Tech Team

Part of the rota for Sundays services at 9:00 and 10:30 + Occasional one off events or special services.

The Tech Team is responsible for ensuring all the audio and visual aspects of a service or event run smoothly. It's a ministry that often goes unnoticed until there is some kind of technical issue. Volunteers need to be calm and flexible, having some knowledge of mixing desks and data projection is helpful, but not essential as training can be provided.

Volunteer Roles

Visual/Data Projection - Operate the PC providing visuals for the screen, software we use is ProPresenter which is linked to our service planning software Planning Centre Online.

Sound/Audio - Help set up and check equipment, be responsible for running the mixing desk for all the sound and audio during a service or event.
