CORE SKILLS

JavaScript, TypeScript, React, Redux, Node, Express, MongoDB, Firebase, Tailwind, Material UI (MUI), HTML5, CSS3, Figma, Agile, Scrum, Git, Github

EXPERIENCE

Software Engineer, [V.Two](#), Costa Mesa, CA

Feb 2025 - Present

- Served as a full stack developer and product owner across multiple internal and external teams
- Featured project: Tempo (Restaurant management app)
- Architected and engineered a comprehensive labor law compliance solution for a restaurant management app. The app tracks 12 labor law violation types and provides real-time violation monitoring, proactive notifications, record-keeping, and reporting.
- Implemented “smart insights” with AI. The AI model interprets the restaurant’s financial history, trends, and goals, then provides daily analyses to help owners improve their margins.
- Implemented and optimized several parts of the React web app and TypeScript backend, including shift management, employee management, and financial reporting.
- Gathered requirements, drove product discussions, and led Agile ceremonies
- **Technologies Used:** JavaScript, TypeScript, React, Node, Redux, Firebase, GenKit, Claude Anthropic AI, Material UI (MUI), Figma, HTML, CSS, Git, Github, Agile

Software Engineer, [100 Devs](#), Remote

Aug 2024 - Jan 2025

- Completed an intensive software engineering training program, developing full-stack web applications and gaining hands-on experience with real-world client projects.
- **Featured Client Project:** [V.Two](#): The official website for a software engineering consultancy.
- **Featured Personal Project:** [Everything-Friendly](#): A recipe generation app that uses AI to cater any online recipe to the user’s dietary needs. Includes authentication and a personal dashboard of saved recipes.
- **Featured Personal Project:** [MeanTime](#): A time-management app that syncs with multiple Google calendars and provides insights on time spent per calendar. Users can configure ‘target’ times per calendar and track their real-time progress toward daily and weekly goals.
- **Technologies Used:** JavaScript, TypeScript, React, Tailwind, Node.js, Express, MongoDB, Mongoose, Redis, Claude Anthropic AI, HTML5, CSS3, Git, GitHub, Figma

Consultant, Sparks Vacations, Newport Beach, CA

Jan 2023 - Aug 2024

Senior Talent Acquisition Advisor, Vercys, a West Monroe Company, Irvine, CA

Sept 2019 - Jan 2023

Technical Recruiting Manager, VincentBenjamin, Costa Mesa, CA
