

How to get water skip consistently

It may be a little confusing in the video, but it's pretty simple

Step 1: go into the top right jet. Don't press any buttons when you get in the jet.

Step 2:

When you get out of the jet, press right slightly. Not so slightly that you're quickly rushing your finger across the right key. But not so much that you FEEL like it's too much of a press.

Step 3:

The second that you HEAR the pangolin hit this ledge hold left

If you did all those things correctly it should look something like this:
