

# FUCK JOB LETS GET RICH NOW.

In the 21st century, people's mindset has changed a lot as compared to the 20th century. Back in the 20th century having a corporate job had some status and social respect. But people these days don't show any interest in having a corporate job as they assume working under someone would lower their potential. Rather people pursue their dream or their ambition. They prioritise their dreams over everything.

There has been a considerable decline in conventional Corporate job workers. This is due to inflation, high tax rates, and expenses. Due to these factors, it's hard to fulfil day-to-day expenses and luxuries with income generated from a Corporate job.

For this very reason, people tend to generate revenue from an independent source rather than working a Corporate job so that they can be financially free and independent in all regards.

The aggressive title which is “F\*uck Jobs lets get Rich

Now” depicts people's emotions who currently are working in a corporate environment or have worked in such an environment.

They have been put off from working in such a condition because it suppresses their potential, ambition, desires to progress, and motivation. They feel like they have been choked or put under constant pressure, even breathing or moving independently is considered bad. This is all due to the management of the company. If the management of the business is friendly and provides enough opportunities for the employees to work independently both the employees and the company grow at the same time which creates a productive environment.
