

Escape to Earth!!

Greetings my other Milky Way inhabitants!

Are you getting tired of your same old terrestrial or gaseous planet? Are you just itching to dive into a cool pool of fresh or saltwater? Breath in that mixture of air with predominantly Nitrogen and Oxygen? (Fact 1)

Then do I have the planet for you. This is Edna Earthbound, travel agent extraordinaire and I would like to invite you all to visit the planet **Earth**. We are 75% covered in water. (Fact 2) So none of that zero or frozen liquid that you may suffer with on your own planet. We have solid ground, although our plates may shift a little at times. Imagine the stories you could tell after experiencing an Earthquake! (Fact 3) If you want to get away from the extreme temperatures you deal with, we have a moderate temperature at all times due to the layers of our atmosphere .(Fact 4)

Come and enjoy our beaches, our mountains, our deserts, or our plains. There are so many activities to choose from. Enjoy our cities, our farms, our neighborhoods bursting with wonderful Earthlings.

Travel may be restricted at this time. Should you visit, please keep your social distance from any human....

Hope to see you soon! For travel arrangements- Call Edna at 1-800-Blue Marble.
