

Hue Animation - Stop Motion Kit

Kit Contents:

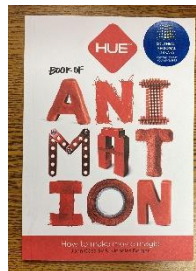

- 2 Laptops in bags (mice and cables included)

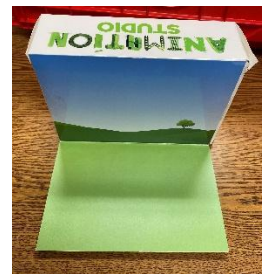

- Bucket of assorted modeling clay

- 1 Hue Book of Animation guide

- 1 Hue Animation Studio Box (Portable Set on Back), which includes:

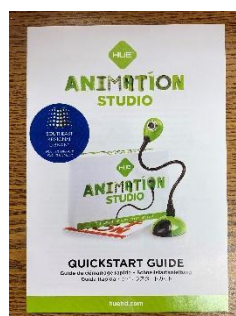

- 1 Hue Portable Camera and Smart Stand

- 1 HDMI cable

- Quickstart Guide

Hardware:

The Hardware is very easy to set up:

- Plug the Hue Camera into the Smart Stand included in the package, then plug the stand into an HDMI port.
- After opening the HUE Animation Studio application on the desktop, select the “Camera” option at the top,
- Select settings
- Change Camera to Hue HD Camera

After setting up the animation program, you’re ready to begin. The HUE Book of Animation will provide all of the steps you’ll need to get started. For information on how to use the animation program, review pages 10-15 of the guide book.

Ideas for Projects

The HUE Book of Animation gives you several examples of stop motion projects you can try if you’re stuck on ideas! The included modeling clay can be used to create characters or backgrounds. You might also want to ask patrons to bring their own items such as Lego, figurines, or other small toys.

Finding Sounds and Music

A great place to visit for royalty free sound is **freesound.org**. You’ll be able to find particular sound effects and even music that can be imported into your project. Any sort of royalty free sound is acceptable in a project that will be posted online. Always be sure to read the copyright information on any sounds/music you use.

Share Those Creations

Be sure to share the finished products from your program onto the Southeast YouTube Channel! We’d love to see what everyone create
