

GENERAL VALIDITY/RELIABILITY

Look at the website overall. Does it look professionally constructed or does it have lots of questionable features?

Can you find an author?

Are claims cited or linked?

Can you find an organization behind the website? (like a media outlet, a non-profit organization, a government, a university, etc)

Have you found similar information on other websites?

Have you run it through mediabiasfactcheck.org?

Does the URL make sense for the content of the article?

IF IT'S A USER REVIEW, BLOG, OR BIASED SOURCE:

Can you identify the bias?

Does the reviewer have anything to lose/gain if you use/don't use this new media platform?

Have you looked at reviews that represent another perspective?
