Crossplane Community Meeting Notes/Agenda

This document will capture the agenda and meeting notes and links for the recurring Crossplane community meetings.
Please add items you wish to discuss directly to the next meeting's agenda.

Schedule

Meetings are held on Zoom every 4 weeks on Thursday at 10 AM PT (1 PM ET) to 11 AM PT (2 PM ET). You can find the meeting schedule on the community calendar.

Contact jared@upbound.io to be added to the calendar invite, or you get the calendar invite automatically by joining the crossplane-dev mailing list.

  - Wendell Beckwith
  - (add yourself!)
- Releases
  - potential v2.0.3 patch release:
    - diff: https://github.com/crossplane/crossplane/compare/v2.0.2...release-2.0
    - open backports: https://github.com/crossplane/crossplane/pulls?q=is%3Apr+is%3Aopen+label%3A%22backport+release-2.0%22
- Next release (v2.1)
  - Release Date: Early November 2025
    - Release issue: TBD
    - 2.1 release board
    - Releases schedule/table
    - Community Calendar
  - Big features and designs for this release
    - core reliability, v2+ polishing, hardening
    - realtime composition maturity - stop reconciliation storms
      - https://github.com/crossplane/crossplane/issues/6751
    - package manager reliability
    - maturing APIs from https://github.com/orgs/crossplane/projects/21
    - community contributions ← super important!
  - What priorities and contributions are there from the community?
    - all unassigned P0/P1 issues
    - Good first issues

- Ecosystem releases and investments
  - Releases
    - function-go-templating v0.11.0 - https://github.com/crossplane-contrib/function-go-templating/releases/tag/v0.11.0
      - thanks to first time contributors and bobh66 for stepping up to maintain
    - function-status-transformer v0.5.0 is now available - this release adds support for extra-resources
    - function-shell v0.5.0 https://github.com/crossplane-contrib/function-shell/releases/tag/v0.5.0
    - provider-nop v0.5.0 is now available - it has namespaced resource and safe start support, which will be useful for testing scenarios and be educational for other provider authors to learn from.
      - release notes (w/ breaking changes): https://github.com/crossplane-contrib/provider-nop/releases/tag/v0.5.0
  - Investments
    - TF protov6 support - https://github.com/crossplane/upjet/pull/527
      - Thanks to Lukas Hoehl (@hown3d) for the initial contribution
    - V2-compatible upjet Provider template https://github.com/crossplane/upjet-provider-template and migration guide
    - Upcoming crossplane V2-compatible providers
      - Provider-vault https://github.com/upbound/provider-vault/pull/100
      - Provider-opentofu https://github.com/upbound/provider-opentofu/pull/94
      - Provider-upbound https://github.com/upbound/provider-upbound/pull/33

    - ○ Content (Live streams, podcasts, blogs)
        - ■ [Announcing Crossplane 2.0](#)
        - ■ [A mid-year 2025 look at CNCF, Linux Foundation, and the top 30 open source projects](#)
            - ● *"Crossplane has seen a contributor base growth of over 20% in the last year, highlighting the demand for open source control planes and multi cloud management."*

- - - [Introducing Upbound Crossplane 2.0 — The AI-Native Control Plane for the Agentic Era](#)
    - [UXP 2.0 and Crossplane: Clarifying the Relationship](#)
  - v2 feedback session
    - what are the highlights for folks that have already installed?
    - what are the rough patches and annoyances?
      - namespaced refs do not work for 100% of resources that look like they should have this support
      - upjet vs upjet-template are out of sync and impossible to create a new provider now
      - PR examples and documentation for updating a non family non forked provider for namespaced v2 resources
      - no upjet 2.0 github release, release notes, guidance, etc.
      - upjet v2 support/features that aren't just namespaced MR support - this is holding ecosystem back
    - what's missing that we want to see included in future releases?
- PRs to discuss or that need attention
  - [Please add any PRs that need attention, with your name, below]
- Optional time for deeper technical discussions
  - [Reserved time block at the end for getting into longer technical discussions that may not be relevant for the full meeting audience]
- Action items

    - ■ comments still welcome on v2 design proposal
  - ○ Graduation update
    - ■ we got to meet face to face with our TOC sponsors at Kubecon London, very productive conversation
    - ■ their initial feedback from due diligence has been incorporated into the project and they appreciated that
    - ■ we'll meet again soon to review all the changes and make a decision on next steps
  - ○ tj-actions/changed-files exploit, audit details, lessons to share
    - ■ https://github.com/crossplane/crossplane/discussions/6339
    - ■ key takeaways
      - ● use digests for imports/actions
      - ● limit permissions/access to least possible
      - ● set secrets on specific jobs/steps (not at global level)
  - ○ GH actions cache sunset issue affecting Crossplane ecosystem builds
    - ■ https://github.com/crossplane/crossplane/discussions/6399
- PRs to discuss or that need attention
  - ○ [Please add any PRs that need attention, with your name, below]
  - ○ Diff command design docs: https://github.com/crossplane/crossplane/pull/6349 @jcogilvie

- Optional time for deeper technical discussions
  - [Reserved time block at the end for getting into longer technical discussions that may not be relevant for the full meeting audience]

Apr 3, 2025

Cancelled for Kubecon London

Mar 6, 2025

Attendees (github username)
- Jared Watts (@jbw976)
- Bob Haddleton (@bobh66)
- Jon Ogilvie (@jcogilvie)
- Seth Duke (@sethfduke)
- Markus Schweig *@humoflife)
- Duce Tate (@ducet8)
- Dalorion (@ldalorion)
- Michał Woś (@wosiu)
- Eric Hicks
- Daniel
- Carl Henrik Lunde
- David
- Jay Carroll
- Jonathan Ogilvie
- Mark Anderson-Trocme
- Nick Atzert
- Patryk Orwat

Agenda/Notes
- Recent releases
  - https://github.com/crossplane/crossplane/releases/tag/v1.19.0
  - https://github.com/crossplane/crossplane/releases/tag/v1.18.3
  - https://github.com/crossplane/crossplane/releases/tag/v1.17.5
- Next release (1.20)
  - Release Date: approx. May 6, 2025
    - Release issue: TBD
    - v1.20 Roadmap
    - 1.20 release board

- - - Releases schedule/table
      - Community Calendar
    - Big features and designs for this release
      - v2 POC
      - change logs → provider ecosystem
      - `DeploymentRuntimeConfig` maturity
      - real time compositions maturity
      - high level metrics (claim level metrics)
    - What priorities and contributions are there from the community?
      - Unassigned P0/P1 issues for v1.19, all unassigned P0/P1 issues
      - Good first issues
- Provider/Functions Releases and investments
  - Recent Releases
    - crossplane-contrib/provider-upjet-aws : v1.21.0: Includes new resources, bug fixes, enhancements, and dependency updates. And patch releases for security vulnerabilities: https://github.com/crossplane-contrib/provider-upjet-aws/releases
    - crossplane-contrib/provider-upjet-gcp: Patch releases for security vulnerabilities: https://github.com/crossplane-contrib/provider-upjet-gcp/releases
    - crossplane-contrib/provider-upjet-azure : Patch releases for security vulnerabilities: https://github.com/crossplane-contrib/provider-upjet-azure/releases
    - crossplane-contrib/provider-upjet-azuread : Patch releases for security vulnerabilities: https://github.com/crossplane-contrib/provider-upjet-azuread/releases
    - upbound/provider-terraform: Patch releases for security vulnerabilities: https://github.com/upbound/provider-terraform/releases
    - crossplane-contrib/provider-kubernetes: https://github.com/crossplane-contrib/provider-kubernetes/releases/tag/v0.17.0
  - Investments
    - Upjet:
  - SIG-upjet meetings are a great place to get more involved in Crossplane providers
    - Agenda doc: 📄 Crossplane SIG Upjet - Agenda & Notes , #sig-upjet on slack
- Community topics and questions
  - Content (Live streams, podcasts, blogs)
    - https://blog.crossplane.io/community-ecosystem/
    - https://blog.upbound.io/an-update-on-upbounds-official-providers
    - https://www.ibtimes.co.in/gitops-revolution-transforming-enterprise-platform-engineering-879258

- - Kubecon London
    - party w/ diagrid/dapr! https://pages.diagrid.io/boom-battle-bar-upbound
    - Crossplane talks: https://kccnceu2025.sched.com/?searchstring=crossplane&iframe=no
  - #sig-docs call for ideas to improve the crossplane docs
    - https://crossplane.slack.com/archives/C02CAQ52DPU/p174109974854034389
  - Community Extension Projects defined
    - Blog post: https://blog.crossplane.io/community-ecosystem/
    - Governance updated with policies and lifecycle these projects must follow
      - goal is a healthy, sustainable, and fair ecosystem
    - Discussion to help maintainers - ask your questions and get answers there!
      - https://github.com/crossplane/org/discussions/87
  - v2 progress
    - proposal: https://github.com/crossplane/crossplane/pull/6255
    - Nic Cope and Jared Watts are making progress on a POC to get in folks hands for Kubecon London
      - GOAL: have something concrete, realistic, and mostly feature complete for folks to try out and really get a feel for what the v2 proposed experience would be
      - This will inform the design proposal and help make it better. The POC is not a commitment to what will ship
- PRs to discuss or that need attention
  - [Please add any PRs that need attention, with your name, below]
- Optional time for deeper technical discussions
  - https://github.com/crossplane/crossplane/issues/1805 implementation ideas? (Jon Ogilvie)
  - [Reserved time block at the end for getting into longer technical discussions that may not be relevant for the full meeting audience]

- Steven Borrelli
- Yury Tsarev

Agenda/Notes
- Recent releases
  - https://github.com/crossplane/crossplane/releases/tag/v1.19.0-rc.1
    - release candidate for v1.19.0, please take it for a test spin and report any issues!
- Next release (1.19)
  - Release Date: approx. Feb 11, 2025
    - Release issue: https://github.com/crossplane/release/issues/36
      - we are in code freeze, RC build is available for testing
      - unstructured client caching: https://github.com/crossplane/crossplane/pull/6261
        - let's get this merged and backport to release-1.19 branch
    - v1.19 Roadmap
    - 1.19 release board
    - Releases schedule/table
    - Community Calendar
  - Big features for this release
    - Usage API promoted to Beta
    - Claim Server Side Apply to Beta
    - Configurable ports for HostNetwork scenarios
    - Automatic dependency management - downgrades
    - Crossplane CLI pull from private repos
    - API promotion contributor guide
  - What priorities and contributions are there from the community?
    - Unassigned P0/P1 issues for v1.19, all unassigned P0/P1 issues

- - ■ [Good first issues](#)
    - ■ init XRs
  - ● Provider/Functions Releases and investments
    - ○ Recent Releases
      - ■ crossplane-contrib/provider-upjet-aws : [v1.19.0](#), [v1.20.0](#): Includes terraform provider upgrade, support for non-default AWS partitions, new resources, and features
      - ■ crossplane-contrib/provider-upjet-gcp : [v1.11.3](#), v1.10.3, v1.9.3, v1.8.6, v1.7.3, v1.6.3: updates to the go.mod file to address security vulnerabilities.
      - ■ crossplane-contrib/provider-upjet-azure : [v1.11.0](#); This release includes a new resource, enhancements, and dependency updates.
      - ■ upbound/provider-terraform: [v0.19.3](#)
      - ■ crossplane-contrib/function-auto-ready: [v0.4.1](#)
      - ■ crossplane-contrib/function-go-templating: [v0.9.1](#)
      - ■ crossplane-contrib/function-patch-and-transform: [v0.8.1](#)
      - ■ provider-upjet-github: https://github.com/crossplane-contrib/provider-upjet-github/releases/tag/v0.18.0
    - ○ Investments
      - ■ Upjet:
        - ●
    - ○ SIG-upjet meetings are a great place to get more involved in Crossplane providers
      - ■ Agenda doc: 📄 Crossplane SIG Upjet - Agenda & Notes , [#sig-upjet](#) on slack
  - ● Community topics and questions
    - ○ Content (Live streams, podcasts, blogs)
      - ■ [Crossplane v2: A More Intuitive Way to Manage Applications](#)
      - ■ [CNCF On demand webinar: An introduction to Crossplane - from managed services to claims](#)
      - ■ [Provision Azure resources with Crossplane](#)
    - ○ steering committee meeting summary
      - ■ "abandoned" community [provider-gcp](#) and [provider-azure](#) are causing more harm than good
      - ■ **consensus**: being clear about the future of these providers is a good thing, but be careful with archiving if there are community members that want to still invest. try to get maintainers and enable folks, but if the reality is that it's dead, make that clear.
    - ○ v2 proposal is open and ready for community discussion
      - ■ blog post: https://blog.crossplane.io/announcing-crossplane-v2-proposal/
      - ■ proposal: https://github.com/crossplane/crossplane/pull/6255
      - ■ feedback session: what do we want to discuss together here?

- PRs to discuss or that need attention
  - [Please add any PRs that need attention, with your name, below]
- Optional time for deeper technical discussions
  - [Reserved time block at the end for getting into longer technical discussions that may not be relevant for the full meeting audience]
  - [simon] if there is some time left at the end , I'd love to discuss https://github.com/crossplane/crossplane/issues/6268#issuecomment-2637393133, as it seems to run pretty deep. I have tested it now with Providerconfigs from multiple different providers and the issue occurs across all of them

Agenda/Notes
- Recent releases
  - N/A
- Next release (1.19)
  - Release Date: approx. Feb 4, 2025
    - Release issue: TBD
      - Mark will be our release manager, thanks Mark!
    - v1.19 Roadmap
    - 1.19 release board
    - Releases schedule/table
    - Community Calendar
  - Recent features merged
    - Usage API promoted to Beta: issue, PR
  - What priorities and contributions are there from the community?
    - Big designs/features in flight
      - Automatic dependency downgrades design: https://github.com/crossplane/crossplane/pull/6173
      - Promote Claim Server Side Apply to Beta
      - Increase E2E test reliability
      - Continue to mature automatic dependency management
      - API Promotion process (proposal)
      - (stretch) Mature Real Time Compositions
    - Unassigned P0/P1 issues for v1.19, all unassigned P0/P1 issues
    - Good first issues
- Provider/Functions Releases and investments
  - Recent Releases
    - crossplane-contrib/provider-upjet-aws : v1.18.2, v1.18.3; with these releases:
      - Updates to the go.mod file to address security vulnerabilities.
      - An important bug fix: ec2 instance panic issue
      - v1.19.0 will be released later today or tomorrow, includes terraform provider upgrade, new resources, and features
    - crossplane-contrib/provider-upjet-gcp : v1.11.2; This release includes updates to the go.mod file to address security vulnerabilities.
    - crossplane-contrib/provider-upjet-azure : v1.10.2; This release includes updates to the go.mod file to address security vulnerabilities.
      - v1.11.0 will be released later today or tomorrow, includes new resources, and features
    - crossplane-contrib/provider-upjet-azuread: v1.6.2; This release includes updates to the go.mod file to address security vulnerabilities.
    - upbound/provider-terraform: v0.19.2; This release includes updates to the go.mod file to address security vulnerabilities.

- - - crossplane-contrib/provider-kubernetes: v0.16.2; This release includes updates to the go.mod file to address security vulnerabilities.
      - crossplane-contrib/provider-helm: v0.20.2, v0.20.3, v0.19.3; These releases include updates to the go.mod file to address security vulnerabilities, and a bug fix
    - Investments
      - Upjet:
        - Update GH action dependencies and linter config
        - Upgrade crossplane-runtime to v1.17.0 by smcavallo
    - SIG-upjet meetings are a great place to get more involved in Crossplane providers
      - Agenda doc: 📄 Crossplane SIG Upjet - Agenda & Notes , #sig-upjet on slack
- Community topics and questions
  - Content (Live streams, podcasts, blogs)
    - ▶ Is This the End of Crossplane? Compose Kubernetes Resources wi…
    - IaC Course w/ crossplane
    - Integrating Backstage With Crossplane
  - Graduation progress
    - application https://github.com/cncf/toc/issues/1397
    - due diligence started, adopter interviews running now
  - crossplane CLI setup GitHub Action
    - https://github.com/marketplace/actions/setup-crossplane
    - Setup Crossplane cli and add it to the PATH, this action will run the install bash script and store the binary in cache for the next run.
  - [Jean] Reminder: Upbound Official providers will start to be access restricted for anything other than the latest version of the providers from 31 January 2025.
    - Announcement: https://blog.upbound.io/en-US/upbound-official-provider-update
    - Access policy: https://docs.upbound.io/providers/policies/#access
    - Users can ensure they don't reference a version of the provider that is not accessible by switching to the v{major version} tag.
      - For example use `crossplane xpkg install provider` `xpkg.upbound.io/upbound/provider-aws-s3:v1` instead of `xpkg.upbound.io/upbound/provider-aws-s3:v1.18.3`
      - `v{major version}` tag will always point to the latest version of the provider.
    - If folks have questions they can reach out in #upbound channel in Crossplane Slack.
  - [Nic] Future of Crossplane vision and direction
    - considerations to take Crossplane to the next 5 years and 100x adopters
    - ▢ The Future of Crossplane slide deck
