Getting Started

Welcome to Natix-Host

Item Name : Natix-Host WordPress Theme

Created : March 2023

Item Version : v1.0

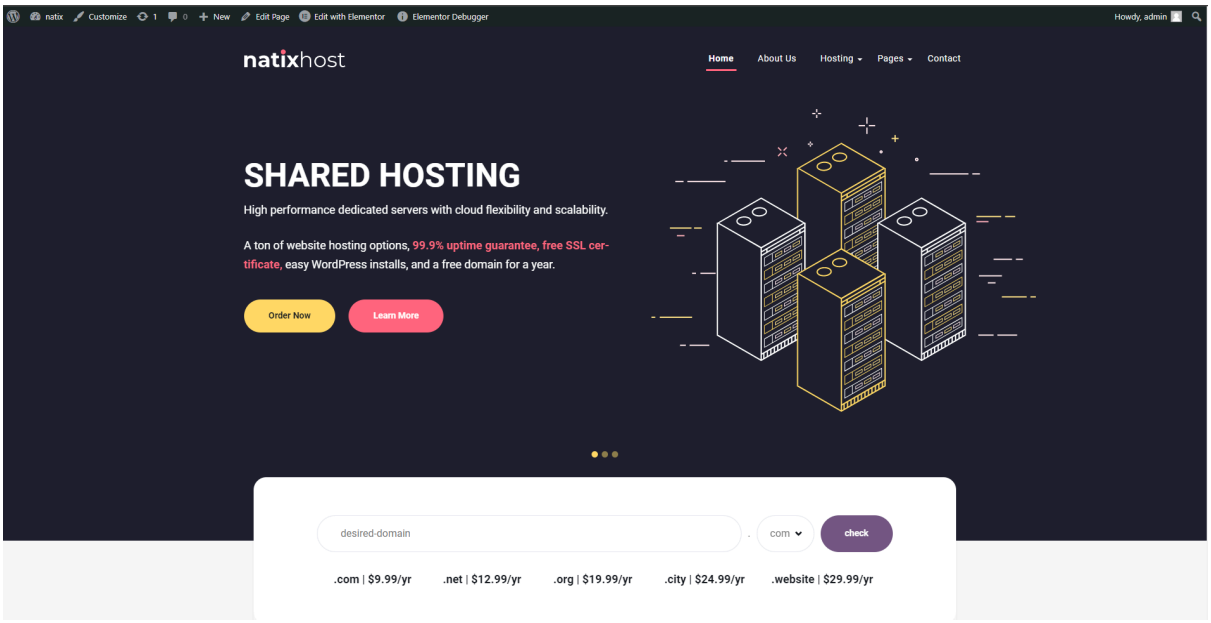
Author : DesigningMedia

Support Mail : support@designingmedia.com

All Theme Documentation : designingmedia.com

We are honoured that when you think of unique designs you come to us. We want to **appreciate you** for being a loyal customer and for purchasing this theme. When you're looking for something truly special. We hope that we'll continue to be the place you think of first. We **value the trust** you have put in our products and services. It's always a pleasure serving you and we certainly look forward to doing that in the future.

This documentation is intended to assist you with each step of **customization**. Please read the documentation thoroughly to understand how this Theme was created and how to edit it properly.



If you are **unable to find your answer** here in our documentation, we encourage you to contact our support team.

Theme Requirements

To use Natix Host, make sure your **hosting provider** is running the following software:

1. WordPress 4.8 or higher.
2. My SQL 5.6 or greater.
3. PHP 5.6 or greater. Wordpress officially suggests using PHP 7.2.

Recommended PHP Limits

Many issues that you may run into such as: white screen, demo content fails when importing, empty page content and other similar issues are all related to low PHP configuration limits. The solution is to **increase the PHP limits.** You can do this on your own, or **contact your web host** and ask them to increase those limits to a minimum as follows:

- max_execution_time 300
- memory_limit 128M

- post_max_size 64M
- upload_max_filesize 32M
- max_input_time = 60
- max_input_vars = 3000

Also consider upgrading your PHP Version to the latest version, the newer the better.

WordPress Information

To install this theme you must have a working version of WordPress already installed. If you need help installing WordPress, follow the instructions in WordPress Codex or you can watch the useful links below for WordPress information.

- WordPress Codex – general info about WordPress and how to install on your server
- First Steps With WordPress – general information that covers a wide variety of topics
- FAQ New To WordPress – the most popular FAQ's regarding WordPress

What's Included

When you purchase our theme from Themeforest, you need to download the Natix-Host files from your Themeforest account. Navigate to your downloads tab on Themeforest and find Natix-Host. Click the download button to see the two options. The **Main Files** contain everything, the **Installable WordPress Theme** is just the installable WordPress theme file. Below is a full list of everything that is included when you download the main files, along with a brief description of each item.

- **Installable WordPress file only**. You can upload this file when you install the theme.

- **All files and documentation** (full zip folder). You will need to extract and locate the installable WordPress file to upload when you install the theme.

Installation

Theme Installation

It’s easy to **install Natix-Host.** Just follow these steps, they won’t take much of your time.

1. Download the theme zip file from your Envato account from ThemeForest.

2. ****All files & documentation **(full zip folder)**. You will need to extract and locate the installable WordPress file to upload when installing the theme.

3. Log in to your WordPress **Dashboard** (Ex: http://yourwebsite.com/wp-admin).

4. Navigate to **Appearance > Themes.**

5. Click on **Add New** and then Click on **Upload Theme** .

6. Click **Add New**, then click **Upload Theme** > **Choose File.**

7. Navigate to the **.zip** file on your computer, then click **Install Now**.

8. When the installation completes, click **Activate**. You will be redirected to Themes page with Natix-Host activated.

9. **Done**.

Install theme via FTP

To manually upload your new WordPress theme, login with your credentials to your website and locate the wp-content folder in your WordPress install files. Upload the **un-zipped** 'natix' folder into the: wp-content/themes folder.

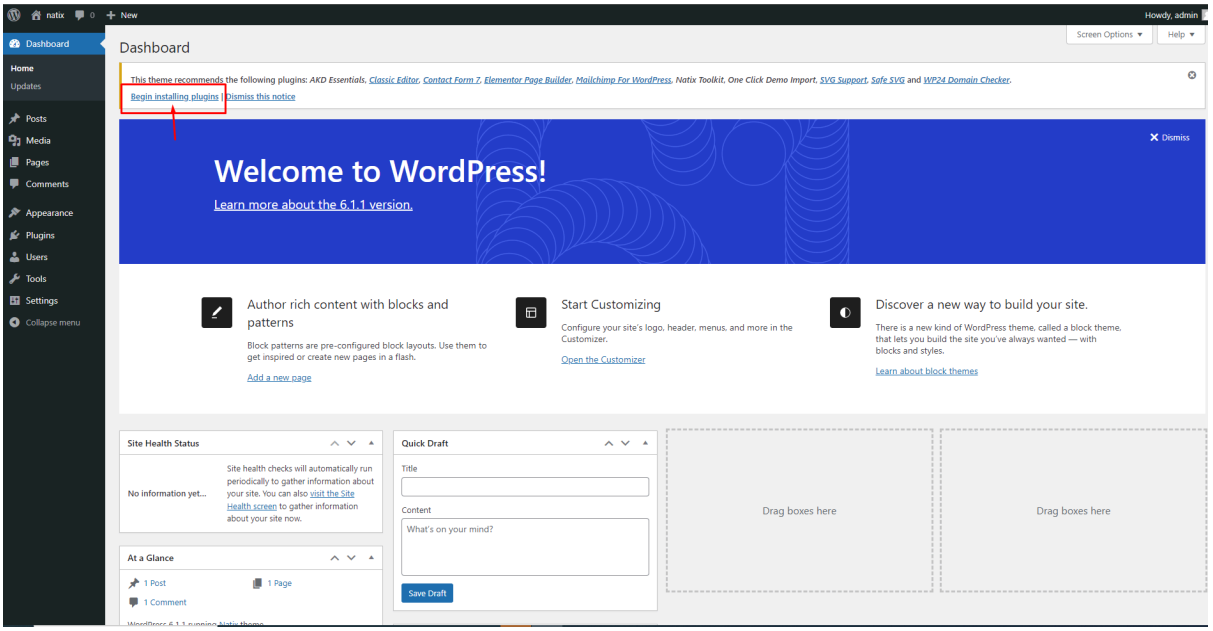
Once uploaded, activate the theme by heading to the “Themes” menu in the WordPress Dashboard. Locate the Natix-Host theme and hit “Activate”.

> The theme files will be stored on your server in the wp-content/themes/ location.

Note: When uploading your theme with the installer, please ensure you are uploading the theme .zip file, not the entire package you downloaded. In this case, you will be uploading Natix-Host.zip.

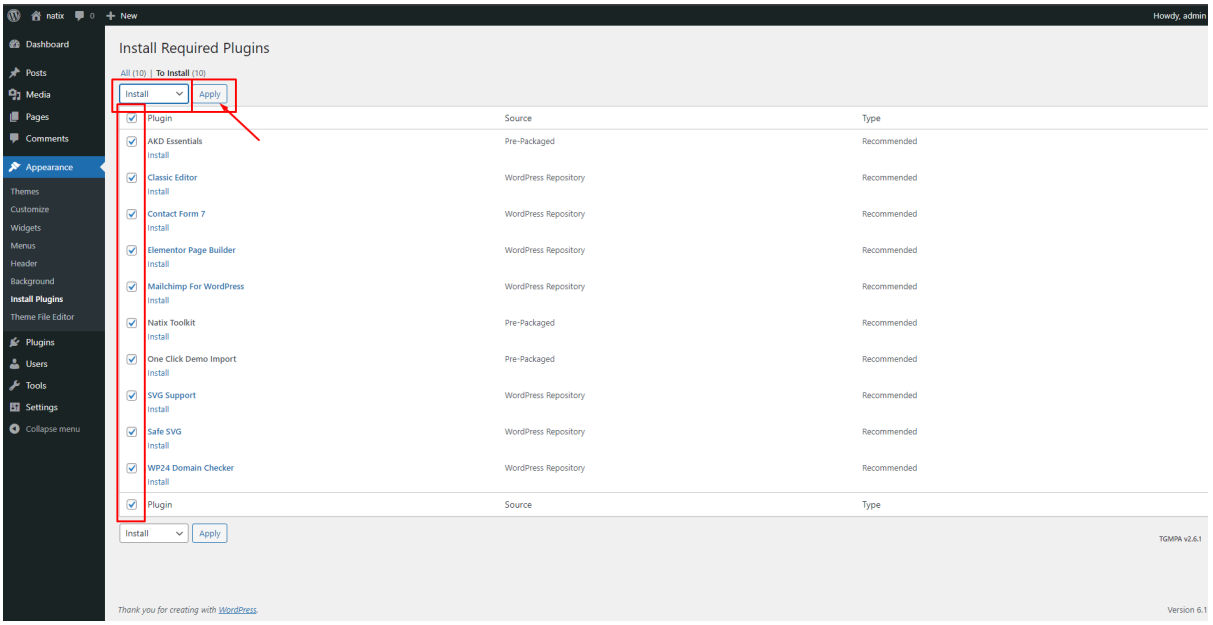
Plugin Installation

After activating Natix-Host, you will see this notice:



Click **Begin installing plugins**. You will be navigated to the **Install Required Plugins** page.

Simply check all of them (or all of the required plugins and some recommended plugins you like) and from the drop down select **Install**, then hit **Apply**.



When finishing, it should look like this:

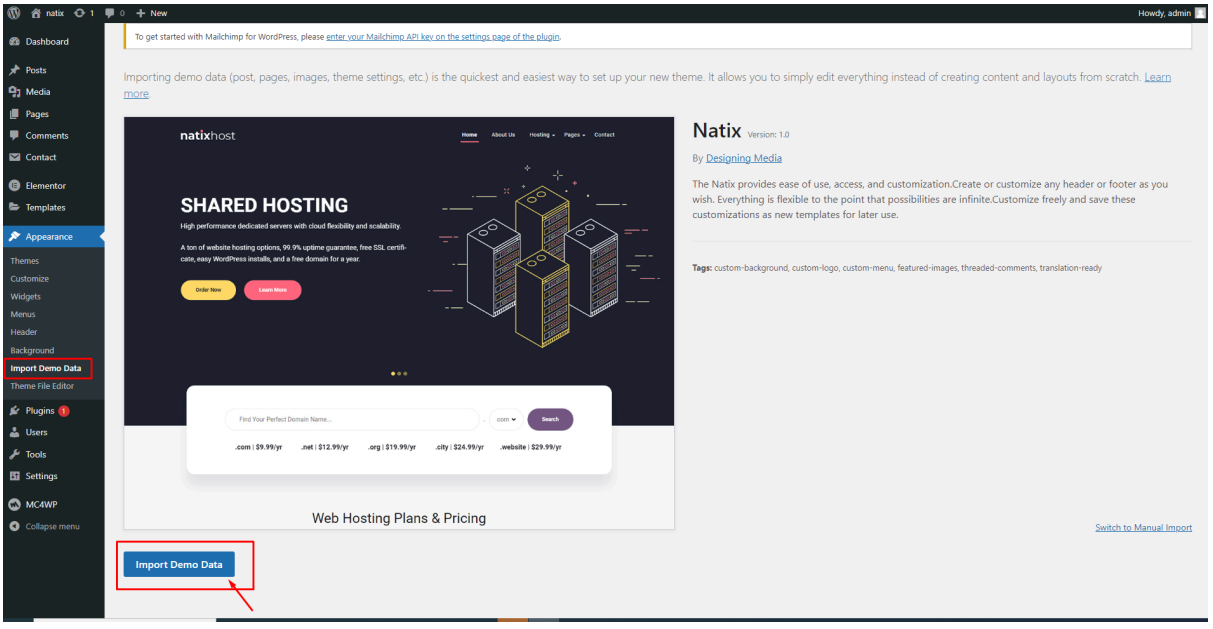
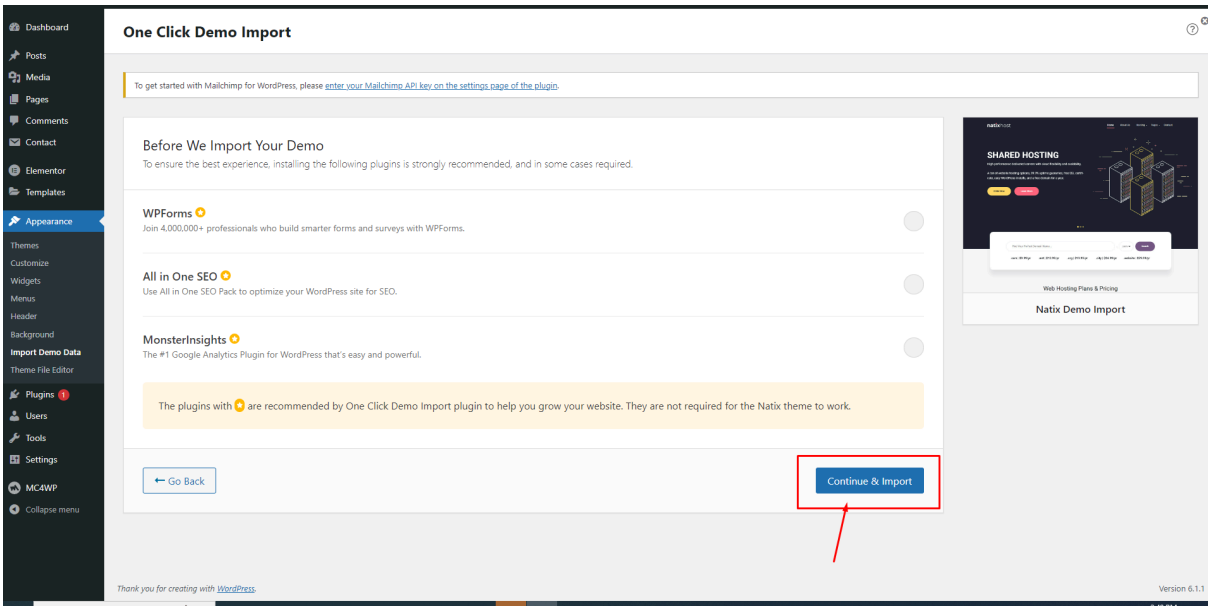
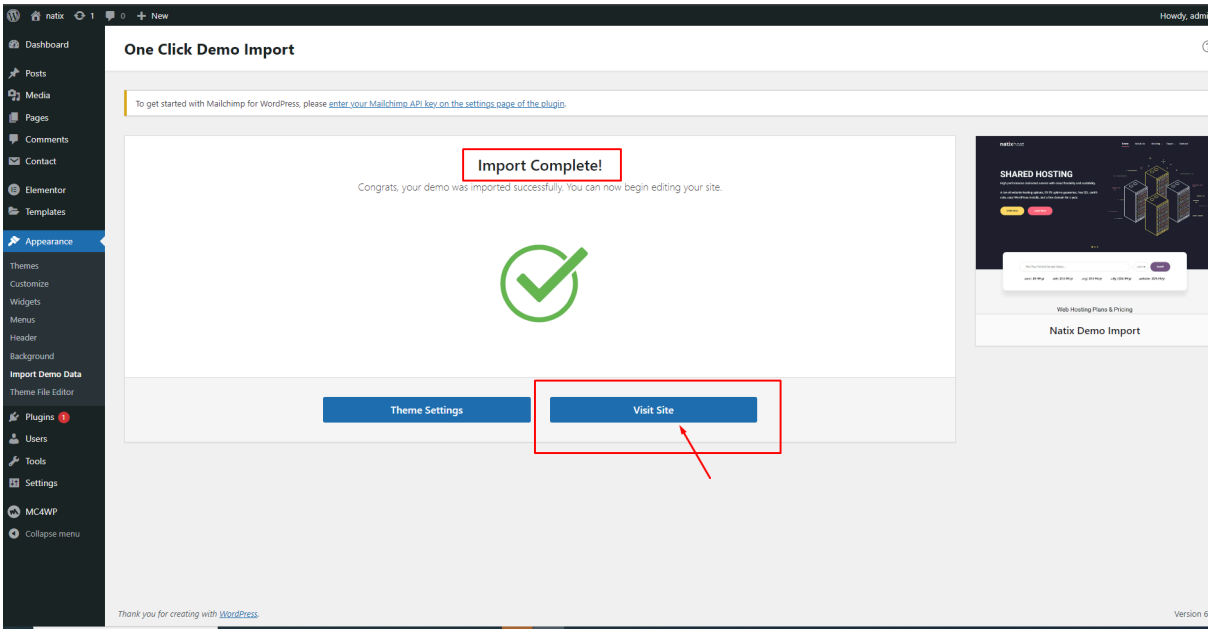
Demo Installation

Our demo data import lets you have the whole data package in minutes, delivering all kinds of essential things quickly and simply. All you need to do is to navigate to **Appearance >Import**. Hit **Import this demo**.



Step :1 Go to **Appearance >Import demo data >One click demo import > Continue and import.**





Support

Natix-Host Support System

All of designingmedia's items come with **6 months of included support** and free lifetime updates for your Theme.

Once the 6 months of included support is up, you have the opportunity to extend **support coverage** up to 6 or 12 months further.

If you choose to not **extend your support**, you will still be able to submit bug reports via email or item comments and still have access to our online documentation knowledge base and video tutorials.

We have an advanced, **secure ticket system** to handle your requests. Support is limited to questions regarding the theme's features or issues that are related to the theme. We are not able to provide support for code **customizations** or **third-party plugins**. If you need help with anything other than minor customization of your theme, we suggest enlisting the help of a developer.

Our Support Mail

All of our items come with free support, and we have a dedicated mail: support@designingmedia.com to handle your requests. Support is limited to questions regarding the theme's features or problems with the theme. We are not able to provide support for code customizations or third-party plugins. If you need help with anything other than minor customizations of your theme then you should enlist the help of a developer.

Item Support Includes

- Answering questions about how to use the item
- Answering technical questions about the item
- Help with defects in the item
- Item updates to ensure ongoing compatibility and to resolve security vulnerabilities

Not Included in Item Support

- Theme customization and requests that require or involve custom coding
- Installation of the item
- Hosting, server environment, or software
- Support for compatibility with 3rd party plug-ins
- Support for out-dated or modified themes

For more information on Item Support Policy please refer to the original document..

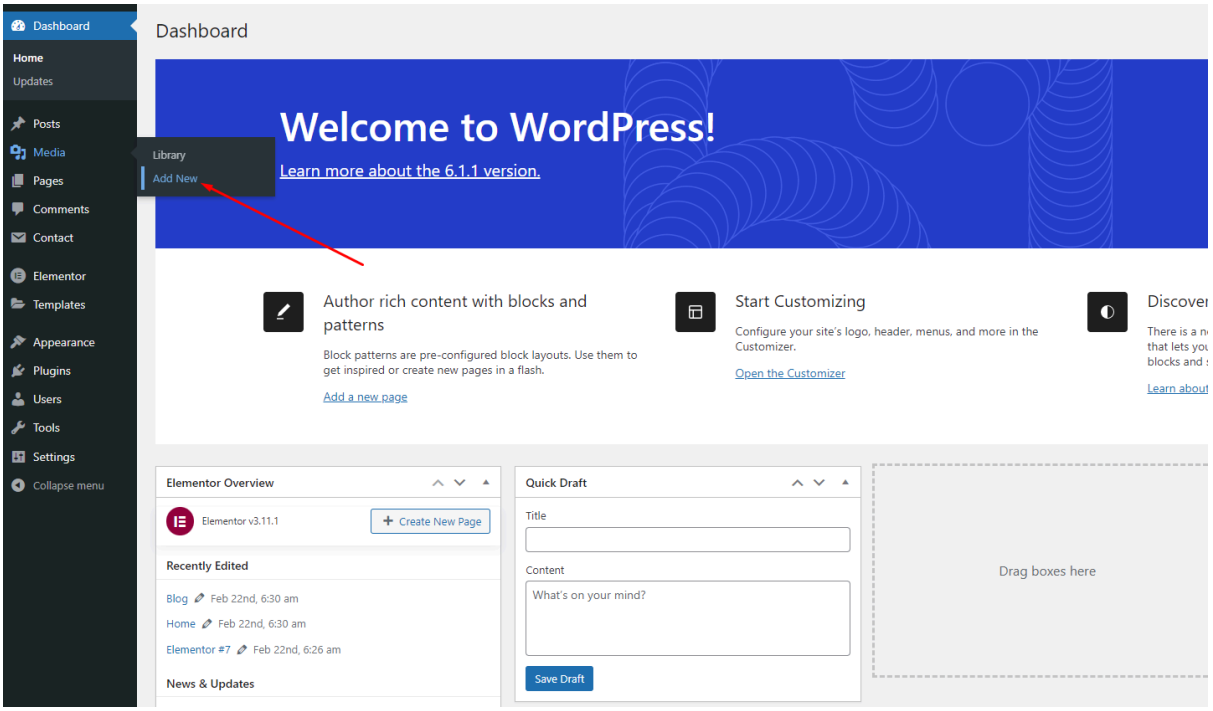
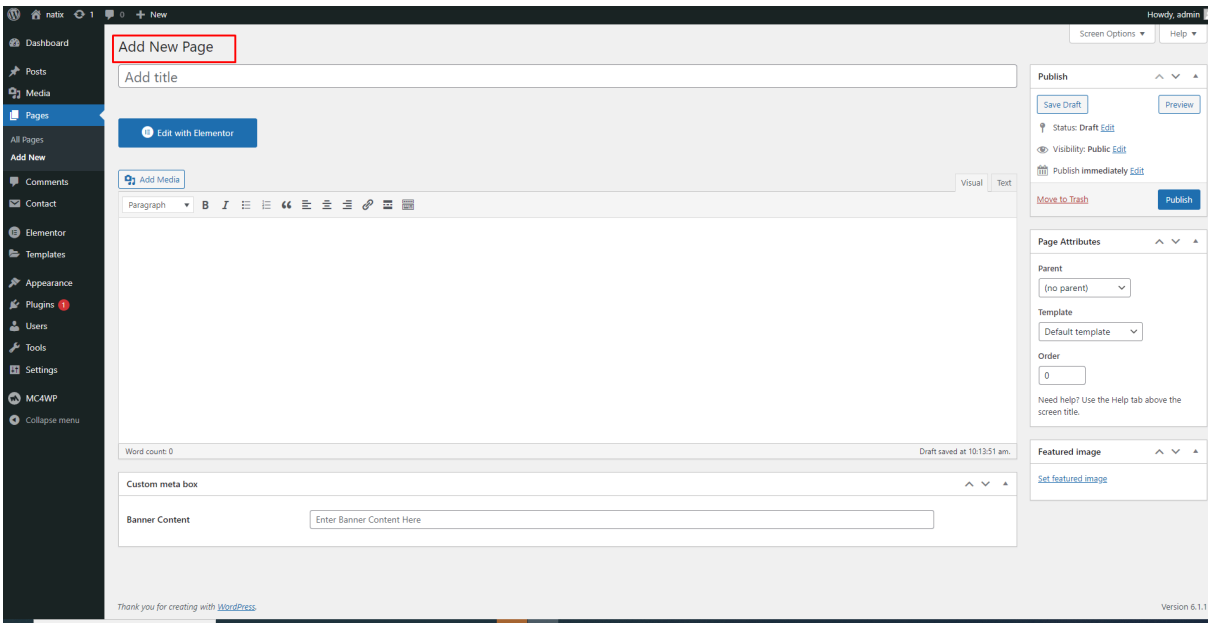
How to create a New Page

Step 1: Navigate to **Pages** in your admin sidebar and click **Add New** option.

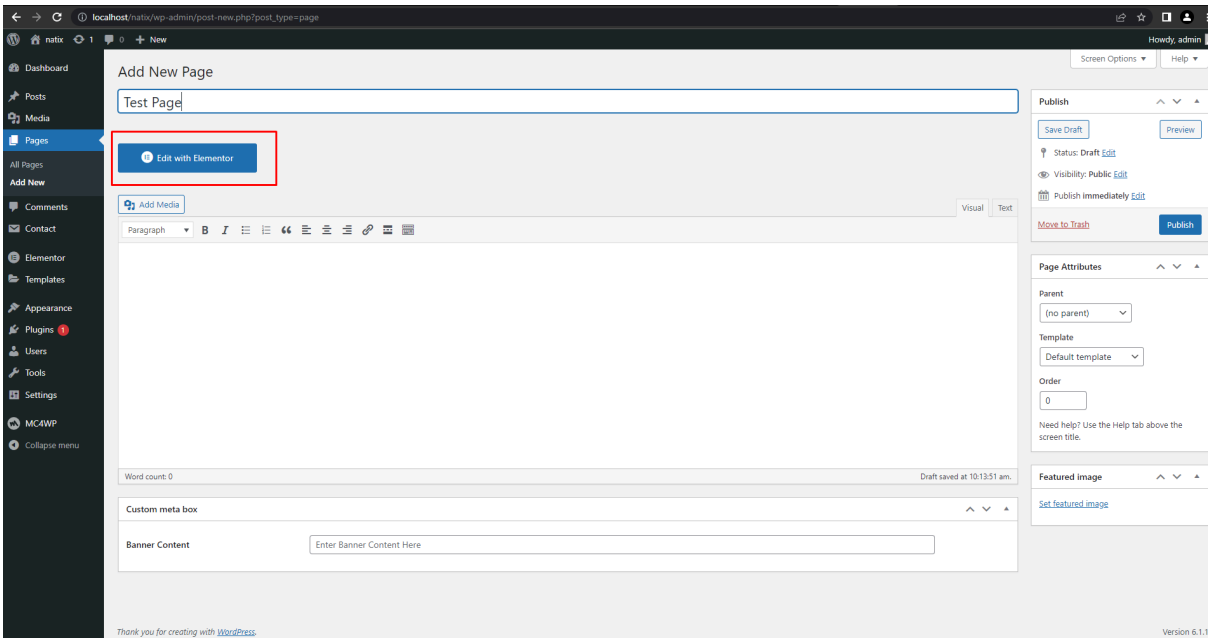


Step 2: Enter a new name for your page, then find the **Page Attributes** box on the right side to set your **Parent** or **Template** page.



Use Elementor to Build Page

Step 1: Choose **Edit With Elementor** to edit your page.



Step 2: Choose **Add Element** to start adding our premade elements to your new page.

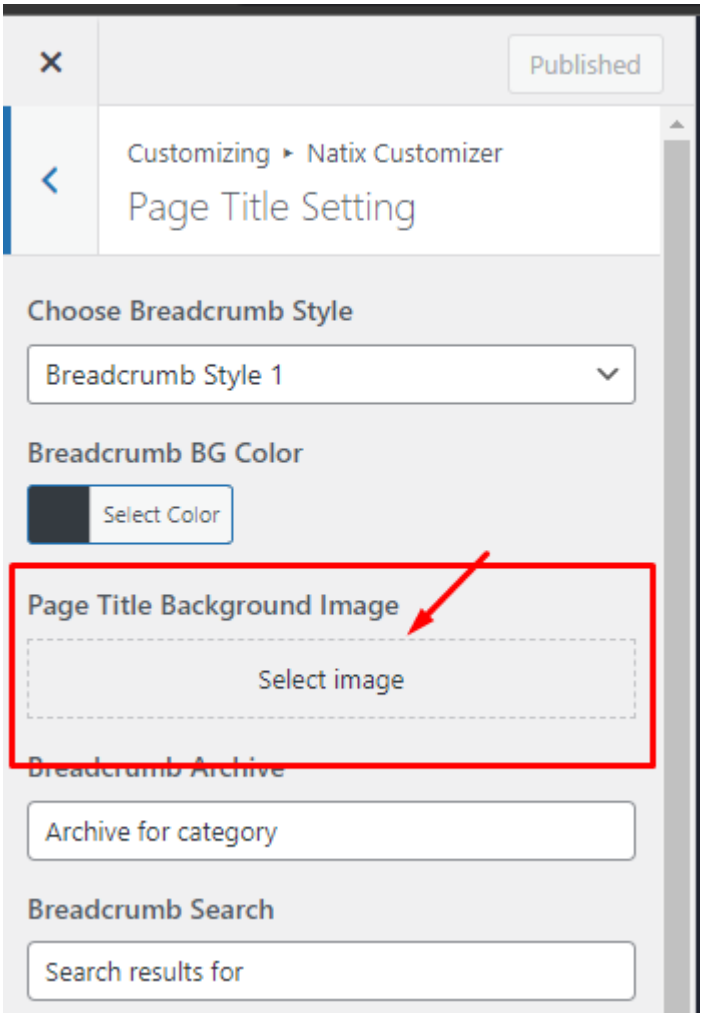
Retina Logos

To make your logos look crisp on **Retina devices**, simply upload a Retina logo to the corresponding upload fields.

Retina versions are twice as large as the original ones. For example, if your logo is 100px x 50px, the Retina version must be 200px x 100px.

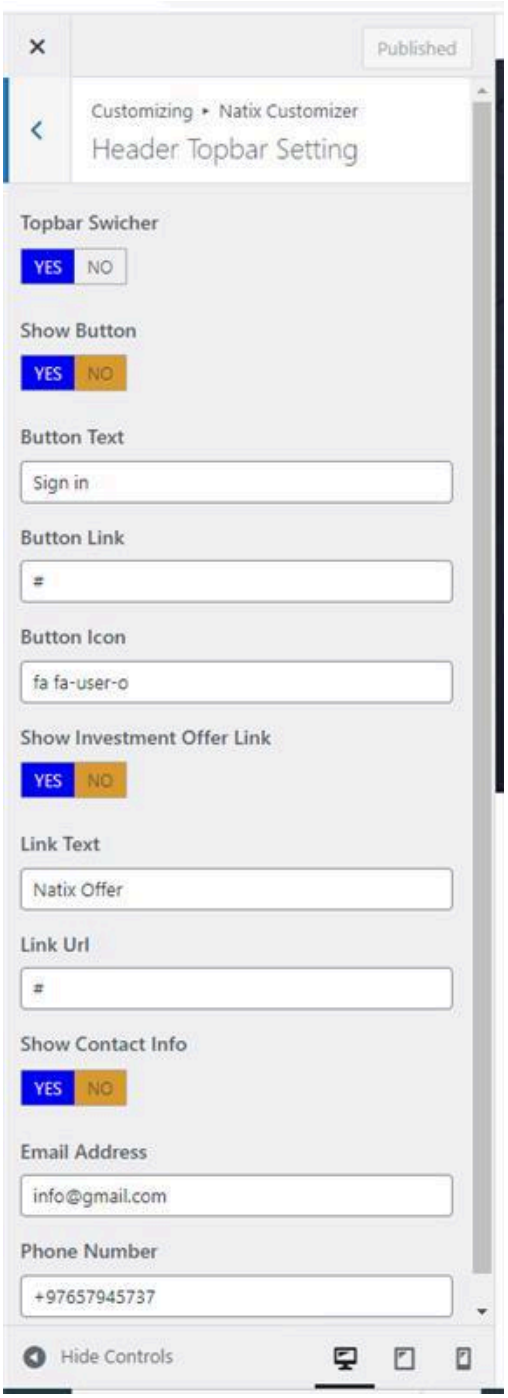
Page Title BG



Header TopBar and Footer

Page Title BG

There're **Topbar** Switcher on/off available. All of them can be configured in **Appearance → Customise → Natix-Host Customizer → Header Topbar Settings**



Footer

There're **footer copyright text , social link, footer on/off , footer logo** will be configured. All of them can be configured in **Appearance → Customise → Natix-Host Customizer → Footer**

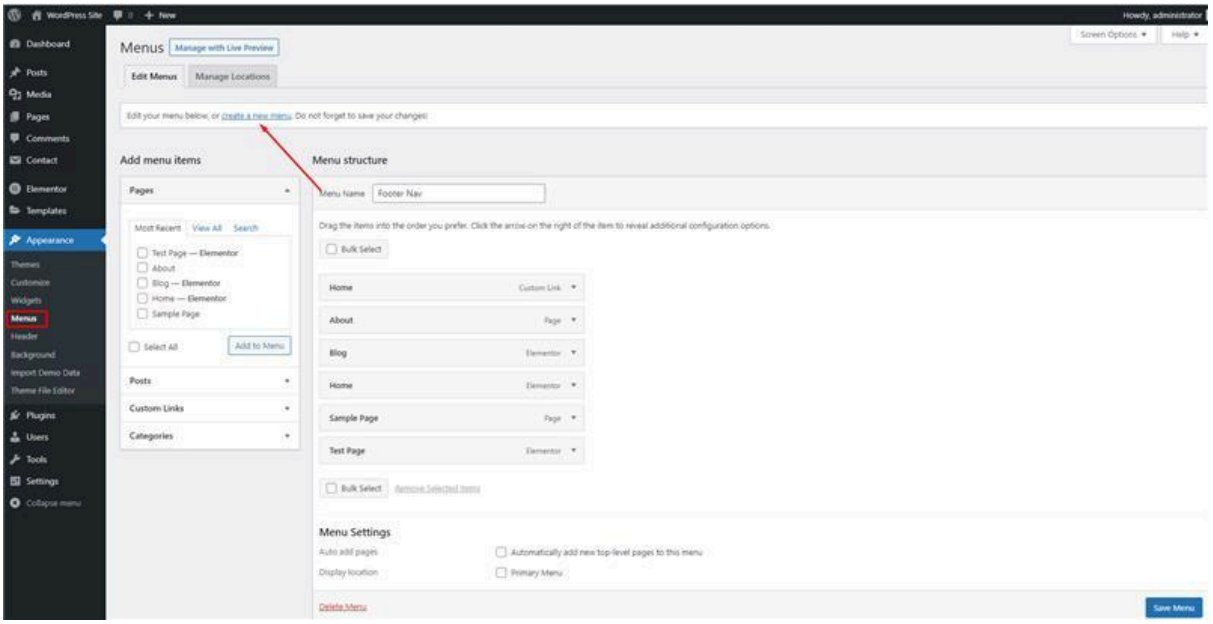
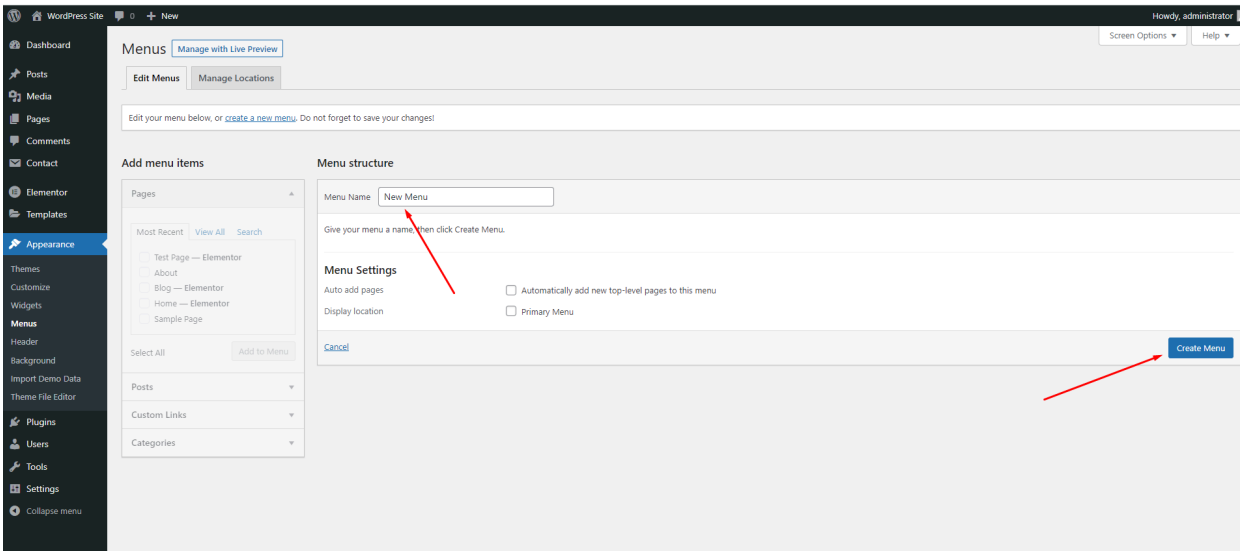
Navigation & Menus

Setting up Navigation Menus works normally as it does for any WordPress theme. If you're new to WordPress, you can learn more about menus in the [WordPress Codex article].

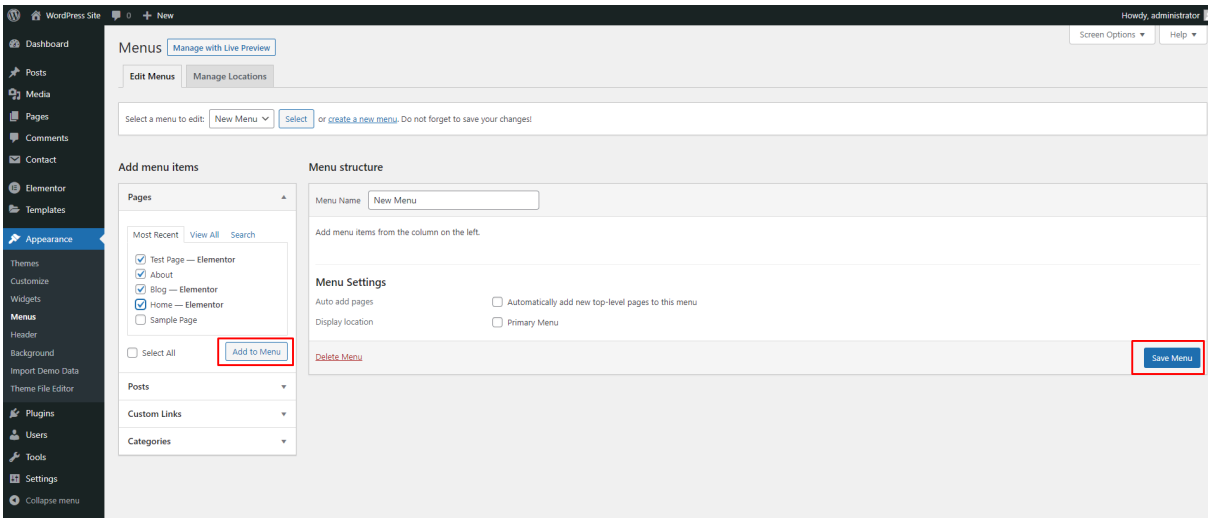
1.Go to **Appearance** → **Menus** in your admin sidebar and click **Create a new menu** option..



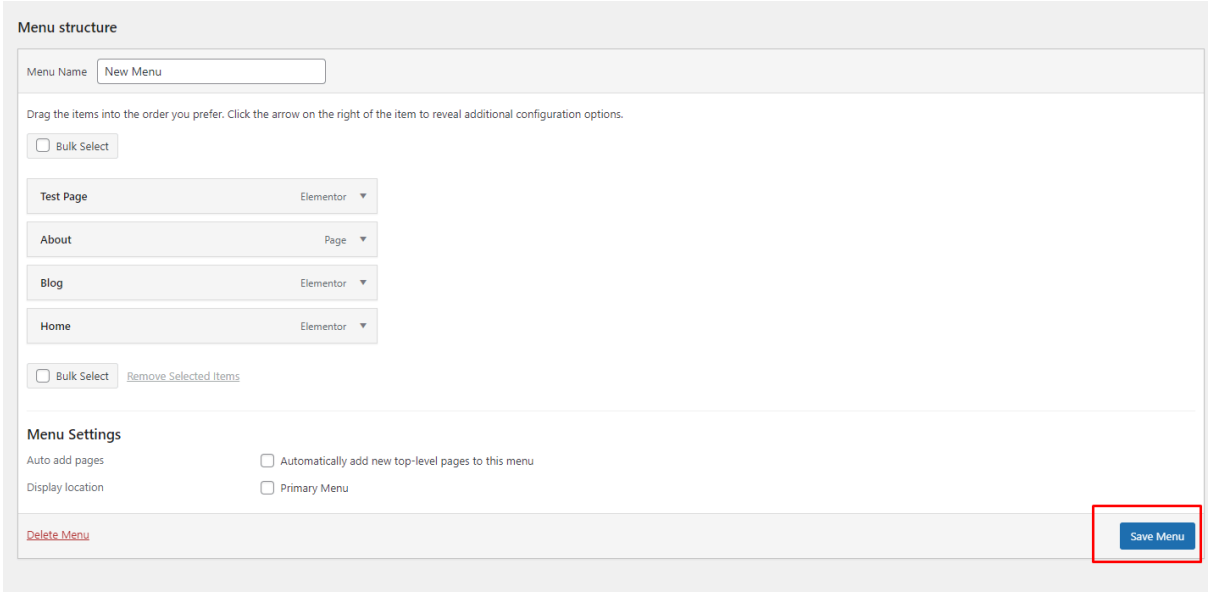
2. Select **Create a new menu** at the top of the page



3. Choose menu items you want to add from the left and hit **Add to Menu**. Then hit **Save Menu.**

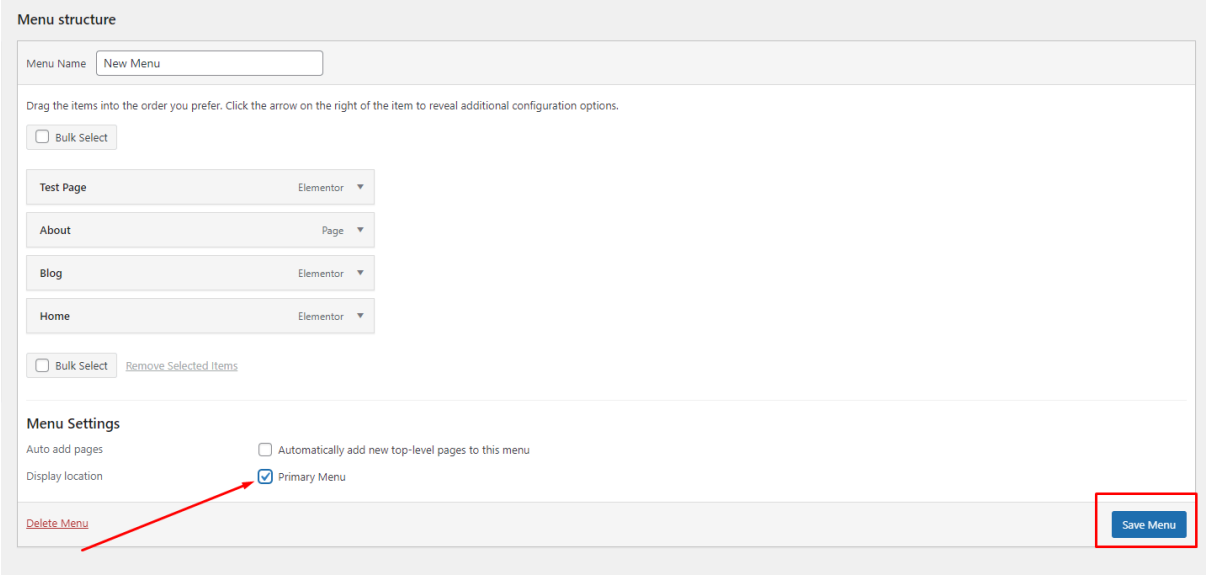


4. Your new **menu** has been created:



5. Using the **Custom Links** and **Pages** boxes at the left, add items to the menu and drag and drop to arrange them.

6.If you would like to use this menu in the primary navigation of the theme, scroll down to the **Menu Settings** area, enable the checkbox next to the **Main Menu** menu locations.



7. Click **Save Menu** and that is all.

Contact Form

Contact Form Setup

Overflow comes with integrated support for the Contact Form 7 plugin:

Contact Form Main

```
[contact-form-7 id="6665" title="Contact Form"]
```

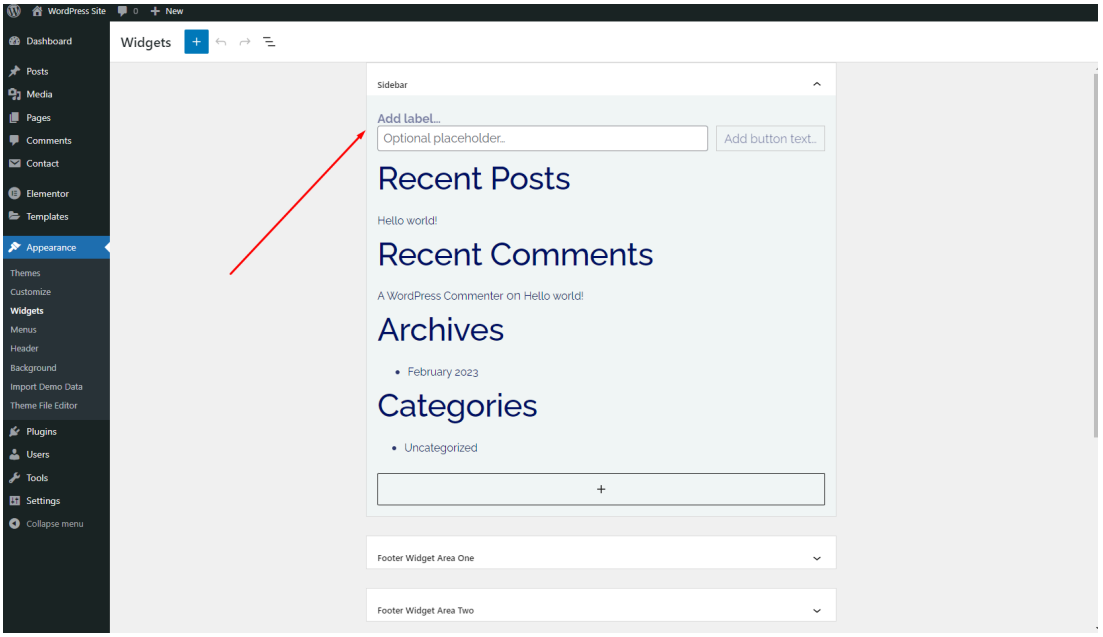
Widgets

How to add widgets in sidebar

Step 1: Appearance >> **Widgets**. You can see all of the **Sidebar** here.

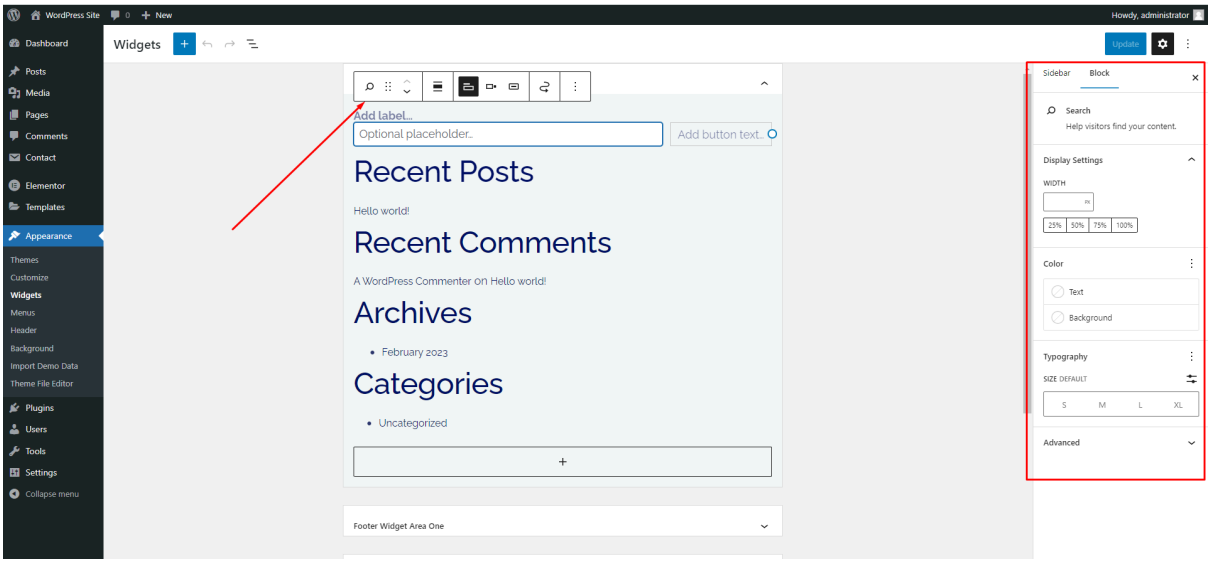
Step 2: Choose the **Widgets** you want and drag it to the **Sidebar** you want or click on it to choose the **Sidebar**.

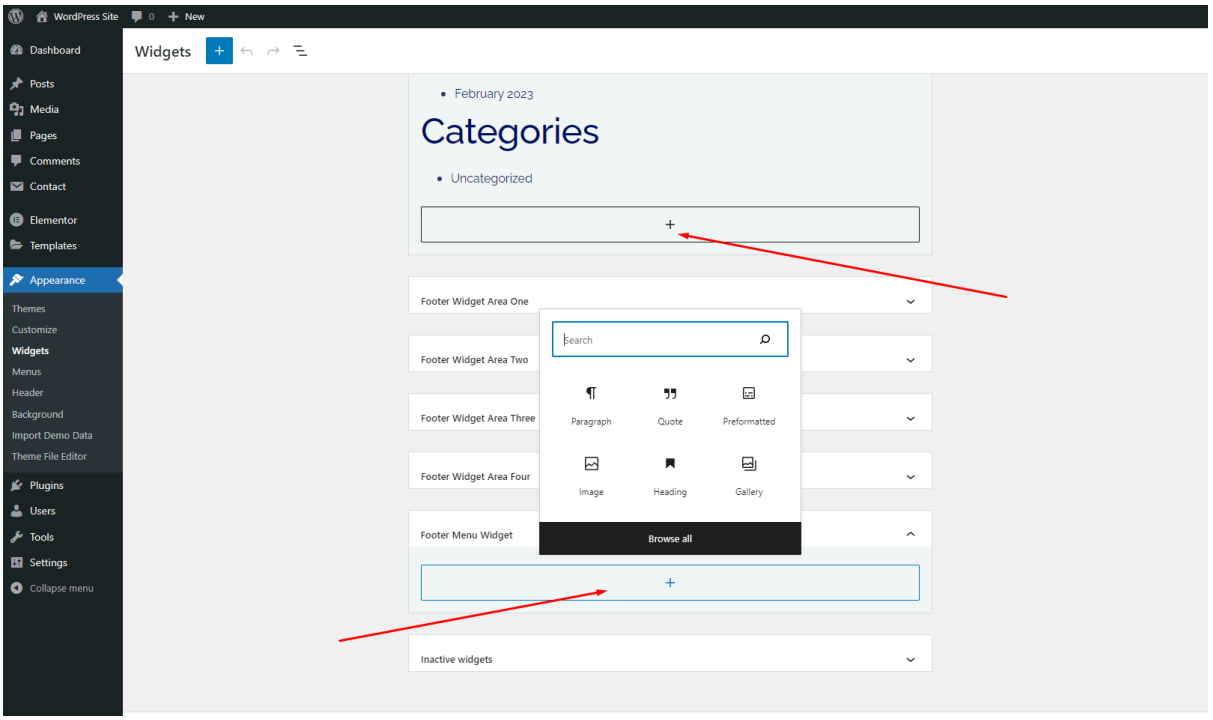
In the case you want to delete its settings, drag it back.



How to edit Widgets

Hit Appearance > Widgets. Choose a widget you want to edit.





Then go to the right where you will notice a just-added widget. In this case, **Search on Footer|#2**. Type information and hit **Save**.
