

Video Sound Editor — Privacy Policy

Effective date: July 2, 2026

Video Sound Editor ("we", "our", "the app") respects your privacy. This policy describes what information we handle when you use the app.

Data We Collect

We do not collect any personal information. The app runs entirely on your device. We do not have servers that store your data, and nothing you do inside the app is sent to us or any third party.

Files You Import

Videos and audio files you open in the app are processed locally on your device. We do not upload, transmit, copy, or share these files. Anything you export stays on your device unless you choose to share it through the system share sheet.

Purchases

Subscriptions and one-time purchases are handled entirely by Apple through the App Store. We never see or store your payment details, Apple ID, or transaction history. Apple's own privacy policy governs those transactions.

Analytics and Tracking

The app does not use analytics, advertising SDKs, tracking pixels, or cookies. We do not identify or fingerprint devices, and we do not share data with advertising networks.

Third-Party Services

The app uses Apple's StoreKit framework for purchases and Apple's system frameworks for photo and file access. It does not integrate any other third-party services or SDKs.

Children's Privacy

The app is not directed to children under 13. We do not knowingly collect information from anyone.

Changes to This Policy

If we update this policy, the updated version will be published in the app and on our website. Continued use of the app after changes means you accept the updated policy.
