INTRODUCTION

PURPOSE OF THE GUIDE

The purpose of this digital resource guide is to **connect** students and families with assistance that is responsive to their needs.

Its use by district staff will **illuminate** enriching and diverse community resources that can help prevent or eliminate barriers to student learning in their environment.

The use of a digital guide serves to keep pace with the constantly changing availability and substance of community resources, and is therefore designed to be maintained **collaboratively** by users.

HOW TO USE THE GUIDE

Use of the guide is facilitated by its Table of Contents. When staff are presented with a student or family need, they simply locate a relevant topical reference within the Table of Contents.

After users click on the topic and the ensuing link that appears, a summary of available resources will be displayed. Each agency resource section contains a description of services, contact information, any fees or eligibility requirements associated with service, along with useful links to more information.
