Platform for Australia.

# Introduction

Hello there!

I'm Alex, or /u/UrbanRedneck007.

Three months ago, I set out on a bold path to redefine politics in Australia. Originally winning as an NLP candidate, I quickly realized that the party was suffering from many demons we refused to reveal. As leadership was never my main goal (since I was the new kid on the block) taking leadership roles in boring (but necessary) positions was what I did to help fix the party.

Within 2 weeks of being an MP I was entrusted with being the President of the party, I drafted a new Constitution and quickly began mass recruitment. Even though we went through a revolving door of leaders at the top, I believe the party stayed strong. I created a formal bureaucracy and set up guidelines that will maintain us into the future, no matter what the election results are.

As a result I believe now, more than ever is my time to lead this country. I have successfully healed a dying party and I can do it again for this sub. I believe that to better all Australians, we should encourage dialogue between politicians and citizens; we should allow for the media to have better access to our politicians, and we should introduce policies and bills that we all work to create, not just an oligarchy of Labor members, canvassing and idling like any other politician of our day.

Friends, Australia is in a great time of peril. Inactivity in the government results in Australians waiting, oligarchy makes the democratic process

irrelevant, we have a governing party that has no vision, that has only created division in its tenure. We need a leader that has a *vision*, who will respect, listen, and champion Australians as one. Australia, our country will fall, if we cannot lift ourselves as one, to believe in change. We can create a difference, and it starts with you. It's morning in Australia, and I believe, that the task starts now.

Thank you.

- Alex

## Our Team:

President: /u/piggbam

Leader: /u/UrbanRedneck007

Deputy Leader: /u/ganderloin

Communications Director: /u/piggbam

## Foreign Policy

Australia has a great relationship in the Model World. As one of the founding and leader in creating one, we have fallen into disrepair as others moved onto other subs. Our problem is a government that has no vision. It's inability to negotiate with other countries for entry into the model world is a fault. It is proof that Labor is unable to have a strong voice for Australians, at the international front.

## Our mission.

### **Closer Relations with the United States and the U.N.**

- This is crucial, because we need a voice, and Australians want a government that is competent in this ever-changing world.

### **Combat Russian aggression through sanctions and detente.**

- Russia has had a good relationship with us. Sanctions can work, but we are all human, we can make a better relationship if we find a solution together, and not battle against each other.

### **Increase Foreign Aid to third world nations, and stop the poverty cycle**

- Countries in this world aren't as fortunate, we as the NLP pledge to stop the cycle of hunger, and start to end the process by negotiating with the governments and oversee each country's regeneration.

### **Combatting against ISIS by finding solutions and effectively finding a plan to restore peace in the Middle East.**

- ISIS is a threat that will not be stopped if we do not stop the cause. Ever since a botched attempt for an invasion, the society there has been ever so poor. We have got to go in, and start creating economy. Oil is a boom there, and we need to make it so the youth have food to eat, house to live in, and have no urge to radicalise because of their poverty.

### **Schedule a G20 meeting in the Model World once a month**

- Only a strong government with a voice can engage in such meetings, otherwise it would be a fail. We can only be a leader if we have true leaders in our country.

Furthermore, as our modern society goes, we will take in refugees, however, these refugees will be a aid in our plan to stop ISIS and bring true stability in Iraq and Syria, not by toppling governments, but by actually boosting the economy there that is legal.

## **Economy**

In a economical recession, we need a common sense tax plan by lowering taxes for those maxing between \$18,201- \$80,000 and creating new taxes brackets over \$180,000 (below you will see a detailed plan). For families, a Child Tax Break for families who put their children in sports and activities is excellent to boost our population, and allow parents to have choice. Finally, we will oversee a creation a 1% tax on all produce food sold to help create a national food stamp program for those

making less than \$25,000 a year. For those on welfare, we plan on finding opportunities to find employment, by giving them housing, and figure out the hole where some are taking advantage of it.

### Current Tax System

Taxable Income	Tax on this Income
\$0 - \$18,200	NIL
\$18,201 - \$37,000	19c for each \$1 over \$18,201
\$37,001 - \$80,000	\$3,572 plus 32.5c for each \$1 over \$37,000
\$80,001 - \$180,000	\$17,547 plus 37c for each \$1 over \$80,000
\$180,001 and over	\$54,547 plus 45c for every \$1 over \$180,000

### New System under NLP Leadership

Taxable Income	Tax on this Income	Change
\$0 - \$18,200	NIL	NIL
\$18,201 - \$37,000	15c for each \$1 over \$18,201	-4c for every \$1 over \$18,201
\$37,001 - \$80,000	\$3,572 plus 30c for each \$1 over \$37,000	-2.5c for every \$1 over \$37,000
\$80,001 - \$180,000	\$17,547 plus 32c for each \$1 over \$80,000	-5c for every \$1 over \$80,000
\$180,001 - \$300,000	\$54,547 plus 38c for every \$1 over \$180,000	-4c for every \$ over \$180,000
\$300,001 - \$1,000,000	\$80,655 plus 40c for every \$1 over \$300,00	New Bracket

\$1,000,001 and over	\$100,000 plus 45c for every \$1 over \$1,000,000	New Bracket
----------------------	---	-------------

## Environment and Infrastructure

Climate change exists, and the Labor government does not recognize the fact that climate change does exist and man is playing a role in it. They have spent months going over a sugar bill that will make the government more tax in their pockets and make sugar become a black market. The NLP will recognise that there is climate change, and something has to be issued so international corporations can open here, and at the same time, adopt good ethics regarding climate. We do not think however, that the government should waste money in a recession, on expensive energy, or engaging in debt inducing schemes.

## Goals

- National High - Speed Railway
- Mass installation of solar panels in Western Australia
- Increased usage of wind turbines, particularly in the interior of Australia
- Create 6 new wildlife parks, in the West and other states and islands.

# Social Policies

In an ever changing society, we need a governing party that is strong, and capable of standing up to the world. We believe a strong government starts with its social policies to protect its people from within. After terms of terms of Labor, who have done nothing but try to limit sugar from its citizens, we think its time we start taking action. At this moment, we already have 4 bills in writing, and more to come on shaping our country for the better.

As government, we will aim to protect the minorities, the LGBTQ community, because these groups are all contributing members of society. We believe that everyone is respected, is a great approach to getting citizens to unite with each other.

Primarily, the question with a ever changing world, is how will we decide the refugee problem. Firstly, we would need to find solutions to end the war, and not just take in refugees, because that is just allowing situations to deepen into crisis. At this moment, with ISIS already announcing the infiltrations of radicals, the NLP will pledge to stop allowing simple refugee entry, until we find a system that is protecting citizens and allowing persecuted individuals to safely come to Australia.

The NLP has so far 2 solutions - Shutting down our borders, or/and limiting immigration to background checked and verified people. These two on their own are extremely confusing and harsh, so we think that combining them would be best, making an effective strategy to combatting the threat and diverting resources to end the instability in the Middle East.

## Goals

- Solving the refugee crisis
- Uniting the communities

- Emphasizing multiculturalism into Nationalism

## Health Care and Education

In a developed world, Medicare and health care in general is important for Australians, and a perk of the Western World. However, it is being ruined by Labor, who think they can guarantee equal healthcare for all. They say we don't understand what economy is and how it works, however, having equal care for all is not something that can be easily created or generated.

Our society is a strong, but it takes more than taxation to make a good healthcare system. We need to get our economy up, before we can get services for all, which **means**, everyone will need to pitch in, and invest together in new industries and strengthen our country. When everyone is rich, everyone has the money to invest in services. We cannot continue to tax everyone and just make money for the government to pocket, we need to deliver it.

Education in Australia is another important subject we all need to discuss. Countless citizens cannot afford post-secondary, and our solution, is to get more students in, and for each family, there will be a huge discount per children (10, 20, 30) and once they graduate, they will be placed into a firm, and become a working contributor, potentially another innovator for the world. We do not think that living in welfare, unable to leave for higher education is a reason youth are not succeeding.

Furthermore, we believe for certain subjects, the state can allow parents to opt out, such as sexuality, because certain religions prohibit such teachings without explicit recommendation and exceptions. We believe in choice, however, that said, being proud of our country's accomplishments are another thing we need to focus on. Therefore, having more curriculum in schools about Australia will improve the nationalism and heritage that makes us all proud to be Australian.

# How to Improve Model Australia

Australia is a great place. The only issue is, the community is somewhat small. What the NLP will do, is reach out to places, and look for more people. On top of that, our party will do its part in generating a strong way to motivate people to stay, and that's with bills, community discussions, and events like natural disasters that can shape our decision making in this simulation.

## Goals

- Regular Question Time
- A Bi-Monthly "Meet your MP's"
- A weekly podcast.
- Regular Polling
- Suggestion box for bills
- Public positions.
- A reformed CiD so that citizens can make amendments.
- Meta Events
- Activity motivations
- MORE BILLS!

## Conclusion:

"You will have a difficult decision to make. We understand the opinions and choices, however, remember Australia's stability depends on its governments, and that Labor will only shorten our Commonwealth's years, and soon we will divide and fall from those mistakes that Labor makes."

We believe in transparency, that's why we have posted our platform for all to view, because we think for the people, not for the money and power a office of the country brings.

We have a plan of making our country better, and greater than ever before, whether it's supporting the rural peoples, or wildlife protection, or even just publishing a budget that is readable, comprehensive, and provided for Australians.

On July 7th, elect a NLP government. Together, we won't make dreams continue to be dreams, we'll make reality shaped by your dreams.

Remember, we can make "Morning in Australia again."

- Alex.
