

Dear Parents,

Your child is responsible for bringing in a group of items for our *Estimation Station* jar. Please help your child select items according to the following guidelines:

- No living items
- No food items (we don't want to attract pests)
- Items should be 3-D, that is, flat items (stickers, sequins, etc.) should be avoided
- Nothing of real value (such as coins)
- All of the items must fit in the attached plastic bag

During the 1<sup>st</sup> semester, it is preferable to limit the number of items to less than 100. For second semester, the number may surpass 100. All items will be returned to you.

Here are some suggestions for items, just to get you started: dominoes, building blocks (toy), cotton balls, Q-tips, crayons, marbles, acorns, pinecones, pebbles, packing peanuts, pipe cleaners.....

Thank you for contributing to our *Estimation Station* jar.

Sincerely,
