### **PROSPECTS FOR USING PLANT RAW MATERIALS IN THE PRODUCTION OF ECO-PRODUCTS**

Ivanov I.I., Ph.D., Associate Professor, Department of Food Technology,  
Almaty Technological University, Almaty, Kazakhstan, [ivanov@atu.kz](mailto:ivanov@atu.kz)

In the context of growing demand for environmentally friendly food products, interest in technologies for processing plant materials with a minimum degree of processing is growing. The article examines the prospects for using grain crops and legumes in the production of eco-products, and also presents the results of experimental studies of the composition and properties of the resulting products [1].
