

Nephiclav Animation ToS

This document lists the general 'Do's and 'Do-not's when asking for my work..

General Rules:

- I do not reserve commission slots before opening.
- I might approach you privately at *my* own discretion if you've expressed interest in a commission previously but did not get a slot.
- If I don't accept your trade or commission, please don't take it personally. My energy for animating is limited and I often can't take on a lot of dedicated work at one time.
- Any work I draw can be posted by you or anyone that was included in the animation at your discretion. If you would prefer I, personally, do not post it, please make that apparent early on.
- Please give direct, clear instructions for what you want. We can talk things over privately but I need to have a firm idea of who is moving in which way and what you want to see.
- You can request changes before the animation progresses, but please understand that once the first frame has been used to animate further frames, I have to make alterations to each and every individual frame afterwards. Changes after animating begins will be limited/refused depending on how difficult they would be to implement!
- When sending reference material for characters, links must go through Furaffinity to prove the character belongs to you. Not applicable to R34.
- I do NOT do surprise gifts except in situations where I know the person beforehand. If you link me to a ref of a character belonging to someone other than yourself, I WILL message them to ask permission and tell them of the subject matter of the animation.

Payment Rules:

- If multiple people are involved with the commission, please work out who will be paying for the animation and send me only ONE email address.
- Payment is not required until the first (and final, where applicable) frame is given to you and verified to be satisfactory. Animating after that will not begin until I have received payment.

What I will/won't draw:

- I am willing to draw most subject matters that have been posted previously to my Furaffinity and Twitter accounts, including NSFW works. If you're unsure, ask.
- I almost never draw female characters, but if you have something in mind and want to, ask.
- All characters MUST be adults, no exceptions.
- Complex backgrounds may be too difficult to include but can be discussed.
- Rule 34 (art of characters from popular media) must abide by previous rules and may still be turned down at my discretion.

If you read this far, good job! The secret answer is Fish!
