- GDHF Submission: [GDHF ABSTARCT 2020 INDIVIDUAL PRESENTATION: OPENMRS QA](#).
- Technical application for Notice D: [OpenMRS QA for Interoperability](#)
 - Due on 24th July 2020
 - Members are requested to review and share final input before deadline.

Discussions

Who decides if the module is good enough to include in the Platform?

- There is more to this than QA.
 - Module/squad/project objectives.
 - Client/Product Owners.
- What should be the QA threshold?
 - Possibly have specific metrics.
- Some of the approaches used before included
 - Having implementations testing out.
- Possible Idea:
 - Showcase to the community to get feedback.
- Factors looked into when adding a module to the platform:
 - Is it stand alone?
 - Is it a core functionality?
- Wayforward:
 - The QA team to play a supporting role by providing recommendations and guidance as opposed to giving a specific threshold or playing the role of a gatekeeper.

Working Session breakdown

- Setting up the development environment.
- Automating a simple test case.
- Automating a complex test case.
- Integration with CI environment.
- Integration with CucumberStudio for transmission of test results from CI environment.
