

Ryan Nolan

Software Engineer

Boston, MA | 781-742-5263 | RNolan19@gmail.com | <https://www.linkedin.com/in/ryan-nolan-dev> | <https://rnolan19.github.io>

SUMMARY

I'm a software engineer with a professional background in eCommerce. From 2015-2018, I ran an online sports apparel business, which I was able to grow from scratch to 30,000 customers. After discovering a love of coding while making changes to my online store, I decided to transition to a career as a software engineer. I have experience working as the primary front end developer for a startup and I am currently seeking a full-time, front end position.

SKILLS

JavaScript | React | HTML | CSS | SASS | Ruby on Rails | Python | Node.js | Express.js | AWS | Mongoose | MongoDB | SQL | PostgreSQL | Handlebars | jQuery | Bootstrap | Heroku | AJAX | PHP | GraphQL | Apollo |
