SUMMARY

As a passionate and dedicated Computer Science student at Udayana University, I have developed a strong foundation in software development, particularly in backend and Android development. I have a basic understanding of various programming languages such as Python, Kotlin, PHP, Golang, and Javascript, as well as knowledge of databases and APIs. I have been enhancing my expertise in front-end development, specifically using technologies like Next.js and Tailwind CSS. I am eager to further expand my skill set, collaborate with professionals, and contribute to projects that align with my passion for technology and innovation

EXPERIENCE

PT. Taksu Teknologi Indonesia Internship   August - Oct 2024
Web developer
- Create Portfolio web (Portfolio Web)
- Add new tool, Sort tools to the developer tools application
- Update feature Magic Simple Coder to the developer tools application
