Ten policies will be announced using the policy chart, write them in the first empty column

With policies recorded mark two policies you do not want to be in the "final four" with an X in column two

-you will earn 25 points for each X if that policy is not part of the government platform at the game end

Then assign a total of 100 points to a minimum of 3 and a maximum of 8 of the above policies

-the points you assign to each number must be more than 10 and no more than 80

-the object of the game is to match your party policies with the four policies chosen by the coalition, measured by the numbers

-the Adj. /100 is not used in the basic version
