
Summary: Junior full-stack developer with a deep background in UI/UX design and management. Former IT Project/Product/Delivery manager. Passionate about both frontend and backend technologies. I'm passionate about building scalable applications using React, Node.js, PostgreSQL and TypeScript. I work well in agile teams and am eager to grow as a full-stack developer. I strive to be part of a team developing useful, complex and diverse projects. I am looking for a role where I can develop under mentorship, experiment and contribute to the company's projects.

PROFESSIONAL EXPERIENCE:

Career Development and relocation | Amsterdam | Dec 2024 — current time

Relocation to the Netherlands, obtaining a residence permit and work permit;
Start studying Dutch in local offline courses, external passing of course A1, preparation for external passing of course A2;
