Experience

ChippAI

Sep 2024 - Present

Design Engineer

- Integrated ShadCN and standardized UI components, enhancing consistency and user experience across the application.
- Improved application responsiveness and efficiently addressed feature requests, contributing to a more dynamic and user-friendly interface.
- Developed strong task prioritization skills and effectively engaged in bug resolution, optimizing workflow and productivity.

Rabbit Hole

Oct 2024 - Present

Web Developer

- Developed and built out the user interface for the application, enhancing visual appeal and functionality.
- Proposed and implemented mobile views and new styling conventions, improving design consistency and user accessibility.
- Gained proficiency in context switching to JavaScript and working with Bootstrap and Apex Charts for effective UI development.

Nicer Studio

May 2024 - Oct 2024

Frontend Web Developer

- Worked on multiple design and development projects across several months
- Developed custom web components to enhance user experience.
- Collaborated with designers to implement responsive web designs.
- Delivered projects ahead of schedule, receiving positive client feedback.
- Improved project delivery times by optimizing development workflows.
- Projects include AH WholeYou (mobile app), CUEDin (career guidance for students in trade), and NEXUS (luxury resorts)

Seeded Strategies

July 2024 - Aug 2024

Web Developer

- Successfully delivered and deployed a fully functioning landing page, precisely matching the provided design specifications.
- Collaborated effectively with team members to resolve issues promptly, enhancing project efficiency and communication.
- Mastered the use of media queries within TSX files and adapted to working with diverse domain services, including unfamiliar platforms.

Purple Wren Digital

March 2024 - April 2024

Frontend Web Developer

- Developed and implemented a sign-up form with robust validation, ensuring data integrity and user-friendly interaction.
- Ensured styling consistency with the main page, enhancing the overall visual coherence of the website.
- Collaborated with teammates to optimize NotionDB usage and successfully created a sign-up form with full CRUD functionality.

Atlas Local

Jan 2024 - June 2024

Intern

- Conducted CMS and tech stack research for the Grok conference website, and developed a ticketing system using Vercel, Webflow, and TicketTailor, ensuring seamless user registration and information display.
- Designed an enhanced user experience for the AtLo website by creating detailed wireframes in Figma, improving navigation and usability.
- Strengthened communication skills with developers and gained proficiency in creating webhooks and navigating Figma and Webflow.

Education

Develop Carolina Apprenticeship

Jan 2024 - June 2024

Frontend Web Developer | UI/UX Designer

- Gained hands-on experience working for Atlas Local and other related tech agencies
- Managed three streams of work asynchronously - classwork, final project work, and internship work (with Atlas Local)
