PEACE LIBRARY SYSTEM

Programming Kits - Conditions for Use

Conditions for use of Peace Library System's (PLS) programming kits are listed on the Programming Kits Lending Policy form. Some of the kits have additional conditions and/or instructions which are listed in this document. Please read the conditions that correspond with the programming kit you have requested.

Table of Contents

Button Maker Kit 1

Coding for Early Learners Kit 3

Dungeons & Dragons Kit 4

Laser Tag Kit 5

Lego Creations Kit 6

Nintendo Switch Kit 8

Oculus Quest Virtual Reality Kit 9

Physical Literacy Kit 10

Playstation 5 Kit 11

Button Maker Kit

Upon requesting the kit, library staff will be asked to specify which size of button they want to make. They will be provided with the correctly-sized die and the materials to create 50 buttons in that size. More might be provided upon request, at PLS staff's discretion.

Available button sizes:

- Small (1 inch)
- Medium (1 ½ inch)
- Large (2 ¼ inch)

The button maker should be operated by an adult, as it requires a great deal of strength and leverage. Staff should supervise use of the button maker at all times.

The button maker is a heavy, steel, mechanical press so ensure hands and fingers are clear of any areas where the press comes down or the lever may pinch. Button making tools do include a circular cut-out tool and users should be aware of where the blade is at all times.

Upon receiving the button maker, staff will familiarize themselves with the enclosed user manual. Further instructions can be found here.

Coding for Early Learners Kit

Recommended Ages for contents:

- Play & Learn Bumblebee: 24 Months +
- Coding Critters: 4 +
- Snap Circuits: 8 +
- Turing Tumble: 8+

Dungeons & Dragons Kit

Cleaning:

After using provided water-soluble pens on the vinyl game mat, please clean off with provided wipes before returning to PLS. If cleaning wipes are missing, please contact PLS immediately. A warm, damp cloth may be used in place to clean the game mat.

Laser Tag Kit

By submitting your lending form request, you have acknowledged the following information about the included Laser Magic Ball:

- This product is a class IIIR laser product. **Users should avoid staring at lasers coming from hole position. May cause eye discomfort.**
- Do not allow children to operate laser machine alone.
- Laser machine is suitable for indoor use. Protection level is IP20. Avoid use in wet, hot, and dusty environments.
- Please use power adapter provided and not an external one.
- Comes with 2 X Screws and a bracket to help attach or hang it on a wall or ceiling

Class 3R Laser Safety Information(source: https://www.lasersafetyfacts.com/3R/)

What is a Class 3R Laser?

Class 3R lasers are considered safe when handled carefully. There is only a small hazard potential for accidental exposure. For visible-light lasers, Class 3R lasers' output power is between 1 and 4.99 milliwatts.

In the United States, both Class 2 and 3R lasers can be sold as "pointers" or for pointing purposes. (In Australia, the U.K., and many other countries, laser pointers are restricted to Class 2 only.)

Class 3R is essentially the same as the Roman numeral "Class IIIa" you may see on some lasers' labels.

Safe Use Guidance - General

A Class 3R laser is low powered. It normally would not harm eyes during a momentary exposure of less than ¼ second. This is within the aversion response, where a person turns away and/or blinks to avoid bright light.

Do not deliberately look or stare into the laser beam. Laser protective eyewear is normally not necessary. A Class 3R laser is not a skin or materials burn hazard.

However, a Class 3R laser can be a distraction, glare or flashblindness hazard for pilots and drivers. **NEVER aim any laser towards an aircraft or vehicle that is in motion.** This is unsafe and is illegal -- you could be arrested and jailed.

ONLY ALLOW USE BY RESPONSIBLE PERSONS
This is not a toy. Children can safely use Class 3R lasers only with continuous adult supervision.

Lego Creations Kit

Upon receiving the Lego Creations Kit, receiving staff will check that the iPad is in working condition and weigh the Lego containers.

Before returning the kit, the iPad and the Lego power bank square will be fully charged, and all the Lego pieces will be weighed, sprayed and wiped down with Mr. Clean: Clean Freak, and placed in their appropriate container.

Contact PLS headquarters immediately if:

- the iPad is not working properly, damaged, or missing, or
- if there is a large discrepancy in the weight of Lego

Starting Weight of Lego Mindstorm Lego

Lego Colour	**Starting Weight** (Legos & Containers **without** lid(s))
Black (2 X Green Lid Containers)	500g
White (1 X Green Lid Container)	238g
Teal (1 X Yellow Lid Container)	134g
Grey (1 X Yellow Lid Container)	130g
Blue (1 X Blue Lid Container)	57g
Mix of Colours [Beige, Brown, Red & Green] (1 X Blue Lid Container)	58g
7 Total Containers	**1,117g Total Weight**

Starting Weight of Stop Motion Lego

Lego Colour	**Starting Weight** (Legos & Containers **without** lid(s))
Assorted (1 X Yellow Brick Container)	1128g
Lego Minifigures (1 X Blue Lid Container)	78g
2 Total Containers	**1,206g Total Weight**

Lego Mindstorm Weight Tracking

Colour	Weight When Received	Staff Name & Date		Weight When Returning	Staff Name & Date
Black					
White					
Teal					
Grey					
Blue					
Mix [beige, red, brown & green]					

Stop Motion Lego Weight Tracking

Colour	Weight When Received	Staff Name & Date		Weight When Returning	Staff Name & Date
Assorted					
Lego Minifigures					

- Make sure your scale is at 0 before you weigh. If needed, select TARE to force it to 0.
- Measure in grams
- Measure the container, not the lid
- Weight can give or take a few grams. Our concern is for a drastic loss of weight
- Weight tracker sheets are located in the black folder inside the kit.

Nintendo Switch Kit

No additional conditions at the moment.

Oculus Quest Virtual Reality Kit

Consider before Borrowing:

- Do you have enough space? Users will walk around, swing their arms, duck, and jump while playing games. They need space out of the walkway so they do not hit anyone or anything.
- Can you handle the noise? Can you have the users in a room with a door? Do you have earphones to plug into the VR headset? Games have noise that will play out of the headset. Users will laugh, scream, and talk while playing.
- Users MUST use the wrist straps on the controllers while playing
- Do not leave the console in direct rays of sunlight as this can damage the lenses.
- Console is designed for **ages 13 and up**.

Cleaning:

- Watch this video (https://www.youtube.com/watch?v=ABCBuJQ8rUs) for instructions before attempting any cleaning. If any supplies are missing, please contact Peace Library System immediately. Do not use your own substitutes to any cleaning supplies.

For Best Use:

- The power button (rectangular small button located on the side of the front) should be held for 2 seconds to turn the console on.
- The console is fully charged when the light beside the power button is green.
- Recharge console and controller batteries between use.

Physical Literacy Kit

Consider before Borrowing:

- Do you have enough space? Some of the equipment will require room for tossing, balance, and motion activities.
- PLS is not responsible for any liability, damages, or expenses resulting from use or misuse of borrowed equipment.

Cleaning:

- Disinfectant wipes are provided in the kit for staff to use at their discretion. Please ensure that equipment is clean (or as you received it) upon returning. If any supplies are missing, please contact Peace Library System immediately. Do not use your own substitutes to any cleaning supplies.

Playstation 5 Kit

- Before returning the kit, all controllers will be plugged into the PS5 with the black USB cord to check for any software updates needed, and controllers will be fully charged.

- No accounts other than the Peace Library System Playstation account will be signed into, while using the console.

- The console will not be left on the floor or with wires hanging in high traffic areas. Knocking over or kicking the tower can damage and break the console.

- The console will be turned off before unplugged from its power source by selecting the PS logo on the controller. Click the power icon at the far right of the menu bar that appears.
