

ISA structure for the Digital Salmon

We have adapted the definitions of terms in [ISA best practice](#) and [programmes and projects](#):

Programme = Overarching research theme ([The Digital Salmon](#))

Project = Research grant ([DigiSal](#), [GenoSysFat](#))

Investigation = a particular biological process, phenomenon or thing

(typically corresponds to [plans for] one or more closely related papers)

Study = experiment whose design reflects a specific biological research question

Assay = standardized measurement or diagnostic experiment using a specific protocol

(applied to material from a study)
