Manti Elementary School Improvement Plan Summary for 2025-2026

We are excited to share with you the key elements of our Manti Elementary School Improvement Plan for the 2025–2026 school year. Our mission is to foster a collaborative, engaging, and supportive environment that enhances both student achievement and well-being.

Enhancing Student Achievement

- **Professional Learning Communities (PLCs):** Teachers meet weekly to review student data, share best practices, and design instruction that meets the needs of every learner.
- **Power Hour:** Students will continue in skill-based groups four times a week for targeted re-teaching, intervention, and enrichment opportunities.
- **Reading Core:** We are deepening our use of high-quality reading instruction through *LETRS* training and the *Really Great Reading* phonics program, ensuring strong literacy growth across all grade levels.
- **Math Core:** With a new Math Tutor on staff, we are expanding support for students and teachers. Professional learning opportunities and high-quality instructional resources will guide our efforts to improve math proficiency.

Parent Involvement and Accountability

- **Parent Conferences & Involvement:** We will continue hosting parent-teacher conferences twice annually and encourage families to support daily reading at home. Parents are invited to volunteer, participate in PTO, and attend events like special student-parent lunches.
- **Customer Service Commitment:** Our staff is dedicated to creating a safe, welcoming, and responsive school environment. We will keep parents informed through newsletters, digital platforms, and open communication.

Community and Leadership Development

- **School Community Council:** The council meets regularly to review school plans and student needs. Elections will be held online this year through Google Forms to make participation easier.

- **Leader in Me Program:** As a proud Lighthouse School, we help students discover their strengths and develop leadership skills. Leadership binders will continue to be used to set and track personal and academic goals.

Student Wellness and Behavior

- **Student Wellness Center:** Our new center supports students in learning emotional regulation and coping strategies. This positive space replaces the former Refocus Room.
- **Skill-Building Program:** Students work through a structured system to master essential life skills with support from coaches and teachers, preparing them for success in school and beyond.

Technology and Programming

- **COVE 21:** Although our STEM grant has ended, we remain committed to offering hands-on opportunities in computing, problem-solving, and coding to prepare students for a technology-rich future.

Attendance and Standards-Based Learning

- **Attendance Goals:** We aim for a schoolwide attendance rate of 90% or higher. Celebrations recognize classes and students who meet attendance goals.
- **Standards-Based Learning:** Our district is transitioning toward a standards-based model. This year, we will work on building a shared vision and recognizing growth through meaningful celebrations of learning.

We are confident that these initiatives will continue to strengthen student learning, support teacher growth, and build community. Thank you for your partnership in making Manti Elementary a place where every child can soar.
