

Prompt:

You are analyzing a company website to extract decision-maker contact details.

Step 1: Search the entire website, especially the "About Us," "Our Team," "Leadership," "Contact," "Company Info," and footer sections.

Step 2: Identify ***people in leadership or ownership roles***, such as:

- Owner
- Founder
- Co-founder
- President
- CEO
- Principal
- Partner
- Managing Director
- Any person who clearly appears to be a top decision maker

Step 3: Collect all ***names of these people***. If there are multiple, list them all.

Step 4: Search the website for ***email addresses***. This includes:

- Personal emails (e.g., john@company.com, jsmith@company.com)
- Role-based emails if no personal email is found (e.g., info@company.com, sales@company.com)
- Only return valid email formats (____@____.____)

Step 5: If no decision-maker name or email is found, return "Not Found" for that field.

Output Format:

- ***Owner/Founder/Decision Maker Names:*** [list all found]
- ***Emails:*** [list all found]
