The introduction includes the problem(s) that will be the subject of the study, the purpose(s), the significance(s), and the problem-solving ideas (s). CONCLUSION ← 12pt, Bold, Capitalize

The reader receives closure at the conclusion while being reminded of the significance and content of the work. To achieve this, stand back from the details and consider the document's overall structure. In other words, it serves as a reminder of the key point for the reader. The conclusion restates the essential points in an easy-to-understand manner, bringing everything together to assist make the paper's thesis more apparent. A conclusion should make the purpose and significance of the research clear rather than introducing any new ideas.

There may be suggestions in this section as well. One option is to create the same research in a new context, place, and/or culture. Another option is to re-evaluate and broaden the theory, framework, or model that you have addressed in your research. Future study can examine how a specific occurrence, the appearance of a new idea or piece of evidence, or another current phenomenon has affected your research question(s).
