Fractions

Tuesday 24 May

Kahoa Lole

Manusiu was helping her mokopuna to make kahoa lole for the prizegiving. There were 48 lollies for each kahoa lole. This was the fraction for each type of lolly:

Picnics: $\frac{2}{6}$

Mars bar: $\frac{3}{12}$

Crunchies: $\frac{1}{4}$

The rest were chocolate fish.

How many of each type of lolly was used?

Can you represent your thinking in two different ways using diagrams and calculations?

Friday 3 December

Cook Island Dishes

Cook Island Mamas were making dishes for Cook Island Day. Across all of the dishes, 18 require coconut cream as an ingredient which is $\frac{2}{5}$ of all the dishes. How many Cook Island dishes did the Cook Island Mamas make altogether?

Can you represent your thinking in two different ways using diagrams and calculations?
