

Submitted to the school principal

Introduction

The Student Union recently conducted a survey to find out what students think about the school tuck shop. A total of 324 S1 to S6 students completed a questionnaire on our school website.

Findings

Regarding the survey findings, 45.1% of the respondents (140 students) reported that they purchased food from the school tuck shop at least five times a week and 35.5% of the respondents (115 students) reported that they purchased food from the school tuck shop at least three to four times a week. 17.9% of the respondents (50 students) reported that they purchased food from the school tuck shop at least one or two times a week and 1.5% of the respondents (5 students) reported that they never purchased food from the school tuck.

Students rated the food varieties offered and the nutritional value of the food at 1.4 and 1.9 respectively on a 4-point scale. The respondents rated the quality of service and taste of the food and drinks at 3.5 and 2.1 respectively on a 4-point scale.

Conclusion

Overall, the findings show that our students are not satisfied with the nutritional value of the food that is offered by the tuck shop.
