

Check the ceilometer services status

Jing, mqjing@gmail.com

Packstack version

```
export CEILO_SVCS='compute central collector api alarm-evaluator alarm-notifier'
for svc in $CEILO_SVCS ; do sudo service openstack-ceilometer-$svc status ; done
```

Ex:

```
anaconda-ks.cfg keystone_admin keystone_demo
[root@jing-vm1 ~]# ./keystone_admin
[root@jing-vm1 ~(keystone_admin)]# export CEILO_SVCS='compute central collector api
alarm-evaluator alarm-notifier'
[root@jing-vm1 ~(keystone_admin)]# for svc in $CEILO_SVCS ; do sudo service
openstack-ceilometer-$svc status ; done
Redirecting to /bin/systemctl status openstack-ceilometer-compute.service
● openstack-ceilometer-compute.service - OpenStack ceilometer compute agent
   Loaded: loaded (/usr/lib/systemd/system/openstack-ceilometer-compute.service; enabled;
   vendor preset: disabled)
   Active: active (running) since Sat 2016-07-23 14:51:07 UTC; 2h 20min ago
   Main PID: 24085 (ceilometer-poll)
   CGroup: /system.slice/openstack-ceilometer-compute.service
           └─24085 /usr/bin/python2 /usr/bin/ceilometer-polling --polling-namespaces compute
--logfile /var/log/ceilometer/compute.log

Jul 23 14:51:07 jing-vm1 systemd[1]: Started OpenStack ceilometer compute agent.
Jul 23 14:51:07 jing-vm1 systemd[1]: Starting OpenStack ceilometer compute agent...
Jul 23 14:51:09 jing-vm1 ceilometer-polling[24085]: Option "verbose" from group "DEFAULT"
is deprecated for removal. Its value may be silent...future.
Jul 23 14:51:09 jing-vm1 ceilometer-polling[24085]: Value 'password-ceilometer-legacy' for
