Big Ass Modding Guides:

SIRVAGG 2021 - A New Era - u/Rallyeator **Last update April 2021**

Extensive modding guide with 500+ mods. Experience with various Tools is needed if you want to go through all of it!

GeneralDerp's SkyrimVR Modding Guide August 2021 - u/-GeneralDerp- **August 2021**

This mod guide is a Vanilla+, it enhances the existing game (combat, magic, perks, graphics, etc) and makes little things make a bit more sense without losing the feel of Skyrim.

Older guides but good for cherry picking

SIRVAGG - SkyrimVRs Immersive Realistic Visuals, Audio, Gameplay Guide - u/Rallyeator **No further updates after Oct. 2019**

"Easier" modding guide **with about 200 mods**. This build has **NO USSEP** installed. So if you plan to add mods which require the Unofficial Patch, stick to SIRVAGG 2021

The Lightweight Lazylist - An Incremental Modding Guide - **Last updated on 2021/06/27**

u/Cangar & u/Rallyeator

A lightweight guide, covering basic stuff, supposed to fit either weaker rigs, or ppl who don't want to install hundreds of mods.

SIRVAGG 2 - "the second chapter" - u/Rallyeator **No further updates after Oct. 2019**

This is the most complex and performance heavy build of my SIRVAGG guides, **with about 400-500** mods. It needs knowledge about editing with xEdit, FNIS, DynDoLOD and is for really beefy rigs

SIRVAGG 3 - "The Trilogy" - u/Rallyeator **No further updates after May. 2020**

Part 3 is a balance between 1 and 2. This needs some modding experience, basic xEdit skills and a Mid-High end rig

AerowynX Graphics and Sound Guide **POTENTIALLY OUTDATED!!! No further updates after 08/10/2019** - u/AerowynX

Midweight modding guide with a couple of hundred mods. Based on MO2
