Key Takeaways

- The Einhell PRESSITO works on battery or plugged in, giving you options at home or on the road.
- Maximum pressure reaches 160 PSI (11 bar), making it suitable for cars, bikes and sports equipment.
- The battery runs for 20–25 minutes straight, which is enough for multiple car tyres per charge.
- Its digital gauge with auto-stop prevents overinflation and seems to get the pressure level spot on every time.

- [Ordiniq's AutoPump](#) provides similar power at 150 PSI with better UK support and a 90-day guarantee.

Overview of Einhell PRESSITO 18/25

The Einhell PRESSITO 18/25 provides a dual-power approach to home tyre maintenance, allowing users to operate cordlessly or plug in when near a power source. If you already own Einhell tools, it uses the same Power X-Change batteries, which saves money.

The PRESSITO features two distinct modes: high pressure for tyres and high volume for air mattresses and beach toys. This means you don't need multiple devices in the garage. This versatility allows one tool to handle various inflation tasks effectively.

With more people choosing to handle their own car maintenance, the ability to check and adjust tyre pressure at home or roadside saves trips to the garage. Proper tyre pressure keeps you safer, improves your car's performance, and saves fuel.

Ordiniq AutoPump: Your Pocket-Sized Roadside Hero

Join 10,000+ Drivers Who Never Worry About Flat Tyres Again

Why Ordiniq's AutoPump Is Essential

- **Powerful 150 PSI** performance inflates tyres in minutes
- **Smart Auto Shut-Off** sets perfect pressure every time
- **Works on Everything** from cars to bikes to sports equipment
- **Built-in LED & SOS Lights** for nighttime emergencies
- **24/7/365 Customer Support** to give you peace of mind

What

★★★★★ "I like getting a flat allowed me Definitely a

Customers Say

was at first very skeptical about using a new product Autopump with my 2018 Ford Focus. But after tyre due to a nail, it got me inflated quickly and to get to a garage and have the tyre repaired. thumbs up from me" - Gregg D. Bristol, UK

Try It Risk-Free for 90 Days

Experience the AutoPump with zero worries. If it doesn't save you from a tyre emergency within 90 days, we'll refund your purchase—no questions asked.

Technical Details That Matter

Caption: The PRESSITO attempts to balance portability with performance, though with some compromises in battery life.

Alt text: A woman working on her car tyre with the Einhell PRESSITO.

Power & Pressure Performance

The PRESSITO delivers two pressure modes that cover different needs. The [high-pressure](#) mode reaches 160 PSI (11 bar) for tyre inflation. It moves 25 litres of air per minute, filling a flat car tyre to 36 PSI in about 90 seconds. The high-volume mode handles air mattresses and pool toys.

The pressure remains fairly consistent even when the battery gets low. This consistency helps when you need specific [tyre pressure levels](#).

Battery Performance & Charging

The battery question always comes up with cordless tools. Using a standard 18V 2.0Ah Power X-Change battery, you get 20–25 minutes of continuous high-pressure pumping. That covers 8–10 car tyres from low to proper pressure on one charge, assuming no complications.

Charging takes about 50 minutes with the standard charger. If you have Einhell's fast charger, that drops to 30 minutes, though users often find themselves caught with insufficient power mid-job.

Size & Weight

The PRESSITO measures 20.5 x 8 x 19 cm and weighs 1.1 kg without battery. Add a standard battery and you're looking at 1.5 kg total. This size fits in most boots, though it's not particularly compact compared to dedicated cordless units.

The grip feels adequate for one-handed use. Tough plastic construction keeps weight reasonable while providing basic protection. The design prevents it from tipping over while running, and it stores easily enough.

Noise Levels

The PRESSITO runs at about 79 decibels from a metre away. Since it's pretty comparable to a Hoover, it's not exactly quiet for residential use. Traditional [air compressors](#) are louder at 85–95 decibels.

That said, the brushless motor and case design keep noise at manageable levels. You can hold a conversation while it runs, though neighbours might notice.

5 Features That Make the PRESSITO Special

1. Battery or Plug-In Power

You get dual power options with this tool—use the battery when away from power or plug in when at home. This addresses some practical problems.

For example, if you are inflating multiple tyres, you might start on the battery, then need to plug in later. But if you are working in your garage, the mains power saves the battery, though it adds complexity.

Caption: The dual power system adds complexity but provides backup when the battery runs out.

Alt text: Image of Einhell PRESSITO 18/25 Power X-Change battery compressor.

2. Digital Gauge with Auto-Stop

The LCD screen shows pressure in PSI, bar, kPa, or kg/cm². While its accuracy stays within reasonable limits for most applications, some users report variations.

The auto-stop function lets you set the target pressure and walk away. The compressor should stop at the [right pressure](#), though it occasionally overshoots by 2–3 PSI depending on the unit.

3. Attachments for Everything

You get several attachments in the box:

- Standard valve for car tyres
- Presta valve for road bikes
- Three different needles for balls and toys

The connections work adequately with minimal air leakage. There's also a separate high-volume hose for larger items, although storage can be awkward.

Caption: The included attachments cover basic inflation needs, but their organisation can be challenging.

Alt text: A man using the Einhell PRESSITO 18/25 Power X-Change battery compressor.

4. Built-In Work Light

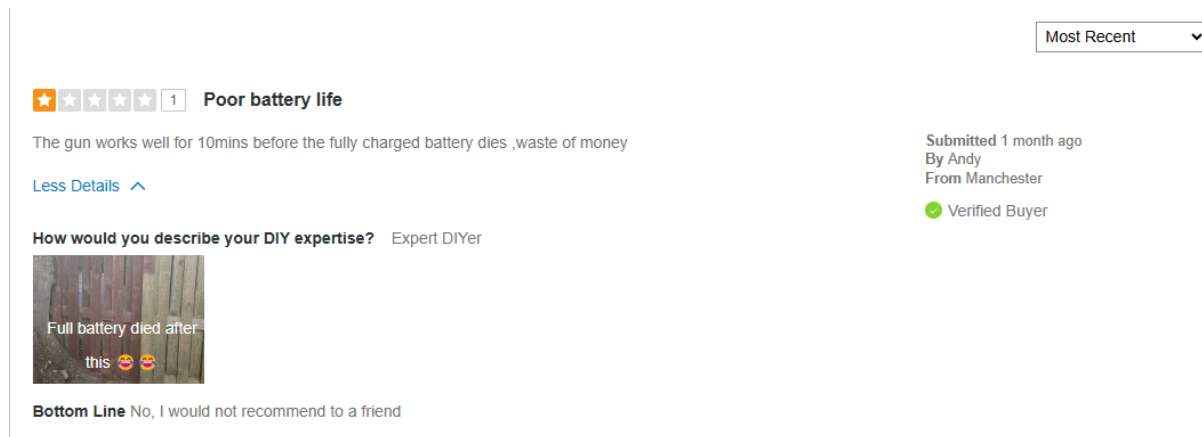

The LED light illuminates your work area automatically when the compressor runs while the white light shows valve stems clearly in dark conditions. This feature helps during roadside situations where the light makes you more visible to traffic.

Actual User Reviews

Short Battery Life

Short battery life remains the most common complaint from PRESSITO users. Many find the 20–25 minute runtime insufficient for larger jobs, forcing them to either stop mid-task or switch to the mains power.

You may need to always keep the battery fully charged and consider buying a spare if you plan serious mobile use. The 50-minute charge time means planning ahead becomes essential.

Caption: Users complain that the Einhell PXC 18V 2.5Ah Li-ion battery & charger starter kit isn't very reliable.

Alt text: Screenshot of user review.

Pressure Reading Problems

Some users report gauge readings that don't match other pressure gauges, which creates confusion about actual tyre pressure. While calibration is possible, many find that this step shouldn't be necessary on a new tool.

The auto-stop feature occasionally overshoots target pressure by 2–3 PSI, though this varies between units. Most users just learn to set targets slightly lower to compensate.

Einhell PRESSITO Price: Is It Worth Your Money?

The Einhell PRESSITO 18/25 typically retails for £89–£109 depending on whether you buy the tool-only version or the kit with battery and charger. If you already own Einhell Power X-Change tools, the tool-only price might make sense. For new buyers, factor in an extra £40–£60 for a battery and charger.

The limited 20–25 minute battery life means you're often reaching for the power cord anyway. And the 2.0Ah battery takes nearly an hour to charge, which can leave you waiting when you need it most.

The PRESSITO works adequately for occasional use, but daily reliability concerns emerge from user feedback. For the same money, you might find better long-term value in a dedicated cordless unit that excels at portable performance rather than trying to do everything adequately.

**Note: Pricing and/or product availability mentioned in this post are subject to change. Please check the retailer's website for current pricing and stock information before making a purchase.*

Why UK Drivers Choose Ordiniq's AutoPump

Caption: Smart UK drivers pick Ordiniq's AutoPump for better support and simpler operation.

Alt text: Ordiniq's AutoPump - one click Air pump set.

While the PRESSITO offers both battery and plug-in power, our [AutoPump](#) focuses on pure cordless performance at 150 PSI. Sometimes simpler is better—no switching between modes or carrying extra cables. Just grab and go when you need it.

Here are the powerful features of our AutoPump that customers love:

Smart Auto Shut-Off Feature

Our AutoPump's intelligent auto shut-off technology sets the perfect pressure every time without overshooting.

Unlike the PRESSITO's occasional pressure variations, our system consistently hits your target within 1 PSI accuracy, preventing both [under- and over-inflation](#) damage to your tyres.

Powerful 3900mAh Rechargeable Battery

The AutoPump features a strong and reliable 3900mAh rechargeable battery that charges quickly in under 3 hours.

This massive battery capacity provides significantly more runtime than the PRESSITO's limited 20–25 minutes, which ensures you can handle multiple vehicles or emergencies without interruption.

Versatile Charging Options

We've included multiple charging solutions for ultimate convenience which are a USB-C lead for portable on-the-go charging, a UK plug adapter for home charging, and a 12V car lead for in-vehicle charging.

This flexibility means you're never stuck with a dead battery, unlike single-charging-method competitors.

Universal Compatibility

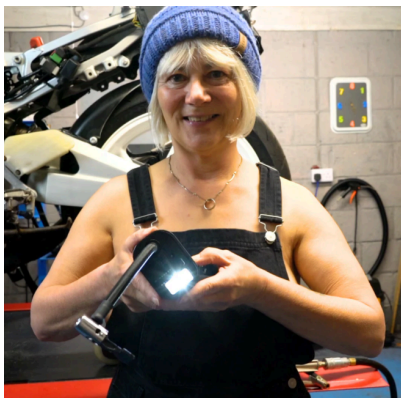

You can use our AutoPump for vehicle tyres, motorcycles, go-karts, bicycles (including Presta valves), basketballs, ATVs, UTVs, golf carts, wheelchairs, air beds and much more. This versatility exceeds what most single-purpose [inflators](#) offer.

Emergency Lighting System

For hard-to-see situations, our AutoPump comes with a bright white LED light and a red flashing SOS light for alerting others in emergencies. These safety features prove invaluable during roadside breakdowns or nighttime repairs.

Customer Care

We back our AutoPump with unbeatable customer care. The included tyre pressure monitoring caps show when tyres need air before problems start. That's prevention worth £19.99 that Einhell doesn't include.

Dana. Cornwall, UK

"Just as advertised"

"The Autopump was exactly as promised. When I saw it advertised I thought no way it can be that easy. But it saves me so much frustration. I can check my own tyres right from home, there's no hassle or complications. It's helped me on numerous occasions when commuting long distances for work. An excellent tool"

Frequently Asked Questions (FAQ)

How long does the Einhell PRESSITO battery last on a single charge?

A standard 2.0Ah battery gives 20–25 minutes of continuous high-pressure pumping. That's enough for 8–10 car tyres from low to proper pressure. Actual runtime varies with the job; higher pressures use more power.

Can the Einhell PRESSITO inflate truck tyres?

Yes, but it takes time. The 160 PSI maximum exceeds most truck tyre needs (80–105 PSI typical). Pickup trucks and SUVs inflate fine in 4–6 minutes from flat.

Commercial truck tyres take 10+ minutes due to their size. While Einhell is good for pressure adjustments, it's less practical for completely flat lorry tyres.

Does the Einhell PRESSITO come with a warranty?

Einhell gives a 2-year warranty covering defects and failures under normal use. Keep your receipt for claims. Register online within 30 days for their XXL Warranty extending coverage to 3 years. Warranty doesn't cover wear items like hoses or damage from misuse.

Is the battery included with the Einhell PRESSITO purchase?

Depends what you buy. "Tool only" versions don't include battery or charger. Kit versions usually include one 2.0Ah battery and standard charger.

Always check the listing carefully because retailers sometimes offer different bundles with various battery sizes or extra accessories.

How does Ordiniq's AutoPump compare to the Einhell PRESSITO?

[Ordiniq's AutoPump](#) provides excellent 150 PSI performance with superior UK customer support.

It features a powerful 3900mAh rechargeable battery that charges quickly in less than 3 hours, can inflate almost anything from cars to sports equipment, and includes a built-in flashlight with emergency SOS function.

Customers also get free tyre pressure monitoring caps worth £19.99 and a 90-day money-back guarantee, something Einhell doesn't offer.

The AutoPump focuses on pure cordless convenience without the complexity of dual power systems.
