

Privacy Policy (سياسة الخصوصية)

Aura – AI Web Builders Hub

Last updated: 31 2025 أكتوبر

Aura (“the App”) respects your privacy. This Privacy Policy explains how we collect, use, and protect your information when you use our mobile application.

1. Information We Collect

The App may collect and locally store:

- Basic app usage data (favorites, recent tools, chat history) — stored only on your device via sqflite and shared_preferences.
- Optional analytics and error reports through Sentry for improving performance and stability.
- Supabase account data (if you sign in) — managed and stored securely by Supabase under their own privacy policy.

No personal data is sold, shared, or used for advertising purposes.

2. How We Use Information

We use collected data to:

- Enable offline caching and improve user experience.
- Support localization (Arabic, English, Farsi, Russian, Turkish).
- Maintain error tracking and ensure app stability.
- Personalize app themes and preferences.

3. Data Storage & Security

Your app data remains stored locally on your device.

Any remote services (Supabase, Sentry) use encrypted HTTPS connections and adhere to industry security standards.

You may clear all stored data at any time by uninstalling the app.

4. Third-Party Services

The App may integrate the following third-party services:

- Supabase – authentication, backend database
- Sentry – crash and performance monitoring
- Open Graph / metadata APIs – for previewing links

Each service has its own privacy policy and complies with GDPR and relevant data protection regulations.

5. Children's Privacy

Aura is not intended for children under 13. We do not knowingly collect personal data from minors.

6. Contact

If you have questions or concerns about this Privacy Policy, please contact the developer at:
