**This document contains subjects of sexual violence, sexualizing minors, and sexualizing animals.**

## **Sanitized Documentation of ColonolNutty's Acts**

### **Sanitized Version**

This is a brief documentation of **ColonolNutty's** long past in pedophilia communities, working to create pedophilia, bestiality, and rape themed mods using other content creators work without their consent. The focus of this document is to address the source and legitimacy of these claims and why **ColonolNutty** is portrayed as a malicious individual in The Sims community.

## **Summary (tl;dr)**

ColonolNutty is an individual who developed modifications for The Sims 4 which allow raping children and animals. Seemingly unaware that his actions have consequences that affected his reputation forever and attempting to play the victim by claiming that his past actions shouldn't matter anymore or that they aren't relevant because in his mind he changed.

ColonolNutty started modding The Sims 4 on a pedophilia themed forum, taking over the development of a child and animal raping mod while claiming he was doing it for himself, but ultimately sharing it with others. He continued to expand the mod for the next year until pressure started to grow from outside communities targeting him for creating pedophilia themed content. In response, he separated parts of his mod to begin sharing rape and bestiality themed content elsewhere to gain a bigger following, letting the pedophilia themed content to be supposedly handled by someone else.

Since departing from pedophilia themed content, ColonolNutty continued to develop rape and bestiality themed content for the next 4 years and is still active to this day. Throughout this period of time, he plagiarized the content of my mods, attempted to manipulate me, apologized for plagiarizing, defamed the name of my mods, plagiarized the content of my mods again, villainized anybody who opposed his behavior or content and eventually ended up being recognized as an untrusted, banned, and rejected content creator in the Sims community. This is why I would never want to be associated in any way with this individual.

## **DISCLAIMERS**

- The "WickedWhims" mod and its creator "TURBODRIVER" are in **NO WAY** involved with and **DO NOT** endorse the creation of pedophilia, bestiality, or rape content of any kind.

- The “Nisa’s Wicked Perversions” mod and its creator “Nisa K.” are in **NO WAY** involved with and **DO NOT** endorse the creation of pedophilia, bestiality, or rape content of any kind.
- This is the sanitized version of the document for sharing publicly that has the links to questionable and adult websites removed.
- In case image hosting fails to load, use this [Google Photos album](#).
- This document is meant to share information, please do not harass anybody.

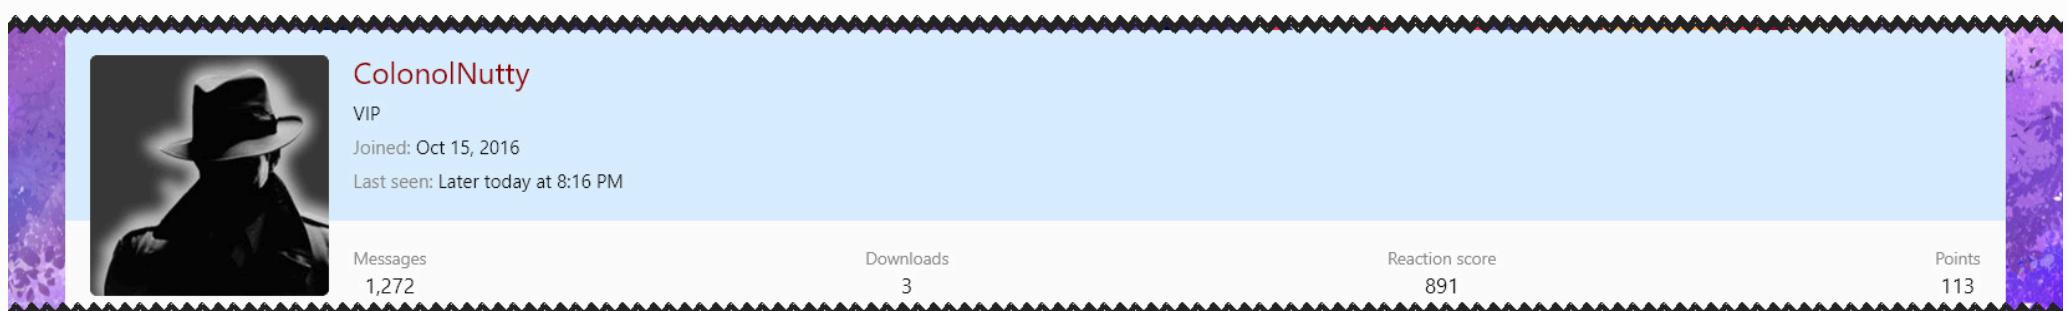

Consider disabling the **Print Layout** mode for a better viewing experience.

## June 21st, 2018

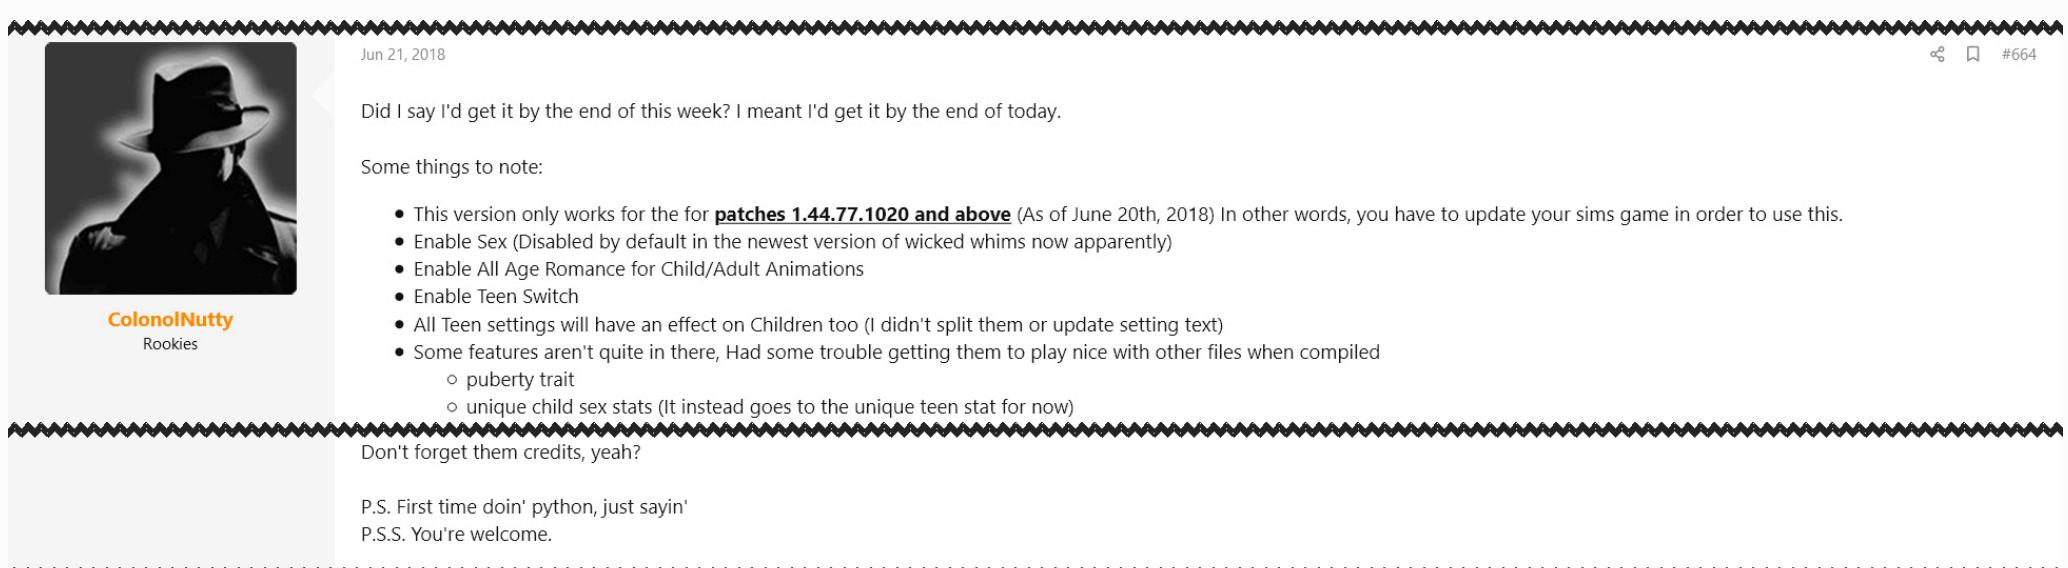

ColonolNutty gains interest in helping develop pedophilia, bestiality, and rape mods on AllTheFallen.

ColonolNutty joined the pedophilia themed forum known as AllTheFallen\* (ATF) on [October 15th, 2016](#)<sup>[1]</sup>. After being involved with AllTheFallen for almost two years, he eventually found interest in modding The Sims 4.

[1] [imgs/2019\\_02\\_28\\_cn\\_profile.png](#) (ColonolNutty joined on October 15th, 2016)

With the preparation for the release of the Seasons Expansion Pack for The Sims 4, a lot of the mods broke due to major changes in the game code. This caused pedophilia and bestiality themed mods to break as well, with the original creators uninterested in continuing them, but due to the involvement of ColonolNutty, they were fully operational after two days.

[2] [imgs/2018\\_06\\_21\\_cn\\_start.png](#) (ColonolNutty fixes and shares pedophilia mod)

As **ColonolNutty** [states](#)<sup>[2]</sup> “First time doin’ python, just sayin” which indicates his start with modding The Sims 4. His active participation on the AllTheFallen forum since 2016, before getting involved with modding The Sims 4, indicates his interest in pedophilia themed content and his desire to support this type of content.

\*AllTheFallen (ATF) is a community dedicated to discussing, sharing, and creating pedophilia and rape themed content.

## June 29th, 2018

ColonolNutty officially begins the development of pedophilia, bestiality, and rape mods on AllTheFallen.

Initially introduced by the **Alec15** user, the pedophilia and bestiality mod, known on the AllTheFallen forum as “WW.lol”, allows raping of toddlers, children, and animals in the game. On [June 29th, 2018](#)<sup>[1]</sup>, the “WW.lol” mod was fully taken over by **ColonolNutty** and renamed to the “WW.CNlol” mod. The information posted on [September 15, 2018](#)<sup>[1]</sup>, at the KiwiFarms\* (KF) forum, shows that **ColonolNutty** was involved in allowing the mod to continue existing and took the lead on the development of the “WW.CNlol” mod.

**GOT AN ISSUE? TRY THE TROUBLESHOOTING STEPS FIRST BEFORE POSTING!****This thread is for all [Sims 4] WhickedWhims content releases after the Seasons Patch (June 18th, 2018).**Awesome original content by:  
TURBODRIVER (Author of vanilla WW)  
Alec15 (Author of WW.lol 122b)

## Credits:

- Angeldelilith for the Bulge, default Toddler/Pet animations, penis models, and rigs
- ColonolNutty (me) for fixing, updating, and adding to WW.CNlol
- Heartsore Brom for the Animal Penis models

**Features**

- Animation Support:
  - Child animations.
  - Toddler animations.
  - Pet animations (Dogs, Cats, both Child and Adult pets)
- For a child/toddler to get pregnant, you have two options:
  - Buy the **Precocious Puberty** trait from the Trait Rewards Store for the child or toddler you want pregnant (*Toddlers can't access the trait rewards store, so you only have the below option*)
  - For children
    - Enable the setting (Wicked -> Settings -> Child/Toddler/Pet Settings -> Child Settings -> Child Pregnancy) this will enable all children to become pregnant regardless of having the trait or not
  - For toddlers
    - Enable the setting (Wicked -> Settings -> Child/Toddler/Pet Settings -> Toddler Settings -> Toddler Pregnancy) this will enable all toddlers to become pregnant regardless of having the trait or not
- Change Custom Gender Settings for all Ages using an interaction (It does the same thing as what CAS does)
  - Wicked -> Settings -> Custom Gender Settings
- Strapon Picker (Allows picking a strapon on the fly, without having to go into CAS)
  - Wicked -> Settings -> Change Strapon
- Object Picker (Allows adding or removing accessories/cas parts on the fly)
  - Wicked -> Settings -> Change Objects
  - To add new meshes, straps, underwear, and whatever cas part you can think of see the *WickedWhimsMod/cncas\_parts* folder for more example files, this is unlike how vanilla wicked whims does it.
    - If you have questions, definitely ask them here in the thread or PM me (ColonolNutty).
- To enable Adult Pet/Child Human sex, All Ages Romance must be enabled (Relationship Settings -> Romance Age Restriction Settings)

Hey Nutty

Thank you again for picking up the project, after it was no longer functional.  
You really came right in time, to keep the fire burning!

Great to have this new thread and again control over the OP.

This should, at least in theory, reduce the amount of complaints from people,  
only getting updates from it and then requesting an update of Alec's obsolete version.

Click to expand...

It's a good thing I decided to try and update the mod weeks ahead of the season patch. (Not because of the patch, but because I wanted all the features of 129c) It was really just for selfish reasons, I wasn't planning on releasing it. Then the patch came out and here we are.

[1] [imgs/2018\\_06\\_29\\_cn\\_begins.png](#) (ColonolNutty states personal preference towards pedophilia and bestiality themes)

This properly began the journey of **ColonolNutty** into modding The Sims 4, and his work primarily involves pedophilia, bestiality, and rape themes. As **ColonolNutty** states<sup>[1]</sup> “*It's a good thing I decided to try and update the mod ... It was really just for selfish reasons, I wasn't planning on releasing it.*” indicating his personal preference towards pedophilia and bestiality themed content.

## September 28th, 2018

ColonolNutty's major involvement in the development of pedophilia and bestiality mods on AllTheFallen.

After three months of developing the "WW.CNlol" mod by **ColonolNutty**, the community on AllTheFallen got established and organized around his work. As the [update on the AllTheFallen wiki](#)<sup>[1]</sup> states, **ColonolNutty** is the "*Major WW developer*", which by "WW" it refers to the "WW.CNlol" mod.

Primary Mods						
Title	Description	Type	Author	last ver.	Status	
WickedWhims(WW.CNlol) 	Primary Mod, enables woohooing for children, toddlers, and pets.	Primary	ColonolNutty	3.3.4.133b-v4.x.x	Working	
WW Animations Fix 	Fixes the stretches in the main WW interactions.	Primary	Alec15/Jens85	1.0	Working	
Improved Penis mesh (Rigged) (includes Tongue) 	Replaces the original EA child rigs adding bones for the Shota penis / loli breast / vagina / tongue and extras.	Primary	Angeldelillith	1.4(Fixed)	Developing	

Participants						
• Alec15	Old WW developer.					
• Jens85	Tester.					
• Tomcat	Animator, stuff designer, tester.					
• Zanny	Stuff designer, tester.					
• Angeldelillith	Animator, Stuff designer, tester.					
• ColonolNutty	Major WW developer, coding

## October 4th, 2018 - December 24th, 2018

ColonolNutty evolves his mods, expands to LoversLab, and I meet him for the first time.

On [October 4th, 2018](#)<sup>[1]</sup>, **ColonolNutty** sends me a direct message on LoversLab\* (LL) asking for access to the WickedWhims mod source code. I declined, as I would never want to be associated with the kind of content he was creating. Knowing that this kind of content would always be made by someone no matter what you do, I had no reason to begin a discussion and politely dismissed it to stay away.

ColonolNutty

Started conversation: October 4, 2018

...

I'm sure you've heard it by now, that I have been developing a sort of "addon" for wicked whims.

I've added WW support for quite a few things, such as Pets and Occult to name a couple.

I've even added interactions and features such as an Object Equip System, Custom Gender Settings, a Strapon/Vagina/Breast Selector as well as made it easier for modders to add their own cas parts without having to modify the WW cas parts file directly.

I've recently heard about the Python updates from 3.5 to 3.7 that are coming in the near future and would like to finally (better late than never) reach out to you and ask if you would give me the honor of having access to the WW source code.

A couple rules I will be happy to follow:

1. The source code will not be available for the public (Not even seen by them)
2. I can give you access to the github repository where I keep my modifications, if you request it
3. Any other rules you can think of

However, I will not be removing any of the currently added features within my addon. I like to keep an open mind about what goes into my mods. Putting my own personal bias aside for the community as a whole.

I hope we can come to an understanding. I am sure the community as a whole will be grateful for it as will I.

+ [Quote](#)

TURBODRIVER

Replied: October 4, 2018

...

I've never heard of you or what you did, but hello.

Looks like you managed to make quite a lot of edits to my crappy code, quite impressive. Makes me think that it's not as bad after all 😊

When it comes to any code sharing, I have to unfortunately say no, sorry. I understand your open-mindedness, but you have to understand where my limits are too. Anyway, have fun with your work!

[1] [img/2018\\_10\\_04\\_cn\\_help\\_plead.png](#) (ColonolNutty asks for help on LoversLab)

On [December 3rd, 2018](#)<sup>[1]</sup>, **ColonolNutty** promises to publish his mods on the LoversLab forum, with an exception. As he states "*If you want those questionable portions of the mod, they will be available at the same place as always on the site that shall not be named ...*" which is referring to the AllTheFallen forum and is an invitation for the LoversLab forum users to acquire pedophilia themed mods. At this point, his actions made the LoversLab forum users and the general Sims community aware of **ColonolNutty**'s involvement in the creation of pedophilia themed mods.

ColonolNutty Posted December 3, 2018 #149 •••

Mega Poster 

For you LL folks:  
Alright, here is my plan for the future. Once I figure out how, I will upload the base CN WW mod alongside a Zoophilia module to LL. Excluding the questionable portions of the mod.

For you non LL folks (Ignore if you're squeamish!):  
If you want those questionable portions of the mod, they will be available at the same place as always on the site that shall not be named \*queue voldemort meme\* as modules that can be inserted into the base mod mentioned above (No I will not give you a link, find it yourself).

Members 3,498 posts

Doing the above, everyone can be happy! Yay! If you don't agree to that, then ya'll can do without zoophilia for now!

Edit: In the mean time, I'll be putting this plan into action. Hopefully I can get it done before the end of this week.

[2] [img/2018\\_12\\_03\\_cn\\_prepared\\_for\\_ll.png](#) (ColonolNutty invites LoversLab users to AllTheFallen)

With growing popularity at the AllTheFallen forum and the rising interest at the LoversLab forum, **ColonolNutty** moved to the LoversLab forum on [December 7th, 2018](#)<sup>[3]</sup>, to post his first mod to a wider public, the "CNWW" mod, which featured kidnapping and rape themed content.

What was initially known as the "WW.CNlol" mod has evolved into a new mod named "CNWW" and 4 separate mod modules known as:

- [CNWWToddlerModule](#)<sup>[4]</sup> (raping of toddlers)
- [CNWWChildModule](#)<sup>[5]</sup> (raping of children)
- [CNWWChildPetsModule](#)<sup>[6]</sup> (bestiality with young animals, added on January 2nd, 2019)
- [CNWWPetsModule](#) (bestiality, primarily available on LoversLab)

# March 10th, 2019

ColonolNutty's issues from spreading pedophilia and bestiality mods.

Since the evolution of the "WW.CNlol" mod to the "CNWW" mod and its modules, as well as the move to the LoversLab forum, **ColonolNutty** continues his development and support of his mods on AllTheFallen. The topic that was originally known by the name "*[Sims 4] WhickedWhims - Seasons and above*" has been renamed to "*[Sims 4] WhickedWhims - Child, Toddler, and Child Pet Modules*" in early December 2018, and later to "*[Sims 4] CNWW - ATF Modules*" in early January 2019.

Forums > Creative Corner > Game Modding > Mod Releases >

Later today at 4:21 PM

For those want it, there is an All In One installer provided [here](#)

This thread is for discussing ATF modules for the CNWW mod as well as providing support for those developing for CNWW

All modules REQUIRE the [Main mod](#) from Lovers Lab.

**Known Modules:**

- Pets Module
- Child Module
- Toddler Module
- Child Pet Module (Requires Pets Module and Child Module)

**FAQ**

- Where do I find more Child/Toddler animations and stuff?
  - You can find animations and more on the wiki, which is found [here](#)
- I want to give you money, how can I do that?
  - I have opened a [patreon](#) account where you may donate to me.

[1] [imgs/2019\\_03\\_10\\_cnww\\_atf\\_archive.png](#)

In late March 2019<sup>[2][3][4]</sup>, **ColonolNutty** was banned on the LoversLab forum due to posting pedophilia themed imagery, links to pedophilia mods, and mentioning directly or indirectly the AllTheFallen forum. The ban was lifted in April 2019. Issues with the LoversLab staff can be further confirmed as early as May 2019 through a message **ColonolNutty** left on his profile which [states](#)<sup>[5]</sup> "*Mod authors, please update your mod descriptions with the SimFileShare link when you discover them. I cannot provide them here for the possibility of incurring further wrath from the moderators.*", which instructs users to share pedophilia and bestiality themed mods from AllTheFallen through the usage of external hosting websites like SimFileShare\*.

\*SimFileShare (SFS) is a file hosting service dedicated to the Sims community and a commonly used way to share mods, which includes the mentioned rape, bestiality, and pedophilia mods. **The SimFileShare website itself is not directly associated with ColonolNutty or the AllTheFallen forum.**

# April 20th, 2019 - July 20th, 2019

ColonolNutty hides his involvement with AllTheFallen.

On [April 20th, 2019](#)<sup>[1]</sup>, the user **HARKI** was titled the developer of the “CNWWChildPetsModule”, “CNWWChildModule”, and “CNWWToddlerModule” mod modules for the “CNWW” mod, allowing **ColonolNutty** to begin hiding his contributions to the pedophilia themed mods, although the “CN” acronym stayed unaltered.

On [April 27th, 2019](#)<sup>[2]</sup>, a new topic named “[Sims 4] ATF WW Mods” was created for pedophilia themed mods led by the user **HARKI**. The original “[Sims 4] CNWW - ATF Modules” topic instead focused on the “CNWW” mod and the “CNWWPetsModule” mod module, further hiding **ColonolNutty**’s contributions to the pedophilia themed mods.

Primary Mods						
Title	Description	Type	Author	last ver.	Status	
CNWW	Primary Mod, the base Framework for Wicked Whims module support. (Required for all modules)	Primary	ColonolNutty	4.3.5.140c-v11.x.x	Working	
CNWWPetsModule	Primary Module, enables Wicked Whims for pets	Primary	ColonolNutty	v3.x.x	Working	
CNWWChildPetsModule	Primary Module, enables Wicked Whims for pets	Primary	HARKI	v3.x.x	Working	
CNWWChildModule	Primary Module, enables Wicked Whims for children	Primary	HARKI	v3.x.x	Working	
CNWWToddlerModule	Primary Module, enables Wicked Whims for toddlers.	Primary	HARKI	v3.x.x	Working	
Tongue + Penis Meshes	Rigged penis, tongue meshes needed for animations.	Primary	Angeldelilith	2.0.2	Working	

[1] [img/2019\\_04\\_20\\_harki\\_dev.png](#) (HARKI becomes the supposed developer of pedophilia mods)

From April 20th, 2019, to [May 1st, 2019](#)<sup>[3]</sup>, **ColonolNutty** was still actively developing the “CNWW” mod including the mod module “CNWWPetsModule”, and publishing it on the AllTheFallen forum. Since [May 1st, 2019](#)<sup>[3]</sup>, the “CNWW” mod and “CNWWPetsModule” mod module were only available on LoversLab.

**ColonolNutty**’s activity on the LoversLab forum since the beginning of 2019 brought more attention to his person which led users of the LoversLab forum, the general Sims community, and outside communities, to discover his involvement with the AllTheFallen forum and the creation of pedophilia themed mods.

On [July 20th, 2019](#)<sup>[4]</sup>, all of **ColonolNutty**’s development towards the “CNWW” mod and its modules has been erased from the AllTheFallen forum, including his account.

It wasn't the people from LL that didn't want him there or something. He left because members of Kiwifarms spammed him with threats and hate messages for developing mods that sexualize children and toddlers. They went as far as doxing him (stalking and finding real identifiable information, like where he lives and such). That's why he abandoned these modules and handed them to me, being the only one had also contributed to the code in the past. Moving to LL was also a difficult task because obviously they knew he had made these pedophilia mods as well, but once we managed to convince them that no pedophilia content would be uploaded to LL and that he did not manage these mods anymore, they let him upload CNWW and his other modules there. He moved to LL because they have a bigger community when it comes to WickedWhims and TS4 modding, and a lot of animators, and he wanted more animators to create animations for the Pets module, some that **preferably** weren't child x pet animations, because that's all we would have gotten if the only animators doing animations for pets would have been animators from ATF.

Last edited: Aug 30, 2019

[5] [img/2019\\_08\\_30\\_cn\\_wipe\\_reason.png](#) (HARKI explains the supposed reason for ColonolNutty departure from AllTheFallen)

On [August 30th, 2019](#)<sup>[5]</sup>, a post was sent by user **HARKI** that claims the reason for **ColonolNutty**’s departure from the AllTheFallen forum and erasing of his involvement with pedophilia themed mods. According to the current developer of pedophilia themed mods taken over from **ColonolNutty**, it was caused by further antagonization of his person due to his involvement in the creation of pedophilia themed content. As **HARKI**

states “He left because members of Kiwifarms spammed him with threats and hate messages for developing mods that sexualize children and toddlers. They went as far as doxing him ...” and “Moving to LL was also a difficult task because obviously they knew he had made these pedophilia mods ... but once we managed to convince them ... that he did not manage these mods anymore ... they let him upload ...” which indicates that **ColonolNutty** left due to pressure from outside communities and not from a change in character.

## August 23rd, 2019

ColonolNutty gets a slap on the wrist on LoversLab for plagiarizing code.

On August 23rd, 2019, the LoversLab forum moderation staff received a report that the “Sims 4 Community Library” file is made entirely out of plagiarized code from the WickedWhims mod library. The moderation immediately reacted and removed the file from their site, subsequently informing **ColonolNutty** of the plagiarizing offense. This prompted **ColonolNutty** to take immediate action to remove the “Sims 4 Community Library” GitHub code repository and the file from the LoversLab forum which contained the plagiarized code, therefore hiding the evidence. The evidence<sup>[1]</sup> of the plagiarizing offense was provided to the LoversLab moderation staff, but the case was dismissed because the original file and GitHub code repository were deleted by **ColonolNutty** before the inspection by LoversLab administration.

**Sims 4 Community Library Revamped**

**ColonolNutty** Started conversation: August 30, 2019

I apologize for mistakenly uploading content that was considered plagiarism by yourself.

To rectify this and help better our relationship, I have enacted a plan. In order to avoid future mod theft claims from your good self, I would appreciate it if you would work alongside the creation of The Sims 4 Community Library. This way if/when things get close to becoming plagiarism or you have some better ideas of how code could be written, you can catch it ahead of time and I will be able to swiftly correct the problem files/code. The other benefit is that you can help drive the course of The Sims 4 Community Library and I could provide functionality that you may utilize within Wicked Whims or any of your other mods in the future.

[2] [imgs/2019\\_08\\_29\\_cn\\_confronts\\_removal\\_of\\_s4cl.png](#)

On August 30th, 2019, **ColonolNutty** admitted to plagiarizing code from the WickedWhims mod, claiming it was a mistake although the evidence<sup>[1]</sup> indicates that the entire library was an exact copy of the WickedWhims library code.

# September 13th, 2019

ColonolNutty appropriates the WickedWhims mod name.

On [September 13th, 2019](#)<sup>[1]</sup>, **ColonolNutty** renamed his CNWW mods to “Wicked Whims Pets” and “Wicked Whims Kinky” which prompted me to message him about this. After refusing to change the names to something not containing the “WickedWhims” name he continued to manipulate me, demanding I alter the MCCC Discord server rules and the opinion of staff about him and his mods<sup>[2]</sup>.

*Using the “WickedWhims” name by ColonolNutty was a malicious act of defamation, as I had no intent of being associated with ColonolNutty or the questionable content he was making.*

**Mod Names**

**TURBODRIVER** Started conversation: September 13, 2019

Hey. I need you to rename “Wicked Whims Pets” and “Wicked Whims Kinky” to not contain “WickedWhims” or “Wicked Whims” in their name. I don’t need people coming to me with issues of your mods thinking it’s my problem. Thanks.

+ Quote

**ColonolNutty** Replied: September 13, 2019

Sorry champ, can’t do that. People come to me with problems unrelated to my mods as well. Just have to learn to deal with it. Start reporting people if you don’t appreciate them bringing their problems to you. That’s what I do.

# October 5th, 2019

ColonolNutty’s apology for plagiarizing code.

ColonolNutty Started conversation: October 5, 2019

Hello TURBODRIVER,

I would like to officially apologize for uploading plagiarized content based off of your work earlier. I made it fairly clear that I attempted to take credit for all of it. Yet, it was Wicked Whims internals and essentially your blood, sweat, and time that I basically stole from you. I’ve learned so much about coding with Python and working with the Sims 4 code because of Wicked Whims itself. I pretty much owe most if not all of my knowledge to you. You are a tremendous modder, with dedication I have yet to see from other communities. You deserve my respect for all you have done for me. I don’t expect you to forgive me for what I’ve done, but I hope this apology at the very least brightens your mood in some way.

[1] [imgs/2019\\_10\\_05\\_cn\\_apology.png](#) (ColonolNutty apology for plagiarizing code)

On [October 5th, 2019](#)<sup>[1]</sup>, **ColonolNutty** sent me a direct message, apologizing for his offense of plagiarizing code from the WickedWhims mod. **ColonolNutty**’s repeated offense of plagiarizing code after this incident indicates that this apology was not genuine and was only an attempt to ease the situation.

*This was a very disrespectful action towards me which initiated a hostile environment that was only worsened by*

**ColonolNutty's involvement with pedophilia, bestiality, and rape themed content before this. His next actions solidified his reputation as a liar, manipulator, and fraud.**

### Request for some code changes

I wish only to make this community better, yet so far I've been met with only disgust and disdain from mod authors and there are some who even see fit to spread complete lies about me and what my mods contain.

Continuing to treat me and my mods with such disrespect further dampens the relationship that I'm trying to repair and build with you. Hell, I already support you for the maximum amount of money on Patreon, I am deserving of at least some respect in this regard.

5 minutes ago, TURBODRIVER said:

I just don't like some of the things you do and how you do them, but who am I to tell you this. So far I respected your work and didn't meddle with it, allowing you do what you think is right, and I just hope that doesn't have to change.

Do you actually think this is true? I think you got what you deserve, in fact not enough, and yet you're pretending like nothing happened and all you should be getting is praise. Are these signs of narcissism?

Yes, I do not deserve to be treated like some animal that needs to be caged. I need a voice and everywhere I turn I get a gag in my mouth!

I do not enjoy people spreading lies about me and my mods behind my back, then banning me or preventing me from even remotely retaliating in any way.

Some examples:

I was banned from Mod The Sims for two years because some other users felt it necessary to complain to moderators that I'm "dangerous" or some other garbage, which goes against one of their rules about No Jackassery! The only thing I had uploaded at the time was The Sims 4 Community Library and I had to go through an entire process for that to be approved. The only reason they felt to give me on the banned page to go off of was "Becuase Drama", I didn't find out until later from some random user about the true reason I was banned. (No, I did not actually see the thread or whatever it was the users complained in to get me banned) I can't even ask a moderator on that site about it because not long after they banned me, they banned my IP too. Because two years wasn't enough I guess? May as well come over to my house, chop off both my hands, destroy my computer, and light my house on fire, just to be sure.

I was banned from the Deaderpool discord when I had heard from some people that users were being banned for simply having my mods installed when asking for support from there. I joined their discord and asked what that was about and they simply banned me without a second thought or even a response to my query. It was just, nope, you're banned.

I do not like that animation authors are too scared to add custom tags to their animations so they can be filtered properly by some of my mods.

You're telling me that you've "respected my work and didn't meddle with it, allowing me to do what I think is right", yet you are threatening animation authors for putting custom tags into their animations by telling them you are going to remove their animations from the listings of your mod? Essentially destroying the chances of their animations being known. You can't say this isn't happening, because I've heard it from a few animation authors now.

Even after the negative backlash from you for that plagiarism debacle, I don't tell lies about your mod or how you treat people, I don't shit on you behind your back, I don't disrespect Wicked Whims by threatening people.

No, these are not the signs of narcissism, these are the signs of someone on the defense, trying to determine friend from foe and you are very quickly becoming a foe and I'd prefer you weren't my enemy.

There was the plagiarism thing that we haven't moved past, but I still regret it and I've been trying to make amends since then to improve our relationship, I don't know what else I could do to apologize for it. I would like to have good relations with you, but not if you're going to treat me this way.

Do you honestly believe ANYONE deserves to be treated this way?

I'm a human being NOT an animal!

[3] [imgs/2020\\_07\\_10\\_cn\\_convo\\_3.png](#)

Looking at it today, I realized that I became **ColonolNutty**'s scapegoat for everything wrong that happened to him. For as long as he was present in the Sims community, my approach was to avoid, ignore, don't touch the things you don't want to be associated with. I never went out of my way to prevent someone from using his content, I never encouraged anybody to ban him, I never told any lies about him or his work, and I never told anybody what they should think about him. But what I did do is distance myself and my content as far as possible from him after he disrespected me by defaming the name of WickedWhims, plagiarizing my work, and lying.

The act of not wanting to promote other bestiality and rape creators associated with **ColonolNutty** became a clear indicator of me being against him, even though all I wanted is to simply not be associated with his content and his person.

# August 21st, 2020

ColonolNutty reworks his mods on LoversLab into the Devious Desires mod.

On [August 21st, 2020](#)<sup>[1]</sup>, **ColonolNutty** released the Devious Desires mod that features bestiality and rape themed content, while copying the fundamental functionality of the WickedWhims mod. The “Sims 4 Community Library” was recreated for the past year to suit the needs of the Devious Desires mod.

The “CNWW” mods, also known as “Kinky Whims” and “Wicked Pets” mods, which were dependent on the WickedWhims mod to function, were no longer available.

*ColonolNutty finally attempted to cut ties with the WickedWhims mod by creating his independent mod, but due to a lack of knowledge on the subject of creating mods, his best attempt was to plagiarize the WickedWhims mod code again.*

## Devious Desires by ColonelNutty

[View File](#)

A collection of various fetishes, from forced and rough sex, to sex with pets!

[This mod requires Sims 4 Community Library](#)**Features:**

- Since this mod contains fetishes that many of you are not into or don't even want to see, Every set of features is modular and disabled by default, so you may enable whichever parts you wish to be enabled by yourself! For example, DD Pets is one set of features and DD Kinky is another set. Both will be disabled by default and must be enabled in the settings individually for each of them to begin working.
- General
  - Unequip various clothing items (All, Hat, Gloves, Top, Bottom, Shoes, Tights)
    - Also works to equip/unequip clothing items of NPCs.
- DD Pets
  - Enables Sex for both Pet x Human and Pet x Pet.
  - Sex and Sex Autonomy
  - Nudity and Nudity Autonomy
  - Knotting
  - Pregnancy
    - Pet/Human Hybrid pregnancies
      - Human Sims can birth Pet Sims.
      - Pet Sims can birth Human Sims.
  - Traits (Reward Store)
    - Pack Bitch - Makes a Sim more likely to have sex with pets and more likely to become pregnant with hybrid pet babies.
  - Leashing (Experimental)
    - Human Sims can Leash other Human Sims and walk around with them as they would a Pet Sim.
  - Works with AOM Selectable Pets
- DD Kinky
  - Consent
    - Give or Take Away consent for Rough Sex to other Sims
    - Ask NPC Sims to give or take away consent with your Sim!
  - Rough Sex
    - After Giving/Receiving Consent, you may Ask For Rough Sex for both Pet (If DD Pets enabled) and Human Sims
    - Autonomy
      - Sims will autonomously ask for Rough Sex from other Sims, if consent is given or received.
        - NPC Sims can ask other NPC Sims.
        - NPC Sims can ask Player Sims and vice versa.
  - Assault
    - Assault other Sims and force sex upon them.
      - Chance of failing the attempt
    - Autonomy
      - Sims will autonomously attempt to assault other Sims.
        - NPC Sims can assault other NPC Sims.
        - NPC Sims can assault Player Sims and vice versa.
- DD Milk Farm (See below for setup)
  - Ask Sims to drink milk from their breasts
    - Breastfeeding fills the hunger bar of the Sim that is drinking.
    - Overlays appear on nipples after feeding.

**If you or another mod author spots something that you consider to be "plagiarism" or "stolen" please ask me about it, it is highly likely that it is merely a coincidence. I will be more than happy to discuss it with you and we can together come to a compromise, whether that be deleting the offending file or remaking it entirely.**

**DO NOT just report this mod for plagiarism or as stolen content, it is both rude and immature. Use your words, Lovers Lab is NOT a place for immature children (or children at all for that matter) to be running around, there is an age requirement to create accounts after all. False accusations will be reported.**

**If you decide to report any part of the code as plagiarized or stolen, expect to be asked for proof and a list of files/code spots where you believe code has been plagiarized or stolen. If no proof is provided, or if the response "all of it" is provided. Your claim will be invalid and subject to report abuse.**

**Sources:**

# December 13th, 2020

ColonolNutty is banned on LoversLab for plagiarizing code.

On September 9th, 2020, on “The Nutty Collection” discord server, in the #general-discussion channel, **ColonolNutty** [stated](#)<sup>[3]</sup> “... [LoversLab] actually respect Mod Authors.”, claiming that the LoversLab forum is a safe place for him and his mods as the LoversLab staff respects and supports creators on their platform.

On [December 13th, 2020](#)<sup>[1]</sup>, **ColonolNutty** was banned on the LoversLab forum on account of plagiarizing other creators work. The entire LoversLab administration staff was presented with proven plagiarism<sup>[2]</sup> and collectively agreed that **ColonolNutty** is guilty of the offense.

*The LoversLab community continues to exist thanks to creators contributing content, retaining the community interest, and increasing the value of the community. Cases where a creator has to be punished negatively affect the community unless the creator in question poses a bigger threat to the stability of the community than what they offer back to the community.*

The screenshot shows a forum post by user 'ColonolNutty' on August 21, 2020, in the 'Downloads - The Sims 4' category. The post has been removed, and a moderator note states: 'This mod has been removed and the creator banned. It has come to our attention that the user has stolen large parts of the code for this mod from another creator. There has actually been multiple instances of this occurring with other mods from the creator. As they have been warned about future consequences in the past for this behavior, we are left with little choice but to remove them and their content from the site.'

On December 13th, 2020, on “The Nutty Collection”\* discord server, in the #dd-non-pet-support channel, **ColonolNutty** [stated](#)<sup>[3]</sup> “*Lovers lab was supposed to be a place where Mods Authors were respected.*”, shifting the narrative to imply that his removal from the LoversLab community indicates that the LoversLab administration suddenly lost respect towards creators in their community to lower the credibility of the LoversLab staff and avoid taking the blame for his actions.

[LL]GroguTheWise 09/09/2020

Hey Col, can I ask you for help on here about every thing in your exception reports? LoversLab is way too strict and Ban Happy. I just want help nothing more, which would be greatly appreciated, in the future on here..

ColonelNutty 09/09/2020

Sure, just PM me [@\[LL\]GroguTheWise](#)

I doubt LL would ban you for an exception related to my mods. Unlike many websites, they actually respect Mod Authors. (edited)

ColonelNutty 12/13/2020

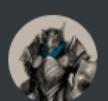

How do I prevent those from the deaderpool discord joining my discord?

Lovers lab was supposed to be a place where Mod Authors were respected.

AlanDunaway 12/13/2020

Lock up all channels first

Crypto34 12/13/2020

Only thing i can think of is creating your own website or trying to use what i suggested privately, but i don't know how much you wanna do that..

ColonelNutty 12/13/2020

I don't want users of my mods to be subjected to the contents of that website.

## January 13th, 2021

ColonelNutty comments on AllTheFallen accusations.

ColonelNutty 2 months ago · edited 2 months ago

Devious Desires does not in fact have or provide support for any other external or addon mods. The only features it provides are the ones you can see in the DD archive. DD is not a rename of CNWW, CNWW is quite dead and gone, ever since Wicked Pets and Kinky Whims came about. Not only that, but all support for ATF mods and the like died with CNWW. DD is a combination of both Wicked Pets and Kinky Whims. To think that any sex mod I make is secretly CNWW is a poor mans argument. If ATF contains mods which use or add to any of my mods, I can tell you right now that I am not and never was a part of them in regards to Devious Desires. Yes, I was associated with them literally 4 years ago with CNWW. However, to continue to associate them with me and/or any of my Mods at this point is extremely juvenile and slanderous. Let it go already, you're trying to hold onto something that no longer has any merit to it!

[1] [img/2021\\_01\\_13\\_cn\\_statement\\_on\\_reddit.png](#)

On [January 13th, 2021](#)<sup>[1]</sup>, on the Reddit post titled “what happened to colonolnutty”, **ColonelNutty** states *Yes, I was associated with [AllTheFallen] literally 4 years ago with CNWW*, stating the incorrect timeframe, as he was still actively developing the pedophilia themed mods less than two years ago. He ends with “... to continue to associate [AllTheFallen] with me ... is extremely juvenile and slanderous. Let it go already, you're trying to hold onto something that no longer has any merit to it!”, claiming that his willful involvement with

creating pedophilia themed content should simply be forgotten without being held responsible.

## February 23rd, 2021

Electronic Arts briefly responded to the AllTheFallen situation.

The Sims is a highly social game that represents people's life, identity, and experiences, with a huge global following. Unfortunately, some people cannot comprehend that making mods about very unethical subjects in a game like this is never going to be acceptable.

On [February 23rd, 2021](#)<sup>[1]</sup>, the official The Sims twitter stated "*These types of mods have deeply disturbing content, are not authorized by EA, and their use violates our User Agreement. If we detect players using this kind of mod content, they will no longer be able to play the game and will face permanent EA account bans.*" when referring to the pedophilia mods on AllTheFallen. A subject that was brought to attention thanks to the [change.org petition](#)<sup>[2]</sup>.

*This introduced unnecessary confusion within the community, making people afraid to download adult themed mods due to it potentially resulting in a banned Origin account. Only mods related to and made by the AllTheFallen forum are a potential reason to receive a ban. The rest of the available adult themed mods are not considered by Electronic Arts as a reason to receive an Origin account ban.*

# Correcting Confusion & Misinformation

**ColonolNutty** spreads a lot of misinformation about me, my work, and Sims communities. This section aims to clear up any potential confusion about these subjects.

Most of these snippets come from the “The Nutty Collection” discord server. You can download archives of the entire discord from [2021](#) and [2022](#).

**ColonolNutty** Today at 00:46

Well obviously, because of its modules and because my patreon is SFW  
Not only am I their competition, but I literally do this for free. Accepting donations, of course.  
They do it as a job  
My ideals are also against theirs, I'm more for an open community with shared code, shared libraries, etc.  
They are for more of a privatized community, where everyone is closed off from each other and nobody shares anything with anybody.  
I literally asked Khlas, the one who made the current rigs to send me the rigs files, he declined and told me to "just get Wicked Whims or make your mod an addon to Wicked Whims"

Working on WickedWhims started from my passion for coding and creating, and I was lucky to continue it as my job, which is still driven by my passion. There's nothing wrong with that and the mod was always available for free to download.

I or WickedWhims doesn't have a privatized community, and I don't desire to lead a community, I don't want to spend time on it. Anything I do have is limited or coincidental so it doesn't have too many users. Friendly creators and anybody who contacts me receives help, regardless if they are a user of my mods.

Saying “nobody shares anything with anybody” is wrong, we just don't share with pedophilia, bestiality, rape content creators, and frauds.

The new animating rig introduced in WickedWhims was sent to 15 popular animation creators and 2 popular body model creators for testing and opinion before it was released. It's impossible to cover all of the content out there but we did our best to preserve backward compatibility. The new rig affected less than 1% of available custom content, that's a huge success.

We just didn't ask pedophilia, bestiality, rape content creators, and frauds to look at it.

**ColonolNutty** Today at 00:53

Yes, because it is the only thing they understand  
Too many people just let things slide under the rug  
We already saw how fucked everything became when Turbodriver updated the rigs and told everyone to "deal with it"  
Their ego is too inflated for them to listen to reason at this point

If you guys were not aware, there are rigs made available for animators and CAS Part creators to use to when making their animations and CAS Parts. However, these rigs are locked away inside Wicked Whims. This forces animators/CAS Part authors and users of those animations/CAS Parts to use Wicked Whims so that their animations and CAS Parts work correctly ingame.

I propose the rigs be made available as a separate and publicly available download, outside of Wicked Whims. I see no reason for Wicked Whims to have exclusive "rights" to such a crucial aspect of the animations and CAS Parts part of the community.

We should take after the Skyrim community and the XP32 Maximum Skeleton Extended mod. Their rigs (or skeletons as they are called there) are made available as a separate download, I see zero reasons why the rigs in The Sims 4 should stay privatized and exclusively locked into Wicked Whims.

Just to be clear this applies mainly to Sim Rigs, whether they are for Human Sims, Werewolf Sims, Animal Sims, or any other types of Sims that may come about in the future.

There are benefits to this:

1. The rigs can be updated separately from Wicked Whims
2. People will not be forced to download and install Wicked Whims just to use the rigs.
3. Animators and mod authors will be able to make and utilize animations outside of the Wicked Whims framework in their own mods without having to make it a requirement.
4. Less fighting over who owns what when it comes to the vanilla rigs asset.
5. Multiple rigs can be made available on the same download page, so if people want a rig with certain bones (Such as the old Wicked Whims rig that had tongue and penis tip bones), they may freely download and access them, without having to download an old version of Wicked Whims just to get access to these.
6. It is publicly available and can be installed separately. People will not be required to include the rigs directly in their mods when they upload it.
7. There will be way less rig conflicts. People will not be required to worry about load order when it comes to rigs.

Anything about the rig being “locked away” doesn't make any sense other than ColonolNutty being behind on any innovation due to plagiarizing others' work rather than creating anything new for his own [“extremely popular mod”](#).

The rig was always made by combined forces, currently that's Denton47, Azmodan22, and Khlas. The rig is always made with backward compatibility in mind and the most drastic changes only affected WickedWhims itself, unless another mod was to plagiarize its functionality.

And the rig was always available to download for animators and CAS creators since WickedWhims was released.

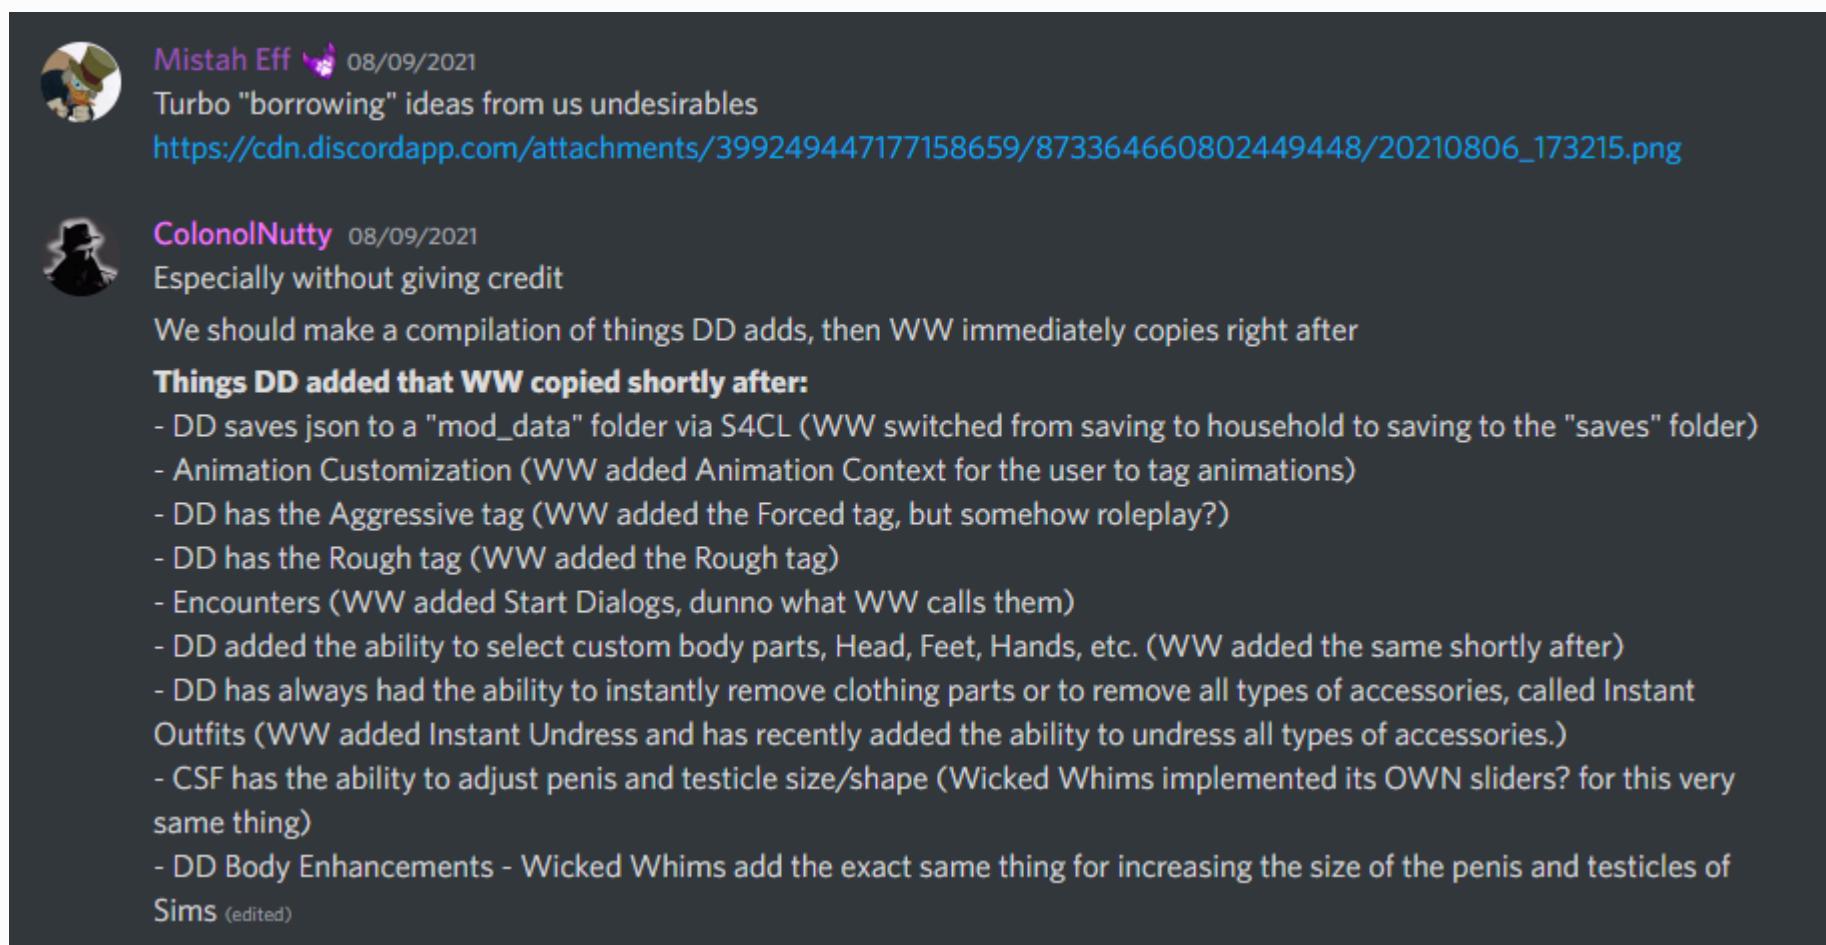

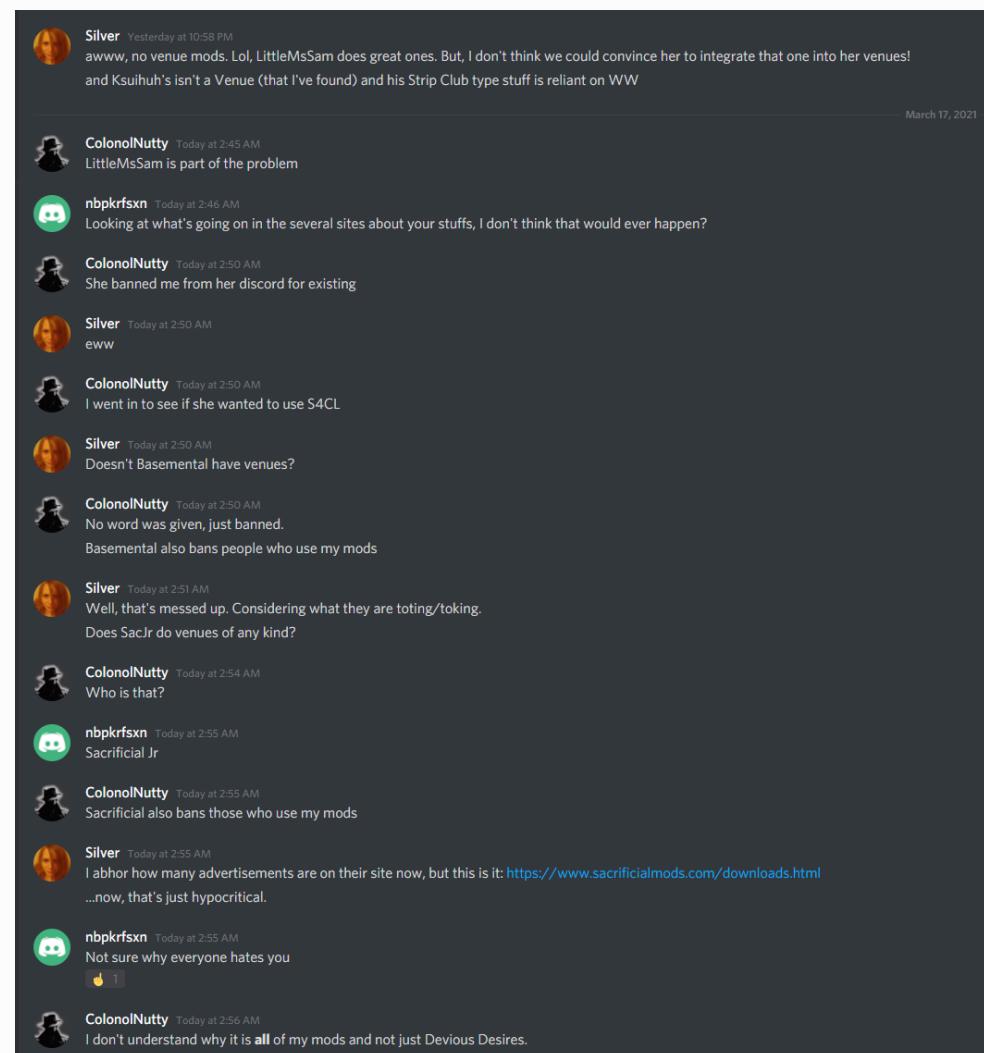

Proposed points of separation are just introducing complexity and confusion for users. Nobody is talking about who owns what when creators respect each other. And there would be even more rig conflicts and unnecessary

bizarre animation behavior when nobody knows what anybody is using. Creating a new rig and bringing everybody on board with it to establish a new standard is a burden that WickedWhims is taking on to push things forward, not look for a way to make things more complicated.

There is no misinformation or confusion about this one, he was banned at a lot of places for the reasons explained in this document.

This includes many notable Sims communities, like the ModTheSims website, Deaderpool's MC Command Center Discord, KawaiiStacie's Discord, LittleMsSam's Discord, SACRIFICIAL'S Discord, SimsAfterDark Discord, Basemental's Discord, TwistedMexi's Discord, Scumbumbo's Discord, Nisa K.'s Discord, and the LoversLab forum.

This simply shows that being a fraud and having involvement with creating pedophilia, bestiality, and rape themed content will never be forgotten.

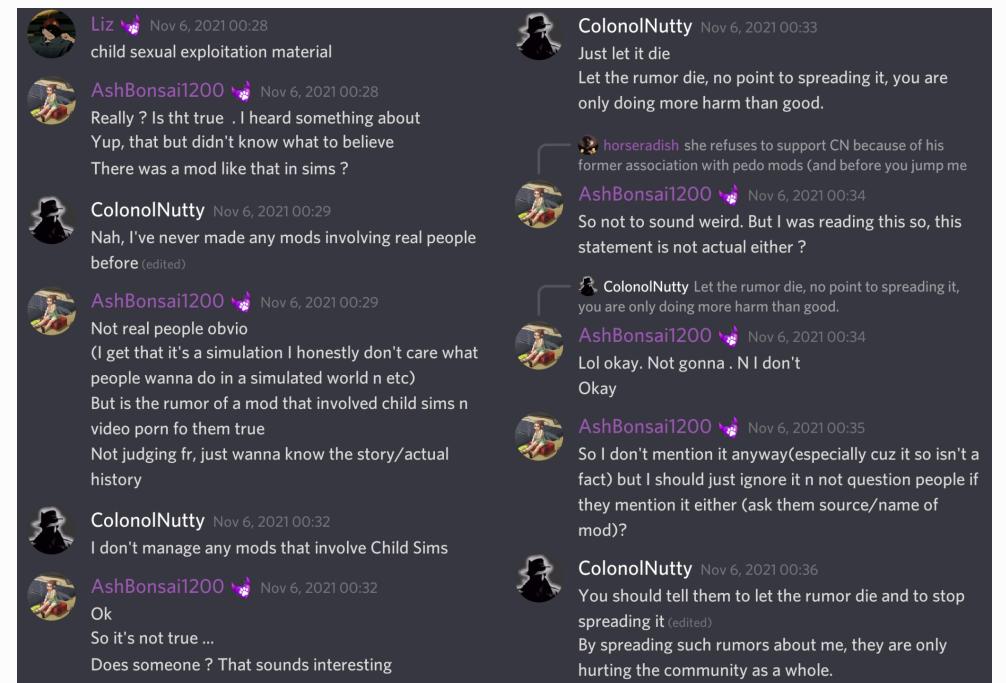

- WickedWhims doesn't save data to JSON files, it uses households, but it has used JSON files since it was created in June 2016. Currently that method is just used as a backup system.
- Certain context tags added to WickedWhims are disabled by default and recommended to be used for filtering out animations. This is the most efficient way to get rid of unwanted content. And I publicly talked about tagging animations at least as early as [April 2019](#).
- Sims asking to have sex was added way back in [June 2017](#) and expanded in July 2021.
- The Body Selector to select custom body parts was added way back in [November 2018](#).
- The ability to instantly undress during sex and outside of sex was added way back in [March 2018](#).
- And although not introduced in WickedWhims, a key contributor to the mod, CmarNYC introduced the ability to adjust penis size way back in [July 2017](#).

Devious Desires was introduced in 2020 and it didn't come with any original ideas.

Anybody looking for examples of ColonelNutty being asked about his past might find it strange that none are provided.

The reason is his approach to questions like these, as his answers will avoid admitting to anything and only state that at this moment he has no involvement. Admitting to anything would affect his reputation, so if he can simply claim that he has nothing to do with it right now, he somewhat answers the question and doesn't have to bring up anything from his past.

I wrote a script to cause some chaos with bestiality, rape, and pedophilia mods. The intended behavior introduced confusion with these mods by creating nonsense lastException errors without a solution. No actual harm was done as the effects of this script were similar to running the game with outdated or broken mods which cause errors. Claims of it being "malware" are wrong, nobody's computer was ever in danger, and the script only temporarily affected specific mods for 19 days before it was removed.

This is the first and last time I've done something like this. In hindsight, I wish I thought out my actions more carefully and considered the potential consequences.

*TURBODRIVER  
2022*

*You might ask, why? Why write this document? Don't you have anything better to do?  
You're right, I shouldn't need to be bothered by it, but I care about my work and this community too much.  
People deserve to have a factual source of information to know what kind of person is ColonelNutty.*
