²Department of Yyy, Yyyy University, Kyoto, Japan
(Tel : +81-3-000-0000; E-mail: hanako@yyyy.ac.jp)

Keywords: Selected keywords relevant to the subject.

1. INTRODUCTION (THE SECTION HEADERS CAN BE OMITTED.)

This template provides a sample format for final manuscripts of SWARM 2024. It also provides instructions to authors for completing the final manuscripts that will be included in the conference program booklet. This template is available only for abstracts (NOT peer-reviewed, NOT included in the symposium proceedings).

2. PAPER SIZE AND FORMAT

The size of the manuscript must be A4. Abstracts are limited to 2 pages and can report on previously published work with the expectation of offering new viewpoints on that work. Each abstract must be divided into two parts. The first part includes the title, authors' name, and keywords. The second part is the main body of the paper. Do not put page numbers in the manuscript.

Left margin	20mm
Right margin	20mm
Top margin	25mm
Bottom margin	25mm

Submitted papers MUST BE in Portable Document Format (PDF). NO OTHER FORMATS WILL BE ACCEPTED. The size of the PDF file to be sent electronically should not exceed four megabytes (4 MB).

3. FONTS AND STYLE

3.1 First part

The first part includes the paper title, authors' name, abstract, and keywords, all of them in Times Roman or similar font. The font size of the title, authors' name, affiliation, and keywords are bold 12pt, 11pt, 10pt, and 10pt, respectively.

3.2 Paper body

The second part consisting of the body of the abstract must be edited in single-column format. The top-level heading, usually called section, numbered in Arabic numerals, shall appear in the left on the page with Times Roman capital bold 11pt. The numbered level-two heading starts from the left in Times Roman bold 10pt font. Section headers can be omitted. The main text uses Times Roman 10pt font with single spacing. The first line of a new paragraph is indented by 4mm.

4. EQUATIONS AND REFERENCES

4.1 Equations

Equation numbers should be Arabic numerals enclosed in parentheses on the right-hand margin. They should be cited in the text as, for example, Eq. (1), or Eqs. (1) to (3). Equations start from the left of the column. Punctuate equations with commas or periods when they are part of a sentence. For example,

$$\dot{x} = Ax + Bu, y = Cx + Du, \quad (1)$$

where x is the state vector.

4.2 References

References should appear in a separate bibliography at the end of the paper, with items referred to with numerals in square brackets [1, 3-5]. Times New Roman 10pt is used for references.

[†] Taro Mure is the presenter of this paper.
