O.2 Retention rate of students is on the average.

The BSESS Program at BPSU Orani Campus maintains an average student retention rate across academic years. Institutional records and enrollment data indicate that while the program successfully retains a majority of its students from first to final year, there are observable fluctuations influenced by several factors such as financial constraints, personal circumstances, and shifting academic interests.

Despite these challenges, the program has implemented proactive academic advising, early intervention strategies, and mentorship initiatives to support student progression and minimize attrition. Faculty members, in coordination with the Guidance Office and Program Chair, conduct regular follow-ups and consultations with at-risk students, thereby fostering an environment that encourages academic persistence and holistic support.

In comparison with national and regional benchmarks for sports and exercise science programs, the BSESS retention rate remains within an acceptable range. Continuous monitoring and improvements in student support services are being carried out to further enhance retention and improve long-term student success.

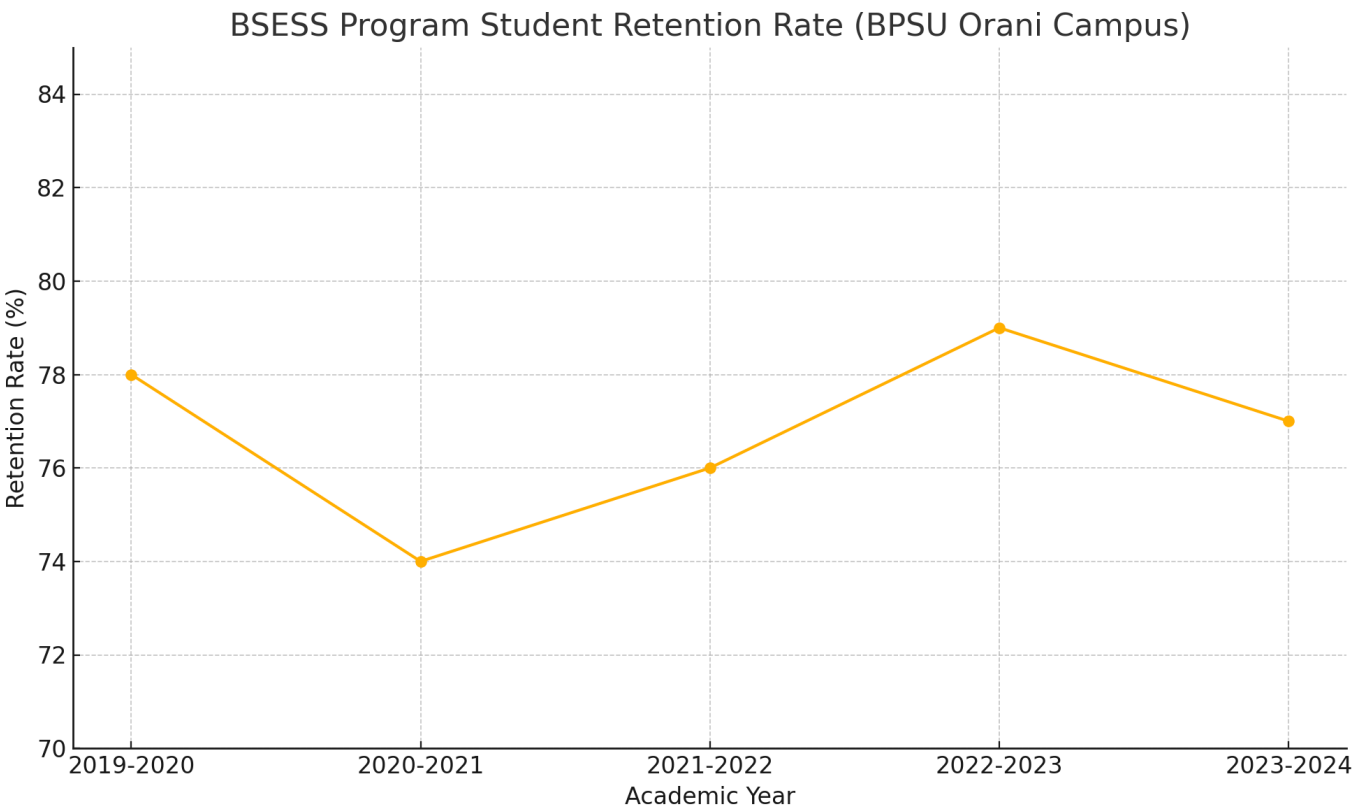

Here is the graphical representation of the student retention rates for the BSESS Program at BPSU Orani Campus across five academic years. The data reflects a generally stable trend, maintaining an average within the 74% to 79% range, indicating consistent student persistence with room for further improvement.
