COUNTERPICKS:

SET PROCEDURE

- 1. Players select their characters (Blind Pick)**
- 2. Players decide who will strike first**
- 3. Stages are struck in the 1-2-1 style. Players will take turns striking the starter stages above until a stage is chosen. The first player strikes one stage and the second player strikes two stages and the first player chooses from the two remaining stages.**
- 4. Players will inform the TO's that the set has begun via PM on Skype.**
- 5. Players begin the set.**
- 6. The winning player of the last match bans two stages from the full roster of stages (both starter and counterpicks). These bans are only chosen once and last the entire set.**
- 7. The losing player of the last match picks a stage. *You cannot choose a stage banned in the previous step or a stage you have already won on (unless agreed by both players).**
- 8. The winning player of the last match announces if a new character is being picked or if they are being the same.**
- 9. The losing player of the last match announces if a new character is being picked or if they are being the same.**

10. Match is played

11. REPEAT STEPS 6 - 10 UNTIL THE SET IS OVER

Remember, respect all players regardless of skill level. Some might be better than others, and that's okay. We are playing for fun.

In order for the tournament to move smoothly, we ask all players to please add the TO's on Skype so you can be notified on when your match is coming up, who won the match, and easy contact.
