

Slope = _____

Write the slope of each Staircase

| A | B | C | D | E | F |
|---|---|---|---|---|---|
| | | | | | |

What makes a line steep?

What make a line not so steep?

Use the staircase method to determine “steepness” of the line containing these two points: (-4, -6) & (8,1)

Use the formula you developed to find the slope between (-2, 6) and (1, -3).
