If you have taken a video with your phone, you can get a floor plan!

It's Really THAT Easy

A common question that we get about FloPlan “how does it work?” That is a fair question, because most floor plan creation apps on the market still require manual measuring and drawing.

You don't need to be tech savvy, know how to properly measure, or the skill to draw a floor plan. Have you ever recorded a relative doing something you are proud of, or a friend doing something awesome? Most have at least hit the record button on their camera at some point. It's the same process with FloPlan. All you do is take a video of the property. That's it, it's that easy.

We Handle the Details

The FloPlan team just needs that video scan of the property and they handle the rest. Things like room dimensions, wall locations, room orientation, and appliance locations are all captured and taken into account when your floor plan is being processed.

The simplicity makes creating a floor plan a “no-brainer”.

Doesn't it? You or a listing manager stop at the property to view it. You or your photographer prep the home and take photos. Why not take a quick video walkthrough of the house to get a floor plan at the same time? It just makes sense!

Just grab your phone, hit record on the app, walk-through and submit. Within a day you will have a complete floor plan ready to directly to your listing with the push of a button!
