

Vocabulary Chain

Look through your vocabulary words and think about how the words can relate to each other.

Choose 7 words and create a literal paper chain in which you write the word on one link, and an explanation on another. See model up front.

The connections between the words must be based on meaning, NOT things like: “They both have two “ee’s.”

Example of word chain (“vocab” words bolded):

Apple ---- This is a fruit and so is an
orange----**orange**----oranges are sweet and so are
cats----**cat**----cats have 4 legs and so do
horses----**horse**---
