

Name(s) _____ Period _____ Date _____

Website for a Purpose - Prepare

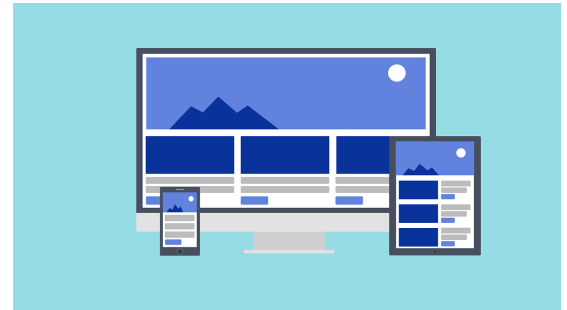

Overview

You've already **defined** the purpose of your site. Now you'll have a chance to **prepare** to develop it.

This project will show that you can...

- ☐ Work together as a team
- ☐ Develop and use a plan
- ☐ Link between multiple pages on a websites
- ☐ Use classes to style elements on a page
- ☐ Write readable code and use good file names

Step 1: Design Your Site

Describe each page on your site and who is in charge of it. Each person should have at least one page.

Next, sketch each page on a separate piece of paper. Make sure all the pages have the same style, then attach them to this project guide.

Page Name	Description	Who is in Charge	Sketch
index.html	Main page with a picture of club logo, description of what are club is about, and links to other pages.	Ray	☐
about.html	About page with a picture of club logo, description of the history of our club, who our club sponsor is, and the purpose of our club.	Eva	☐
calendar.html	Calendar page with a picture of club logo and description of the events and when they will happen.	Todd	☐
join.html	Join page with a picture of club logo and the rules and application to join the club.	Ben	☐
			☐
			☐

Step 2: Describe your Tag and Class Styles

First decide the tags that you will use on your page and how each tag will be styled.

Tag	Style Description
body	Light pink
paragraph	Black, normal font.
headers	Dark Blue, sans serif font,

Next, decide the classes that you will use on your page and how each class will be styled.

Class	Style Description
.history	thick blue border and blue color for text
.join	thick red border and blue color for text

Step 3: Make a Work Plan

How will your team split up the work?

We will write the code for each page and then come together to create the web page.

Did everyone agree to this plan? Yes

Step 4: Find Your Images

Next, find all the images that you need and save them somewhere your whole team can find them. **Rename each image** and write the file name here. Be sure to write down all the information about the image, such as the author, title, source, and license it's covered under. Make sure **everyone in your team** can access the images.
