

Onboarding the Ambassador Program

<:SNETLogo:912292628731670588> Welcome to the SingularityNET Ambassador Program

The SingularityNET Ambassador Program is dedicated to growing awareness of the importance of decentralized AI/AGI and the SingularityNET ecosystem. Through the program, we aim to provide structure and rewards to community members who are committed to contributing towards a beneficial AGI. For background information on the SingularityNET Ecosystem, see <https://singularitynet.io/ecosystem>

Our main drivers are transparency, decentralization, and involvement. To uphold these values, community members are fully involved in decision-making processes, including how tokens are spent. This is achieved through regular Ambassador Town Hall meetings, which are open to all members of the community.

([Welcome video](#))

Here's a step-by-step guide to help you kickstart your journey into the Ambassador Program.

Step 1: Join Our Discord Server

If you haven't already, join our Discord server.

Step 2: Fill in this form to express your interest in becoming an Ambassador:

https://docs.google.com/forms/d/e/1FAIpQLSd3EKjCONzpnrgm7g2latLg_eFpfRjYRoAEr7TzPrx5HfEsPw/viewform

Step 3: Attend Ambassadors' Town Hall Meetings

Join us every Tuesday at 18:00 UTC on Zoom, for the main weekly get-together for anyone interested in the Ambassador program. Here, you can get the latest program updates and connect with Ambassadors. If you only attend one meeting in the week, make it this one! The link is in our Calendar:

<https://calendar.google.com/calendar/embed?src=singularitynetambassadors%40gmail.com>

You can add Calendar to your Google Account from Bottom right corner

Step 4: Sign Up on Dework and complete the Introduction task

Head over to [Dework](#) and sign up (here's a [video](#) on how to sign up and use Dework), and complete the [introduction task](#). Remember to submit your Cardano native wallet address through the form embedded in the task - this is used for distributing rewards for completed tasks. Please be aware that this links your wallet address with your Discord name in a relatively public way. To protect your privacy, you might want to create a new wallet, which only has

Ambassador Program transactions in it, and submit that. If you need help on how to create a wallet, please see here <https://instance-dework-pbl.vercel.app/course/module/101/1015>

Step 5: Get involved with Workgroups and Guilds

Participating and contributing in Workgroups and Guilds is how you work towards becoming an Ambassador. You can be part of as many workgroups/guilds as you want. To become part of a workgroup, simply start attending its meetings (see our calendar here <https://calendar.google.com/calendar/embed?src=singularitynetambassadors%40gmail.com&ctz=UTC>). You can also go to the group's Discord channel and join the conversation; and you can take on Dework tasks that the group posts. And remember, you can provide anonymous feedback about the groups and about the program in general, using this form <https://forms.gle/Lvkafk7ZB8xzcgQq7>

Weekly Meetings Calendar:

Add this to your own Google calendar, to have the times and Zoom links of all the Ambassadors' meetings:

<https://calendar.google.com/calendar/embed?src=singularitynetambassadors%40gmail.com>

Guilds and Workgroups: what they all do!

Education Guild

In process of figuring out what could we be educating ourselves

Gamers Guild :

Gamers guild helps to educate and onboard community members through gamification, conduct gaming sessions for community members, and cover gamified projects launched by SNET through educational workshops.

Marketing Guild

Members of the marketing guild are working on Ambassador program media and outreach. Related workgroups are Writers, Video and Translation workgroups.

Writers' workgroup

A group for those interested in writing text for the Ambassador program. There is a tiered structure for contributions, and you'll need to pass a skills test to be able to take up Writers' Group bounties.

Video workgroup

This group produces videos for the Ambassador program, and manages video content.

Translation workgroup

This group translates SNET ecosystem articles into various languages for the community.

R&D Guild

This guild aims to gather builders from the community. Software Engineers, Researchers, Data Scientists, Analysts overall anyone willing to contribute and build products, and solutions to benefit the community.

Process Guild

This guild includes members from Knowledge Base Workgroup and Dework PBL Workgroup. Process Guild helps to establish processes and prioritize Ambassador Program activities.

Knowledge Base Workgroup

Organizing and creating an Ambassador Program knowledge base.

Dework PBL Workgroup

Creating project-based learning materials about Dework on the Andamio platform, in collaboration with Gimbalabs and Governance Guild.

Strategy Guild

A group to discuss strategy for the Ambassador program on a visionary or 10,000 foot level..

Treasury Guild

This group is about the Ambassador program rules around budgets, payment of completed tasks and anything related to financial activities.

Archives Workgroup

This group maintains a record of Ambassador Program meetings, and explores how we can use LLMs (large language models) to make records searchable.

Governance Workgroup

This group discusses governance issues for the Ambassador program, such as how we make decisions, how we reward contribution, how we decentralize, and how we ensure inclusion.

Onboarding Workgroup

We work on how to onboard new people into the Ambassador program. Everyone's welcome - especially if you have, or would like to learn, skills in community engagement.

FAQ

Q: **How do I become an Ambassador?**

A: Getting involved with WorkGroups and Guilds is how you work towards becoming an Ambassador.

Q: **What kinds of tasks can I get involved with?**

A: You can find various tasks on Dework - they include things like making videos, facilitation, documenting etc. You can also start a new workgroup if you have ideas for how to improve the Ambassador Program.

Q: **How can I find a task?**

A: It varies from workgroup to workgroup. Most of the time tasks are assigned in the meeting or through discussions in the Discord channels. To learn about how to apply for Dework tasks, see the video

https://drive.google.com/file/d/1YgdsBKEkCV3VGhCtT7hpD5o-PeJl6Rhm/view?usp=drive_link

Some Workgroups provide bounties that you can apply for on Dework.

Q: **How long does it take to become an Ambassador?**

A: There is an expectation that new members engage in workgroups for several months before being considered for the ambassador role

Q: **What wallet to use?**

A: It is advisable to use Cardano native wallets like Eternl, Nami, Typhon wallets, etc rather than using the likes of Trust wallet or Metamask. Also, with a wallet like Eternl, users can create an address book of recipients and up to 24 accounts from the exact mnemonic phrase. If you need help with how to create a wallet, see our guide here

 [Step by Step Guide: Create a Wallet on the Cardano Blockchain](#)

Q: **How do I get rewarded?**

Once you submit a completed task, it will be reviewed and audited before being paid out in AGIX. You will be rewarded for completing tasks each week on Tuesdays.

Kindly submit a Cardano wallet address by filling this form:

<https://forms.gle/cxjPBEMH6AEYuLnRA> if you haven't done so already.

Q: **What are Gimbals?**

A: A Gimbal (GMBL) is a token, originally created by Gimbalabs (<https://www.gimbalabs.com>) in the Catalyst ecosystem.

Although it can be traded on DEXs like any other token, it has no direct fiat value. Instead, it is used to track participation and engagement. Tasks such as meeting attendance can be

rewarded with Gimbals; then the number of Gimbals that someone holds can be a measure of how much they have engaged.

In SNET, each taskpoint in Dework is worth 100 GMBL. See our Dework PBL (Project-Based Learning) for more info on how we use GMBL to track participation:

<https://andamio-andamiojs-starter-lms-git-governance-g-1b84f0-gimbalabs.vercel.app/course/module/201/2018>

Q: What are MINS?

The MINS tokens are created by Singularity Net Treasury Guild to track the minutes allocated to each task on dework and capturing the minutes on chain by sending these MINS tokens out with every reward distribution.
