

Message for FL Legislative leaders OPPOSING DeSantis/Ladapo proposal to eliminate vaccine mandates for school children

Call or email. Add your thoughts!

I am appalled at the efforts of Governor Ron DeSantis and FL Surgeon General Joseph Ladapo to eliminate current state mandates requiring vaccinations for children entering school. Their proposal is counter to scientific evidence and will endanger the lives of Florida's children. The state already provides an option for parents to request an exemption based on certain grounds. I join with public health professionals, and medical organizations (American Medical Association, Florida Medical Association, FL Chapter of the American Academy of Pediatrics) in urging you to maintain the state's current requirements and protect our children!
