# Description of the Quizlet for peer learning

## *Basics*

**Tool name:** Quizlet

**Related peer learning methodology:** Study Groups

**Category:** LMS

**Target group:** Students

**Age group:** Secondary

**Context:** Flash-cards for memorising

**Topic:** Cross-disciplinary tool

## **Relation to in-class pedagogy:**

Various studies show that students who check themselves with flashcards learn the material more effectively compared to rereading their notes. Cards are a standard digital flashcard method where you cycle through your study set and try to memorize the information. Quizlet is a powerful study aid, one that works well in a variety of settings from traditional schooling to online learning.

## *The problem*

Students may have trouble remembering new vocabulary or facts and figures in class. Students may also incompletely take notes during class, so their preparation for exams will not be successful.

## *Objectives*

Quizlet can support peer learning in the class through individual sets of cards created by students for their classmates on each topic covered or to be learned.

## *Context*

Quizlet is popular among primary and secondary school students and is also well known among university students, medical students, law students, and adult learners who need to memorize information—including those studying for standardized tests and trade exams.

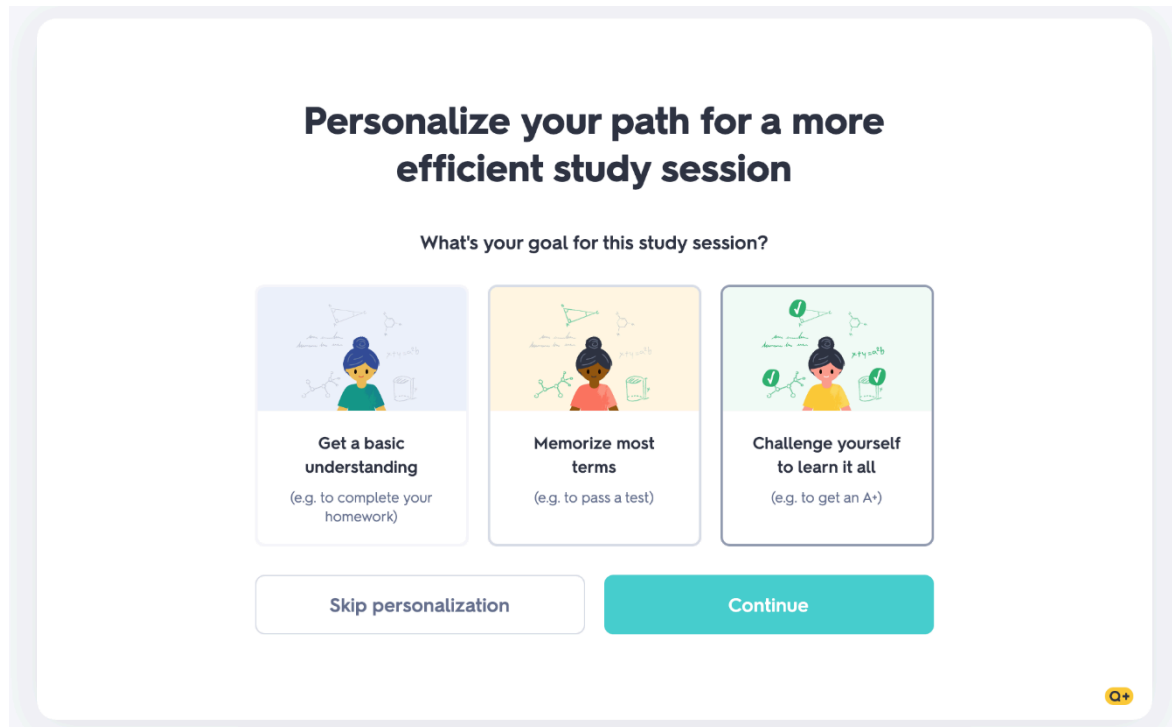

Teachers also can use Quizlet to make study sets for their students. Instructors can upload and organize information that they want their students to master. Then they can invite their classes to access the study sets they have created.

### *Real-life usage - the story*

Quizlet has even been used in private industry. For example, it has been used to train grocery store cashiers and for onboarding new employees at a software company.

Reviews are available here:

### *Step-by-step scenario*

(short instructions for teachers/educators)

1. Go to [www.Quizlet.com](https://www.Quizlet.com)
2. To browse user-generated study sets, click search, and type in a topic.
3. To create your own study set, sign-up for an account by clicking "Sign Up."
4. Click "Create" to make your first study set.

### *Advantages & disadvantages*

- + Flexible mobile and website use
- + There is some room for gamification
- + Flexible mobile and website use

- + Promotes collaborative learning with other users, so they can make, share, and find study sets from other users
- + Allows students to be responsible for content curation
  
- User-created content may contain errors or intentionally misleading information, or be problematic in other ways.
- Many technological features are restricted to Plus members

### *What is Quizlet?*

Quizlet is a study aid in app form. In essence, it's a flashcard app with smart features, and it can handle images, diagrams, various languages, and even audio uploads. It's ideal for self-paced, rote-style learning.
